

# 2022 CLIMATE ATTITUDES SURVEY

---

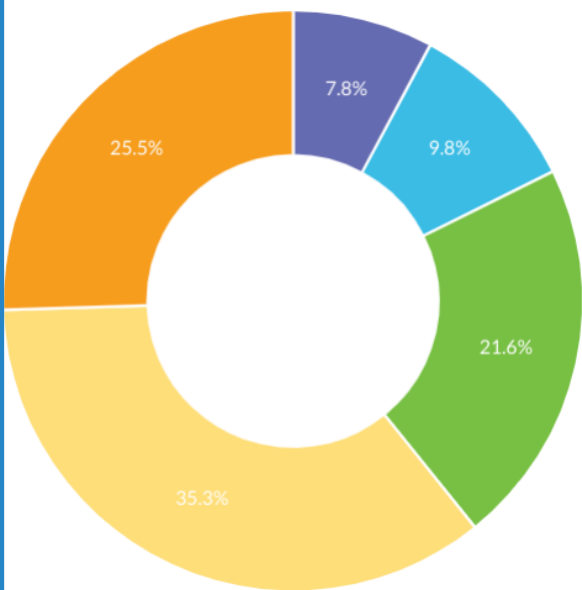

## Q1. What is your age?

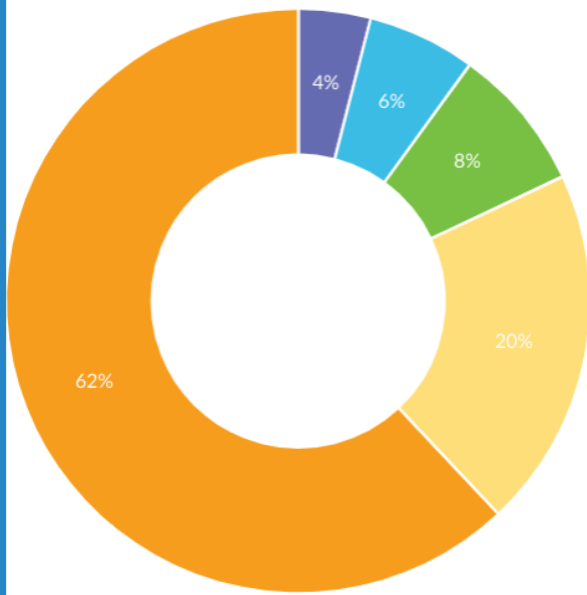

Choice	Total
Under 16	0
16-18	0
18-24	1
25-34	4
35-44	14
45-54	15
55-64	9
65+	7

## Q2. How big a threat is climate change to you and your family? 1 being no threat, and 5 being biggest threat.

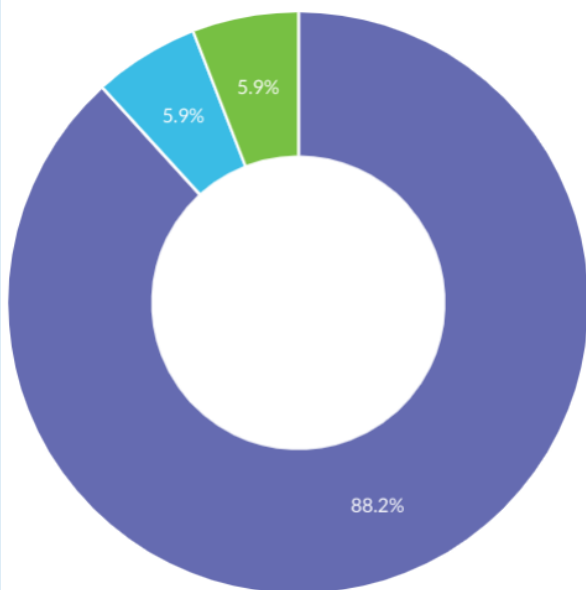

Choice	Total
1	4
2	5
3	11
4	18
5	13

**Q3. How big a threat is climate change to people around the world? 1 being no threat, and 5 being biggest threat.**

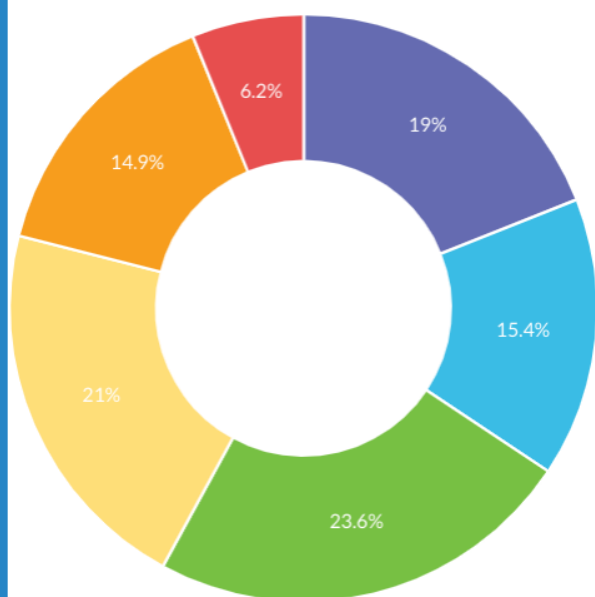

Choice	Total
1	2
2	3
3	4
4	10
5	31

**Q4. Do you think that more needs to be done to combat the harmful effects of Climate Change?**

Choice	Total
Yes	45
No	3
Unsure	3

## Q5. Which climate issues do you feel strongly about? Tick all that apply

Choice	Total
Transport	37
Food	30
Waste	46
Energy	41
Biodiversity	29
Other	12

## Q6. What local solutions do you feel could be implemented to tackle those climate issues?

Better transport links that makes commuting easier

Better parking so that local shops are used, rather than shoppers driving miles to shop elsewhere.

Draw a line immediately on expansion of wind farms. Invest in a properly integrated transport service Tackle the problem of waste management

Lobbying our govts +++ And educate the public as to what is actually going on here and get these poisonous activities stopped ASAP!

Transport links, connected walking routes, increase recycling facilities, clothes recycling opportunities

Locally around strathaven funds could be raised to fun local biodiversity creation, such as funding the creation of hedges & small scale woodlands on the land of willing farmers/land owners, as well as wetland creation.

Educate people on how to reduce waste and encourage them to buy more ethical products

Transport; cut speed limit in Strathaven to 20mph. Local community bus. Completely one way the Common Green and approaches. Make bus station in Common Green more weatherproof and thus more user friendly. Keep up the good work with the bikes. Pipe dream I know but a bypass. Energy; hard one to do much about locally, but lobby our elected representatives to push for increased use of renewables etc. Food and waste; keep up the good work with local businesses. More publicity possibly in echoes about better/longer use of clothing, household goods etc, discourage hyper consumerism. More bins in public places like the Common Green and the park and regular uplifts. Try to do something about tipping household and business waste in and around Strathaven.

Community bus to Glasgow (aware it is under discussion) Keep green pastures for farming or we will not have food to eat!

Improved public transport to a high enough standard in terms of cost and reliability to move people away from car dependency.

More crop farming in the area instead of meat and dairy. More education on how bad it is for the climate and the amazon.

Improved walking and cycling routes between communities like Strathaven and Stonehouse Improved safe walking and cycling routes to school with 'walking buses' etc Extend e-bike hire with low cost options Better bus service running to Glasgow (post covid commuting) Increased home delivering by e-bike from local shops Improved energy efficiency in homes (advice and grants) Sale of locally sourced food in local outlets e.g. regular farmers market Ban on plastic products and wrapping for take-a-ways. Make Strathaven leading town with with plastic free take out! Do more to promote Love Local, buy local, buy social enterprise, local loyalty card Initiate action plan and solutions with local school children

Domestic Planting of Trees and Heathers - creation of a Nature Reserve for visitors and carbon capture - micro electricity generation from the the Strathaven burns - green advice clinics (electricity, insulation, food) - walking school bus - local boot fair - good connection pathways avoiding the roads across the Town - road messaging to encourage passing commuters towards green driving - Community COP to use as a focus to challenge local businesses and organisations towards low carbon behaviour

Less single use packaging. More regular and reasonably priced public transport.

Shuttle bus to Glasgow to save taking the car?

Improvements/creation of local cycling routes Public awareness, engage more with children and young adults Encourage recycling rather than taking things to the dump

Better public transport

Anti littering campaigns, awareness of how to make better choices when shopping and packaging. Waste Water contamination with cleaning products and better alternatives

Insulating homes Switching to electric transport Food from local suppliers, avoiding factory farmed products Tax flights ...and plastics Change domestic heating to renewable carbon zero methods like solar, heat pumps, passivhaus standards. Repair, recycle and reuse more appliances. Stop selling useless trash we don't need

Better local public transport Better local walking and cycling lanes Farm to consumer goods (zero mile fruit and veg). We have some zero mile egg and milk locally which is great. Ban of plastic bags and single use plastics. Bartering goods

Local transport to city centres Solar panels Reduce energy use

Reduction in traffic pollution Encourage reuse / recycle Local produce Replanting green area Less concrete

Shop local. Public transport having a better service.

car share shopping local trainline extension cycle friendly roads/pathways electric bike charging stations allotments rewilding garden share

Bus to Glasgow and Retrofit

Reinstating a train service from Glasgow to Strathaven (fantasy I know), to make commuting without a car more viable. Would also be good for the local economy. More substantial electric car charging facilities. Community allotments. Domestic wind turbine financial support for those who wish to go down this route.

Local energy planning

Better connected public transport. More frequent cardboard and glass bin collections

Shared transport, more electric vehicle initiatives, cutting down on plastic packaging

Improve public transport links and make them user friendly. Ban wood burning stoves

Better transport links for working people. Less plastic packaging in shops. Stop building new houses and taking away habitat for wildlife.

Encourage walk to school (walking taxi/train?) Teach waste at schools, so children can educate the adults (still far too many not recycling). More info to all households on what NOT to put in recyclable bins. Glass recycling should be separate.

Provide public transport options that work for people, provide maximum active travel options that work for people, provide car sharing system that works for people, provide correctly insulated homes for people, educate people on all the things that they can do to help individually and together(include growing their own and the community's food), engage with as many people (and especially young people) as possible to expand the activist force, create low emission delivery services for the local businesses, lobby the local politicians demonstrating that unless climate change is mitigated else that they do is for naught

Better public transport links; Local food markets; Support for zero mileage goods.

None, Man made climate change Is the greatest scientific fraud in history. Even if it were true, only China & India could make any meaningful difference.

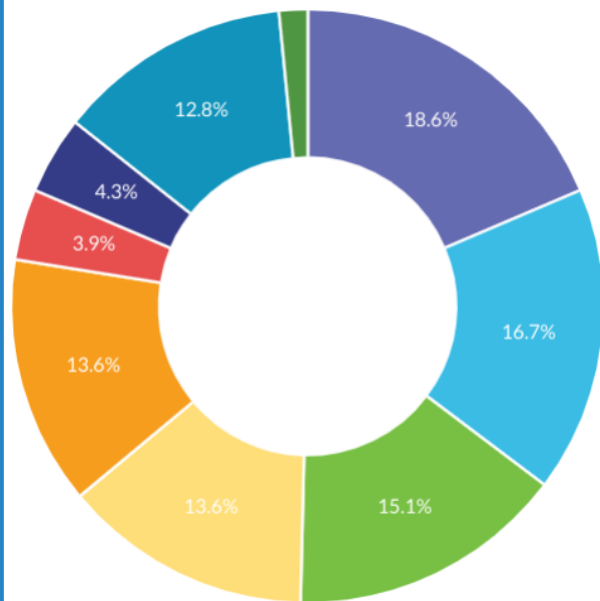

Not sure

I don't know it is hard to say

More encouragement to shop/source local. More food growing projects/education. More electric vehicles.

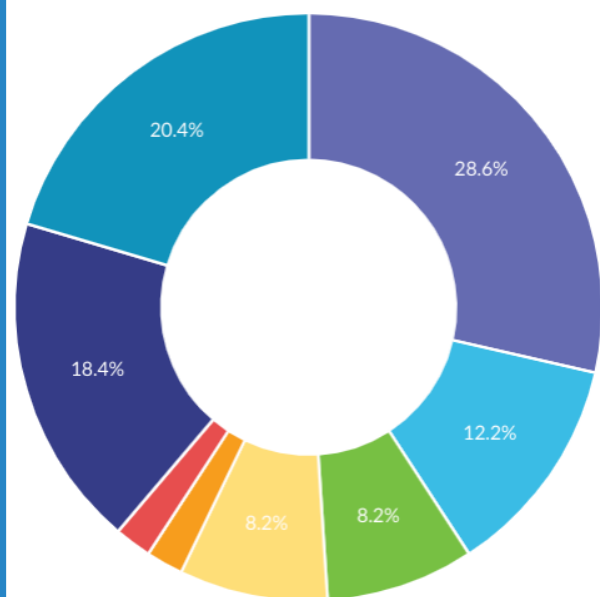

Food waste. Better recycling systems.

## Q7. Which of these Climate Action Strathaven services are you aware of? Tick all that apply

Choice	Total
Bike Repair Shop at The Town Mill	48
Strathaven Car Club	43
eBike Hire Scheme	39
Second-hand Bike Sales	35
eCargo Bike Delivery Service	35
Retrofit Strathaven	10
Community Fridge	11
Community Bus service	33
Other	4

## Q8. Which of these Climate Action Strathaven services have you used? Tick all that apply.

Choice	Total
Bike Repair Shop at The Town Mill	14
Strathaven Car Club	6
eBike Hire Scheme	4
eCargo Bike Delivery Service	4
Retrofit Strathaven	1
Community Fridge	1
Community Bus Service	9
Other	10

## Q9. If you have used any of these services, please share your experience below.

Nike repair was fantastic

See previous comment.

None of these services have any purpose for me as an elderly person living outwith the town

The shop is superb.

It was really useful to try out an e bike. I have an unpowered bike but use it mainly for leisure. Trying an e bike confirmed to me that they have potential to be used in place of shorter car journeys. The shuttle bus to Glasgow was fantastic. I would definitely use it to commute and for shopping/leisure trips- I think it is an absolute must for Strathaven.

Great having the service locally, but the limited opening times make it difficult to use. Also signage isn't great and initially hard to find & get in touch. V grateful to have it locally though!

Very good

Festive community bus service to Glasgow. Brilliant. So easy, efficient and great times.

Never used them

Everything that CAS is trying to do is just what is required - but there still needs to be even more and they need to work harder to engage the local population even more

We absolutely loved car club experience. The only downside was that one of the tomes in the morning car didn't open and we had to call support which took about 10 minutes to resolve. Knowing that it could happen now we plan our journey with that extra time.

No, I avoid the woke, climate, nutters, at all costs

Got the kids bikes fixed for free - great service and good to know their bikes are no safe to be ridden

I will try and use local services where possible

Shuttle bus to Glasgow was so easy to use and was relaxing too. Bike to repair puncture 👍😊

Great did the job for a reasonable price

Car club was really useful when our children came to visit

Very handy to have local and free bike repairs. It encourages increase use of bikes

Fantastic

purchase of a used bike exceleent advice

great

great

# Q10. Have you attended any Climate Action Strathaven meetings or events? If so, please share your experience. If not, please share why not.

Yes, many, they have been friendly, helpful, interesting, challenging, informative and always finish with a call to action - which I try to answer

Attended clothing sharing event. I believe it is good way to educate people that not only new items from shop, but good quality second hand items can refresh the wardrobe.

No, and I never will. You lot are insane.

No, they are not at times that suit me or about topics that interest me

No

No I haven't. No time to attend

Recent seminar about food and drink prior to COP

I live in a rural area

Yes - all very positive - but a need to get out door to door with help and messages to plant a hedge, switch electricity to green tariff

I wasn't aware of them. Maybe use of the FB page to advertise these?

My partner has. Been and says it was very useful and you're going in the right direction 👍😊

No

Don't want to be in a crowded room

Yes all the events in climate week except the fundraising workshop. Also marched at COP26.

They are very valuable events. It could and should somehow be better promoted with local population, with the support of all local shops and trades. Facebook is unfortunately full of negative comments and not a constructive platform often. The WhatsApp group is difficult to follow conversations when people with less involvement drop in and out to read messages. Perhaps some working group restructuring would help provide structure and increased support from the local residents/members. If people are incentivised there may be increased input.

No, haven't seen meetings advertised

No. I live outwith the town and would be unlikely to attend such meetings

Yes, attended one meeting. Had trouble hearing speakers. Venue was too cold for me.

No, recently moved to area and unaware of meetings etc

I work in ayr and haven't had the time to attend any

I only found out about CAS today and I am not a local.

Not aware of many and I find protests humiliating and these events tend to gather people who do not understand what they are protesting about!

No Not aware of times/venues

Been told from numerous people that it's not welcoming for vegans / vegetarians. Told that meat farmer was giving a talk... Really he should be being educated on climate change instead of educating others. It doesn't make sense.

Family member has attended (zoom and in person)

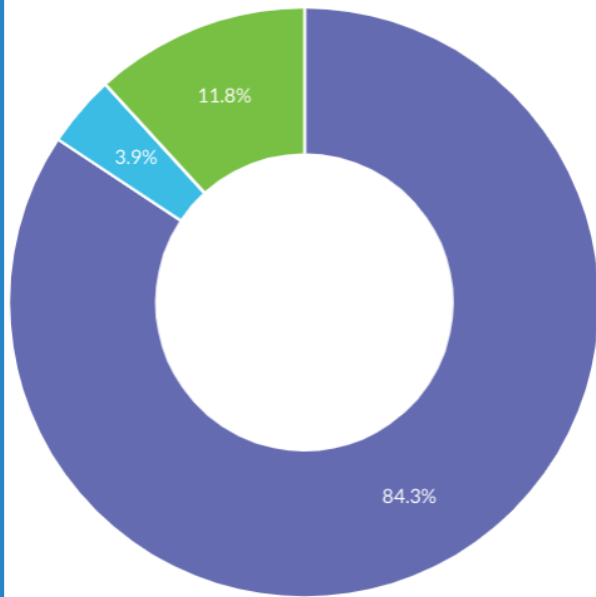

No, felt a bit uncomfortable about coming along. Was unsure what format would be and what expected of those coming.

No. Was unaware of them

Quite a few. Very well organised and extremely interesting and helpful

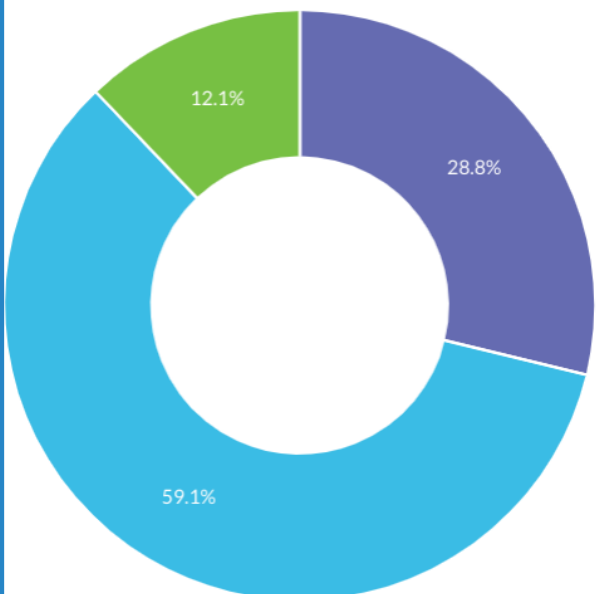

## Q11. Climate Action Strathaven are working to launch a direct coach service from Strathaven to Glasgow. Do you think this service is needed?

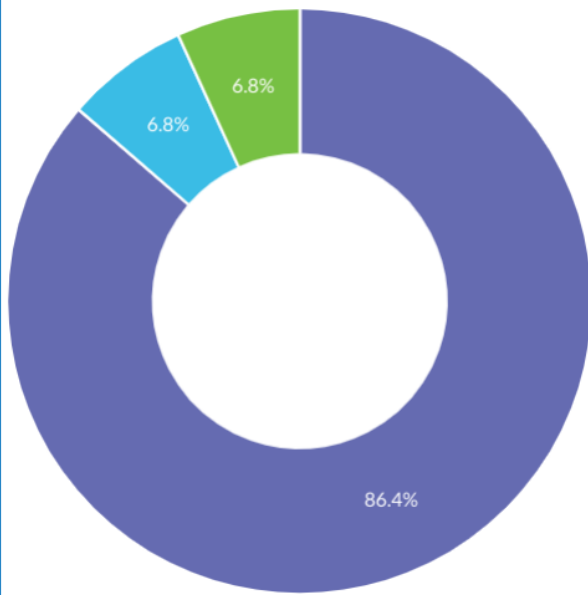

Choice	Total
Yes	43
No	2
Unsure	6

## Q12. For what purpose would you be likely to use a direct coach service to Glasgow? Tick all that apply.

Choice	Total
Commuting	19
Leisure	39
Other	8

# Q13. If you currently use your car to travel into Glasgow, would you be willing to switch to a direct coach service if it was faster and cheaper than taking the car?

Choice	Total
Yes	38
No	3
Unsure	3

# Q14. If you would be likely to use a direct coach service to Glasgow, what running times would best suit you?

Weekends

To fit business hours. Early mornings and 4/5pm

Daytime

Mid morning and mid afternoon

Mornings and evenings

N/A.

Unsure

Mid morning into Glasgow and mid to late afternoon return.

For Leisure - Saturdays, early afternoon / early evening

It needs to be frequent - preferably hourly, and needs to run early on weekdays 0630 or 0700 start. For commuters the last bus should be 6pm (to give time to get from work places in other parts of Glasgow). But a later service especially on Fridays and Saturdays would be great for leisure.

12 - 12

Daily community - Leave about 07 30 and return about 17 00

If using for commute would need to be early e.g. 7am for an 8am start in Glasgow. Leisure at the wknd open to anytime. Return week day after 4pm, weekend same or 7pm

6.30am. Return 4.00pm

Various

Late morning and early evening.

07.00 returning 17.30

I start work at 9am and finish at 7pm. So long as I would be able to make it into work, the rest is just icing on the cake.

7.30am approx. to Glasgow. 5pm approx return - weekdays.

Any time

I can be flexible but mid morning in and late afternoon back would probably work best for me

7:15 and 8:00 to Glasgow and 16:15 and 17:30 from Glasgow

None

Mid morning- late afternoon/evening

I might use on a Sunday but rarely go into Glasgow at all these days

Anytime

For leisure purposes a bus arriving in Glasgow around midday on a Saturday would be great

I don't really have set times as I don't often go to Glasgow but weekends would be more likely.

Leave Strathaven between 9 and 10 am Returning from Glasgow between 2 and 4pm

would have to be early to allow 8.30 starts

Between 10am-6pm

Once a week either week day or weekends

Peak times

07:00 - 21:00

Variable

N/A

Early morning, evening. Reduced timetable on Saturday probably.

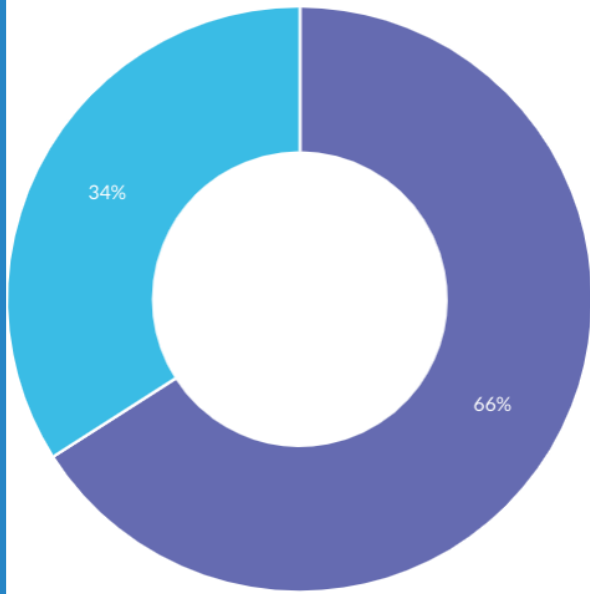

Saturday and Sunday

Weekend

in at 8, back at 4

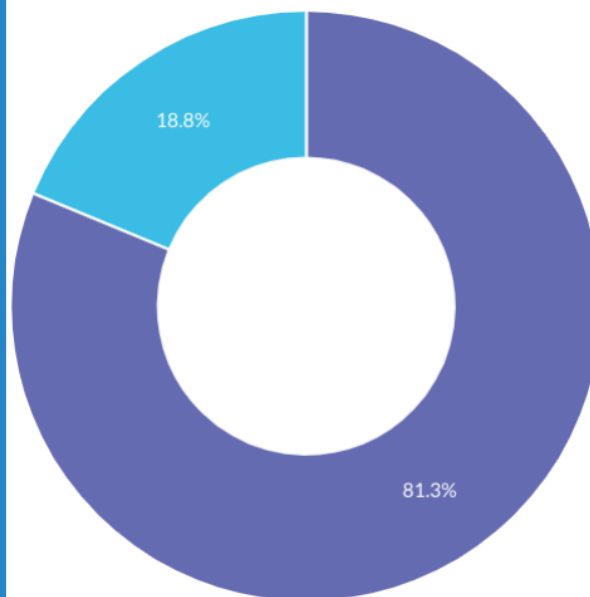

in at 7.30am, back at 5.15pm

# Q15. Would you choose to have your shopping from local retailers delivered through our low carbon electric cargo bike service?

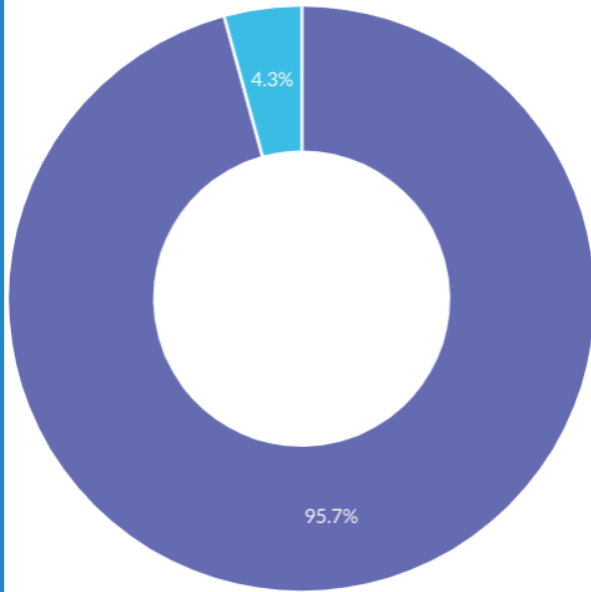

Choice	Total
Yes	31
No	16

# Q16. Would you like to be able to shop online and access numerous local businesses products that would then be delivered on the electric cargo bike?

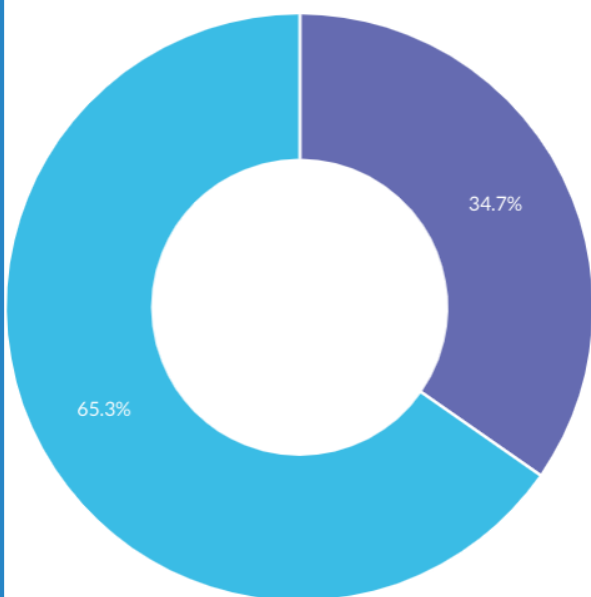

Choice	Total
Yes	39
No	9

## Q17. Do you run a local business that could benefit from our electric cargo bike delivery service?

Choice	Total
No	45
Yes - please share the business' name	2

## Q18. Would you be interested in getting involved with Climate Action Strathaven?

Choice	Total
Yes	17
No	32

# Q19. Please share any other comments about climate change, or what Climate Action Strathaven could or should be doing:

Promote re-cycling in all sorts of ways.

I am happy to learn about Climate Action Strathaven through the Strathaven pages on the internet and from the local papers

I think you are doing an amazing job. Thank you!

I come close to despair when I think of how we humans have treated the planet. Education and publicity from Climate Action Strathaven please, as much as possible. Get into schools on a regular basis.

Getting the bus running is an absolute priority. If the service is good enough it could significantly lower car useage and coupled with a car sharing facility could facilitate reduction in car ownership.

Great initiative and fabulous to see. More user friendly, brief social media posts would be good. Helping people learn how to be more efficient within own home and encouraging this.

Local energy planning

Most everything you propose locally will be negated by the continued building of executive homes with multi car ownership in an area which currently has few local job opportunities and pitiful useable transport links

Never give up - the planet's future depends on organisations like CAS

Since we moved to Strathaven we absolutely love the idea of Climate action Strathaven. I believe it made a big change to the local community.

Man made climate change is the greatest scientific fraud in history. Even if it were true, only China & India could make any meaningful difference. Wokeness is a cancer.

Nothing everything seems okay just now the way it's working and well done to all the people involved

CAS are doing well, just vontinue to raise awareness however possible. I said no to deliveries of shopping from the e-cargo bike as I live locally and enjoy walking about where possible.

I feel very strongly on the issues surrounding power generation. I do not accept the arguments for wind power. The high accumulation of wind turbines in this area has had and continues to have a hugely detrimental effect on our carbon footprint. I'd like to see more emphasis on solar panels. A fraction of the huge subsidies applied to wind "farms" could be employed improving domestic insulation and incentivising use of solar power

greater Facebook and public mobilisation and more and direct conversations with households. forgot in the ideas section water meadow (bog) creation in Castle Park

I couldn't comment when I'm not fully aware of what's being done already.

Keep going and bring and use the ideas

Well done with everything achieved so far. As not everyone has access to Facebook or emails it might be good to have a monthly round up column page in the Strathaven Echoes/ EK news/ Ham Ad promoting events and reminding everyone of the ongoing services available.

Putting more pressure on local and national governments to take action!

See previous. I think perhaps publication of budget and actual expenditure to those involved with CAS or to CAS members will provide greater transparency if not already done. The group does a fantastic job. Local residents interested in participating may find it motivating to understand each working stream, objectives and financials (target, actual etc) and get a way to contribute further.

Creating more awareness of climate change impacting our planet. Although she is much more powerful than us. Maybe she is already taking matters under her control.
