

How To Receive a Gate Code in the iPhone App

- 1 Log into the app. When you get to the Home Screen, click the Gate Code tab.

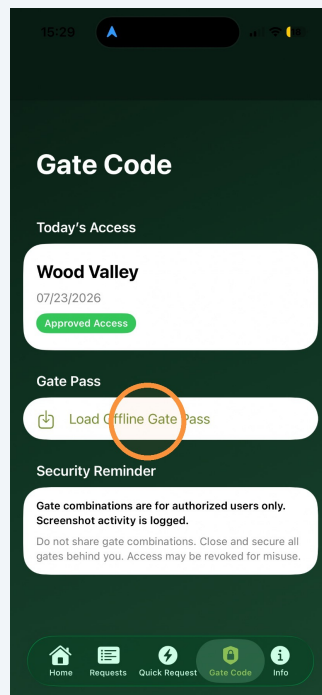

2

There must be a request under 'Today's Access'. If there is no request there, that means no approved gate request was submitted at least the night before.

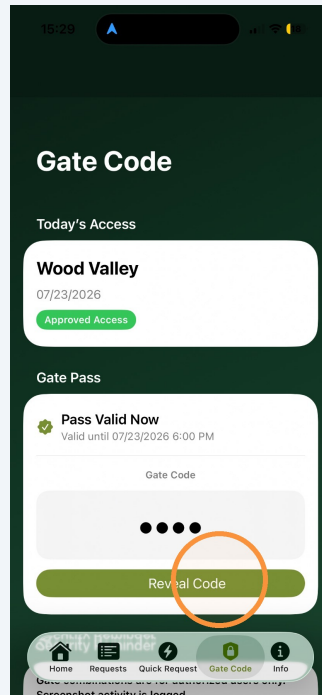

3

Once you are on this page, click Load Offline Gate Pass

4

The Gate Pass will allow you to reveal the code only when you have an approved request, and during the hours that the gate is open. When you see "Pass Valid Now", click 'Reveal Code'

5

The current gate code will appear.
