

SUPERPOWERED AI™

SuperpowerED AI™ aims to integrate “human superpowers,” defined as intellectual, physical, cultural, social-emotional and intangible inner gifts that only humans possess, to empower the use of AI in K12 settings in equitable, ethical, and powerful ways. SuperpowerED AI is backed by neuroscience, psychology, and educational research to support educators in K12 settings with integrating educational technologies in ways that support holistic and healthy child development.

What we offer:

- Professional Development Designed for K12 Educators
 - Virtual Courses on AI and Data Literacy
 - In-person, hands-on workshops on AI and Data Literacy
 - Curriculum tailored to your specific needs
- Consulting
 - Meeting with leadership to define needs and strategy for the integration of Artificial Intelligence
 - Providing guidance on navigating policy and everchanging educational technology landscape
- Educational Resources
 - SuperpowerED AI Framework tailored for administrators, teachers, families, and students
 - SuperpowerED AI Curriculum Resources to support AI Literacy (prompt libraries, activity cards, games, real-life applications etc.)
