

ESPRIT-AI.COM
INVISIBLE. DEMENTIA. CARE.

What I love about the system is that it preserves my privacy with no cameras

Who is ESPRIT-AI?

The pandemic has put a spotlight on the acute shortage of staff in long term care and assisted living facilities around the world. We believe the way care is provided for our growing senior population needs to drastically improve and we believe that smart technology solutions will enable this change. Better care and reduced stress levels for staff and the care team are now non-negotiable.

Smart sensors, together with use of Artificial Intelligence (AI) have the ability to augment your care team and act as personalized invisible caregivers that sense when your most vulnerable residents need assistance. Having personalized intelligent insights in the hands of your care team will not only provide proactive care but also will help alleviate stress and burnout of staff.

Esprit-ai Sense provides the care team with real time, personalized insights for residents in need of assistance when they need it. Esprit-ai Sense monitors only motion and does not use wearables or invasive cameras. Esprit-ai is easy to use, highly customizable and integrates with your existing workflow.

"Esprit AI lets our staff know when residents are up in the middle of the night or when they have fallen. This not only minimizes distractions for other residents but also allows us to respond quickly and provide personal care when and if needed"

Robin Meyers - Director Community Support at Carefor

Benefits for Care team

- ▶ Enhance operations efficiency
- ▶ Enable rapid responses via individualized alerts while not impacting other residents
- ▶ Peace of mind that normal routines of staff and residents are occurring
- ▶ Say goodbye to false or missed alarms
- ▶ Know the quality of sleep of your residence

Benefits for the Resident

- ▶ Preserve dignity & independence
- ▶ Live better, healthier and safer lives
- ▶ Peace of mind that help will come when needed

Benefits for the Corporation

- ▶ Reduce harm to residence by detecting wandering immediately
- ▶ Augment your staff at a reduced rate
- ▶ Increase staff satisfaction and reduce burn out
- ▶ Differentiated care from the competition

Benefits for Family & Spouse

- ▶ Peace of mind that your loved one is safe
- ▶ Relax without worry of "what-if- I- did - not- hear"
- ▶ Stay engaged & connected with your loved ones anywhere and any-time

Key differentiators of Esprit-ai

Customize to Individual Resident's Needs

Highly relevant resident alerts are specific and meaningful. Esprit-ai Sense offers the most comprehensive resident messaging alert service on the market. Our messages are timestamped and topical; they contain important room specific information such as when a resident got out of bed and back into bed (or not) in the middle of the night.

Minimal Learning Effort

As sophisticated as Esprit-ai is, your staff will be up and running in no time. Following a consultation to configure Esprit-ai Sense to reflect your residence's workflow and the specific needs of your residence.

Set and Forget

Esprit-ai Sense is 100% automated and operates in the background 24/7 with no manual involvement required. After a brief initial setup, run your operations with confidence, knowing your staff are getting highly relevant, personalized, messages when residence need it the most.

Works Seamlessly With Your IT Infrastructure

Esprit-ai Sense connects seamlessly to your corporate intranet over Wifi and does not require anything special from your IT department. Further, Esprit-ai Sense does not collect or store Personal Health Information (PHI).

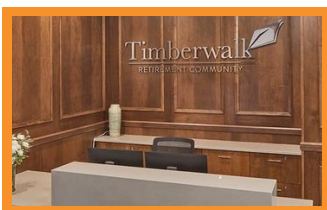

Customer Quotes

Willowbend Retirement Community

"Esprit-ai has been an essential part of Willowbend team in fall prevention. Their professionalism and their individual approach to the resident is exceptional."

- Chantal Lebel, Director of Care

Timberwalk Retirement Community

"Unlike a typical bed alarm, the esprit-ai system can be tailored for the specific requirements of each resident. After using esprit-ai's monitoring system with a number of residents, with varying needs, I would recommend their system to any care provider."

- Amy Maika, Director of Care

Richmond Care Home

"It's fabulous. It has really done a lot for us here in terms of being able to support residences and the staff has told me, please don't take it away."

- Robin Meyers, Director Community Services at Carefor
