

EcoGrill

MADE IN LATVIA

Description

EcoGrill is the best solution for cooking outdoors. Made from highest quality alder wood and alder charcoal, it uses eco light-up element which requires only a single match to start. Unique design that have two international patents, allows it to start up fast without using any chemicals which could ruin your meal with a terrible taste.

Use of only natural products will make your meal taste like you have cooked it on open fire – great and natural. Just much easier and wherever you want it.

Packaging

Single EcoGrill is packed in a shrink wrap with a label around it.

On pallet they are put in layers, with cardboard separating every layer and keeping the pallet together, avoiding scratches.

Finally, pallet is wrapped in plastic

Benefits

- Handy
