

Empowering Special Education Learning

Introducing the Shelter Employment Training Network,

a groundbreaking initiative aimed at transforming homeless shelters into centers of empowerment and opportunity. Our innovative approach combines the provision of shelter with comprehensive cybersecurity profession training services, helping individuals experiencing homelessness gain the skills they need to secure sustainable employment.

Using Free VA and Federal Resources

By reorganizing the existing MVF (Michigan Veterans Foundation) into a platform that offers employment agency financial contracts, we create a win-win situation for all stakeholders involved. Employers benefit from accessing a pool of trained cybersecurity professionals, while individuals experiencing homelessness gain access to valuable training and employment opportunities.

Generate Internal Financial Resources

Our unique model consists of three essential agreements:

1. The employer to agency agreement allows employers to collaborate with our network and recruit skilled candidates directly from our shelter community.
2. The employee to agency agreement ensures that individuals participating in our program have access to top-notch training, mentorship, and job placement services.
3. The Public Service to Agency agreement establishes a partnership between government entities or public service organizations and our network, creating additional revenue resources for sustained growth and support.

Positive Behavior Supports

Not only does this initiative address the critical issue of homelessness, but it also tackles the growing demand for cybersecurity professionals in today's digital landscape. By providing comprehensive training services and fostering partnerships with employers and public service organizations, we are not only changing lives but also contributing to the overall security of businesses and communities.

Collaborative Team Approach

Our team works collaboratively with Clients.
