

# SPACE DOWN UNDER LLC

PO BOX 14711 PORTLAND OR 97293

(503) 232-5876 CCB#185409

## **CLIENT INFORMATION**

Each home and project is very unique, from the style of home and how it was constructed, to the owners requirements of the completed project, all of which affect how each project is approached.

Please take a few moments to provide some information about your home and your specific goals/desires for your project so that we can provide a unique strategy to accomplish those goals.

We like to communicate during the early stages with the architect and engineer so we can help create a smooth running project, we have found that working with these professionals in the early stages we can assist in providing sound structural ideas as well as decreasing the possibility for potential changes during construction and the additional costs associated with those changes.

Date:

Name:

Address:

Tel #:

Email:

Job Site Address:

We can arrange an Architect and Engineer, if you have either onboard already please provide contact info below.

Architect:

Contact Person & Phone number:

Engineer:

Contact Person & Phone number:

Age of Home:

Style of Home: (i.e. Craftsman, Victorian etc)

Approx square footage of home:

Approx square footage of property:

Does the home have a chimney/multiple chimneys, are they located on the exterior or interior?

Existing foundation/basement conditions: (i.e. crumbling foundation with 6' ceilings, *or* crawlspace with small stem wall foundation, brick foundation...etc)

Who will be responsible for obtaining permits for this project?

Space Down Under is also a member of the FIR program which may be an option for your project.

Children and pet safety:

Please keep children and pets away from work areas at all times, including construction trenches and the debris pile.

We do \_\_\_\_\_ /do not \_\_\_\_\_ have a pet.

Specific information concerning pets:

Please provide a brief summary of what you would like to accomplish through working with us on your project: (i.e. replace old foundation to allow for 9' ceilings, install in-floor radiant heat, new basement to be utilized as an art studio with bathroom and small kitchen area ...etc)

Any additional information that would be useful to know about your home, or any personal needs or requests to take into consideration when forming a strategy for your project?

THANK YOU!
