Pantry Pest Owner Prep Sheet

The success of your pantry pest treatment will be dependent on the following instructions. Proper preparation before treatment, and your follow-up post treatment, will determine the success of your pantry pest issue. Failure to follow the directions can void your warranty.

*Warranty is 30 days from the initial treatment since pantry pests can be brought back into the structure. Service includes initial visit and one follow-up appointment one week later.

1. Pantry Pests, (moths, weevils, beetles) primarily infest dry foods in your pantry. Dry food examples are rice, beans, dog food, cat food, crackers, cookies, etc.
2. All dry foods that are infected need to be removed from the property.
3. Remove all items from your pantries and drawers according to the technician's request. This variable is dependent on the type of pest infesting your kitchen.
4. Vacancy of the property may be required depending on which pantry pest is present. The technician will inform you if your vacancy is required.
5. Do not wipe down interior of pantry surfaces with any types of soap within 48 hours unless directed otherwise by your technician.
