How to use Chalk Paint Wax

[Click Here to Watch the Above Video](#)

Waxing painted furniture is easy - follow Annie Sloan's top tips for applying Chalk Paint® Wax and able to enjoy a finish that will last and last.

- 1 Before you start waxing, paint your piece of furniture, working your brush every which way. You don't want to apply too much pressure. What you're aiming for is even coverage.
- 2 Allow the paint to dry.

- Using an Chalk Paint® Wax Brush or a lint-free cloth, apply Chalk Paint® Wax. Work in large areas, sweeping the wax over the paint.
- You are aiming to cover every bit of paint. Check that you haven't missed any sections. Go over them with wax, if so.
- Using a lint-free cloth, go over the waxed surface quite lightly in order to remove any excess wax.
- *Optional** If you'd like a polished finish, leave your piece overnight and buff the wax the next day with a clean, lint-free cloth.
