

Monteloma Mailboxes and Posts

Approved Mailboxes

Preapproved mailboxes are either exact replacements for the existing metal and plastic boxes currently installed, or one of the locking mailboxes below. The mailboxes must be WHITE in color with a rounded top, with one exception being the high security Mail Boss. For architectural continuity both homeowners must install the Mail Boss because of the squared design. These mailboxes below can be installed without an Architectural Application (anything else requires an ARC application).

Non-locking examples (similar models are acceptable, average size: 7.5" W x 9.5" H x 20.5"D)

Salsbury 4850WHT Heavy Duty

Architectural Mailboxes 5560W-R-10

Flambeau T-R4503WT (plastic)

Locking Mailbox examples: (average size: 10 3/8"W x 12 1/4"H x 20 1/8"D)

Architectural Mailboxes 6300W-10

Mail Boss 7507 White (**ONLY IF BOTH
BOTH HOMEOWNERS AGREE TO INSTALL**)

Gaines KS-15A White with
Locking Insert

Posts

The posts are 4"x4", extending 47 inches above ground level. The crossbars are 2"x6"x30" held by a single through-bolt and stabilized by 1"x3" extensions on the front and back of the post. Most edges and ends are beveled to dress it up a bit. Posts should be set in concrete, not in the ground where they will be eroded by rot and Weed Whacker then needing replacement.

Crossbar

The front of the front crossbar has a distressed grain look, with address numbers left raised and painted tan. One local signage company who has fabricated these for homeowners is **Omni Graphics** in El Cajon.
