About us

In AdvanceTech we work with a customer centric approach. It is all about the customer's needs, satisfaction, and help to improve using the right solutions which led to many successful projects and activities with our loyal customers.

ADVANCETECH

Our story

We've started in 2020 as an ICT services and solutions provider. with a long experience and high skilled resources, we offer many solutions and services including but not limited to network infrastructure, CCTV, cyber security, Applications, IoT, and smart offices

Our Vision & Mission

Our Vision : To be Kuwait's most trusted and recognized ICT solutions partner — setting the benchmark for intelligent infrastructure, cybersecurity excellence, and digital innovation across the region.

Our Mission : To empower organizations through end-to-end ICT services that are engineered for resilience, built on partnership, and aligned with each client's strategic business goals. We deliver expert-led solutions across networking, security, smart workspaces, and digital applications — adding measurable value to every operation we touch.

ADVANCETECH

Our Core Services & Solutions

Professional Services

With our knowledgeable, skilled, and expert resources we've successfully implemented and delivered many IT projects, such a networking, cyber security, applications, smart offices projects.

Maintenance & services

We believe customer's loyalty comes from two main factors, the professionalism and commitment. We always focus on customer's needs and satisfactions to fulfill and achieve. With always available and connect approach we won customer's trust and awarded many maintenance support contracts.

Data Networking

Data networking includes switching, routing, wired, wireless, and network security solutions. We can design the network solution with all required components, to make sure the high availability, resilience, and secured network. Dealing with different vendors to provide our customer with a latest technology to help increasing service availability, improve business, reduce risks, and help with standards compliance.

Cyber Security

The protection from the emerged threats, and evolved attacks become the challenge for most of the organizations and entities, we provide to our customers the right cyber security solutions to help in protecting the customers from internal and external threats. With automation of threats detection and response.

- 1-Enables the mobile workforce and cloud adoption, protects data accessed by users, devices, applications from wherever they're located
- 2-Manages and reduces trust assumed in the traditional perimeter-based security
- 3- Enables digital transformation with intelligent security for complex hybrid environments and eliminates security gaps

Physical Security

Physical security (CCTV) is a mandatory for any business for security and regulation compliance. hence, we do our best to provide our customers with the best solution including the CCTV cameras, VMS, NVRs, cabling to build a robust security solution.

Mobile App Development

We help our customers turn their ideas and thoughts to a real mobile application product.

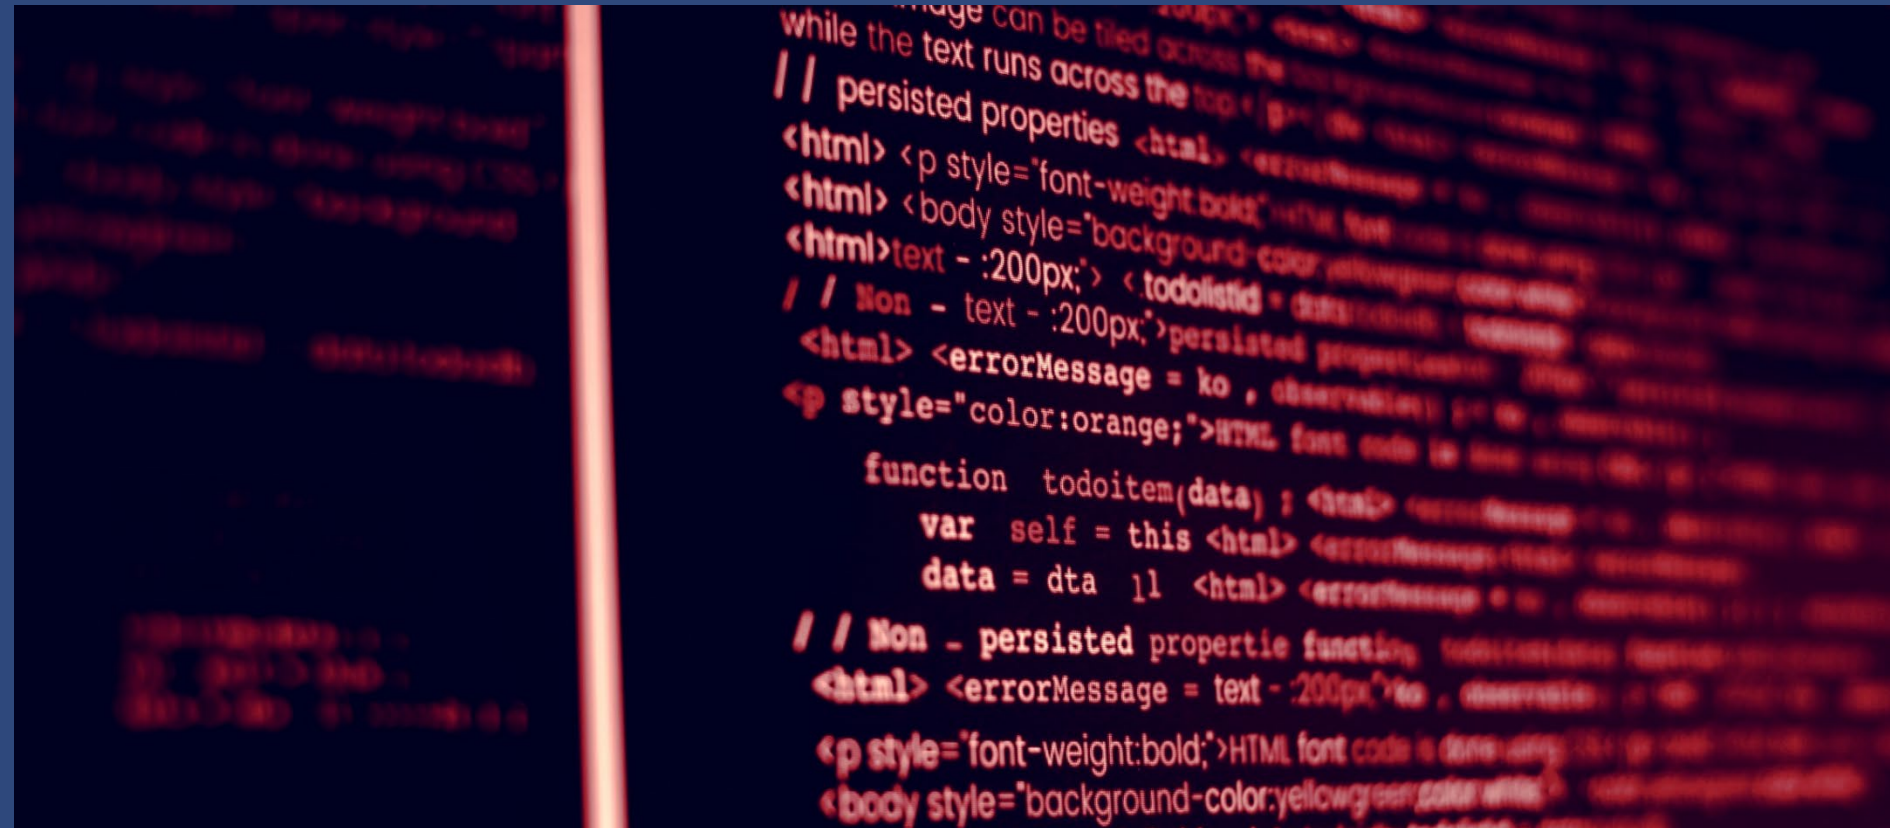

Smart Office

With one screen and zero cabling, you will have a white board, projector, and a video conferencing solutions. Eliminating all complexities of cabling, troubleshooting of issues.
