

# THE SIGN

SPACE CYBER  
SECURITY  
INSIDER

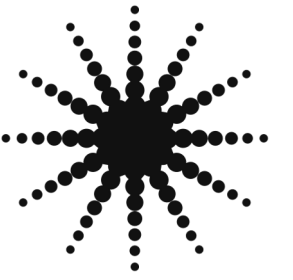

## THE SIGN MEDIA PROVIDES SOLUTIONS FOR INDUSTRY CHALLENGES:

Experts lack a unified platform for monitoring news on space security issues such as space warfare, cyberattacks, policy developments, and updates on collaborations and contracts within the space security and cybersecurity domains.

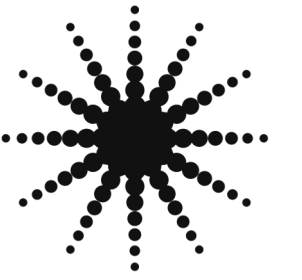

Currently, much of the space security information is communicated with a scientific and government oriented vocabulary making it complex for the average reader to follow.

There is an increasing need for experts to communicate with a broader audience, as space security and cybersecurity are no longer closed topics for specialized professionals. Recent incidents, such as the cyber attack on CYSAT in February 2022, highlighted that the victims of space-based cyberattacks are often civilians rather than military entities.

THE SIGN MEDIA INTRODUCES A NEW APPROACH TO WRITING AND DISCUSSING SPACE SECURITY AND CYBERSECURITY ISSUES IN A COMPREHENSIVE MANNER FOR A NON-TECHNICAL AUDIENCE

With the global objective of preventing cybercrimes, terrorism, and other security threats that stem from vulnerabilities in space and impact Earth directly — and vice versa — The SIGN aims to bridge the knowledge gap and foster greater understanding of how space security is crucial to everyday life and global stability.

Read articles, investigations, analyses, research summaries, exclusive announcements about product launches and events by space agencies, military & scientific institutions, and independent experts.

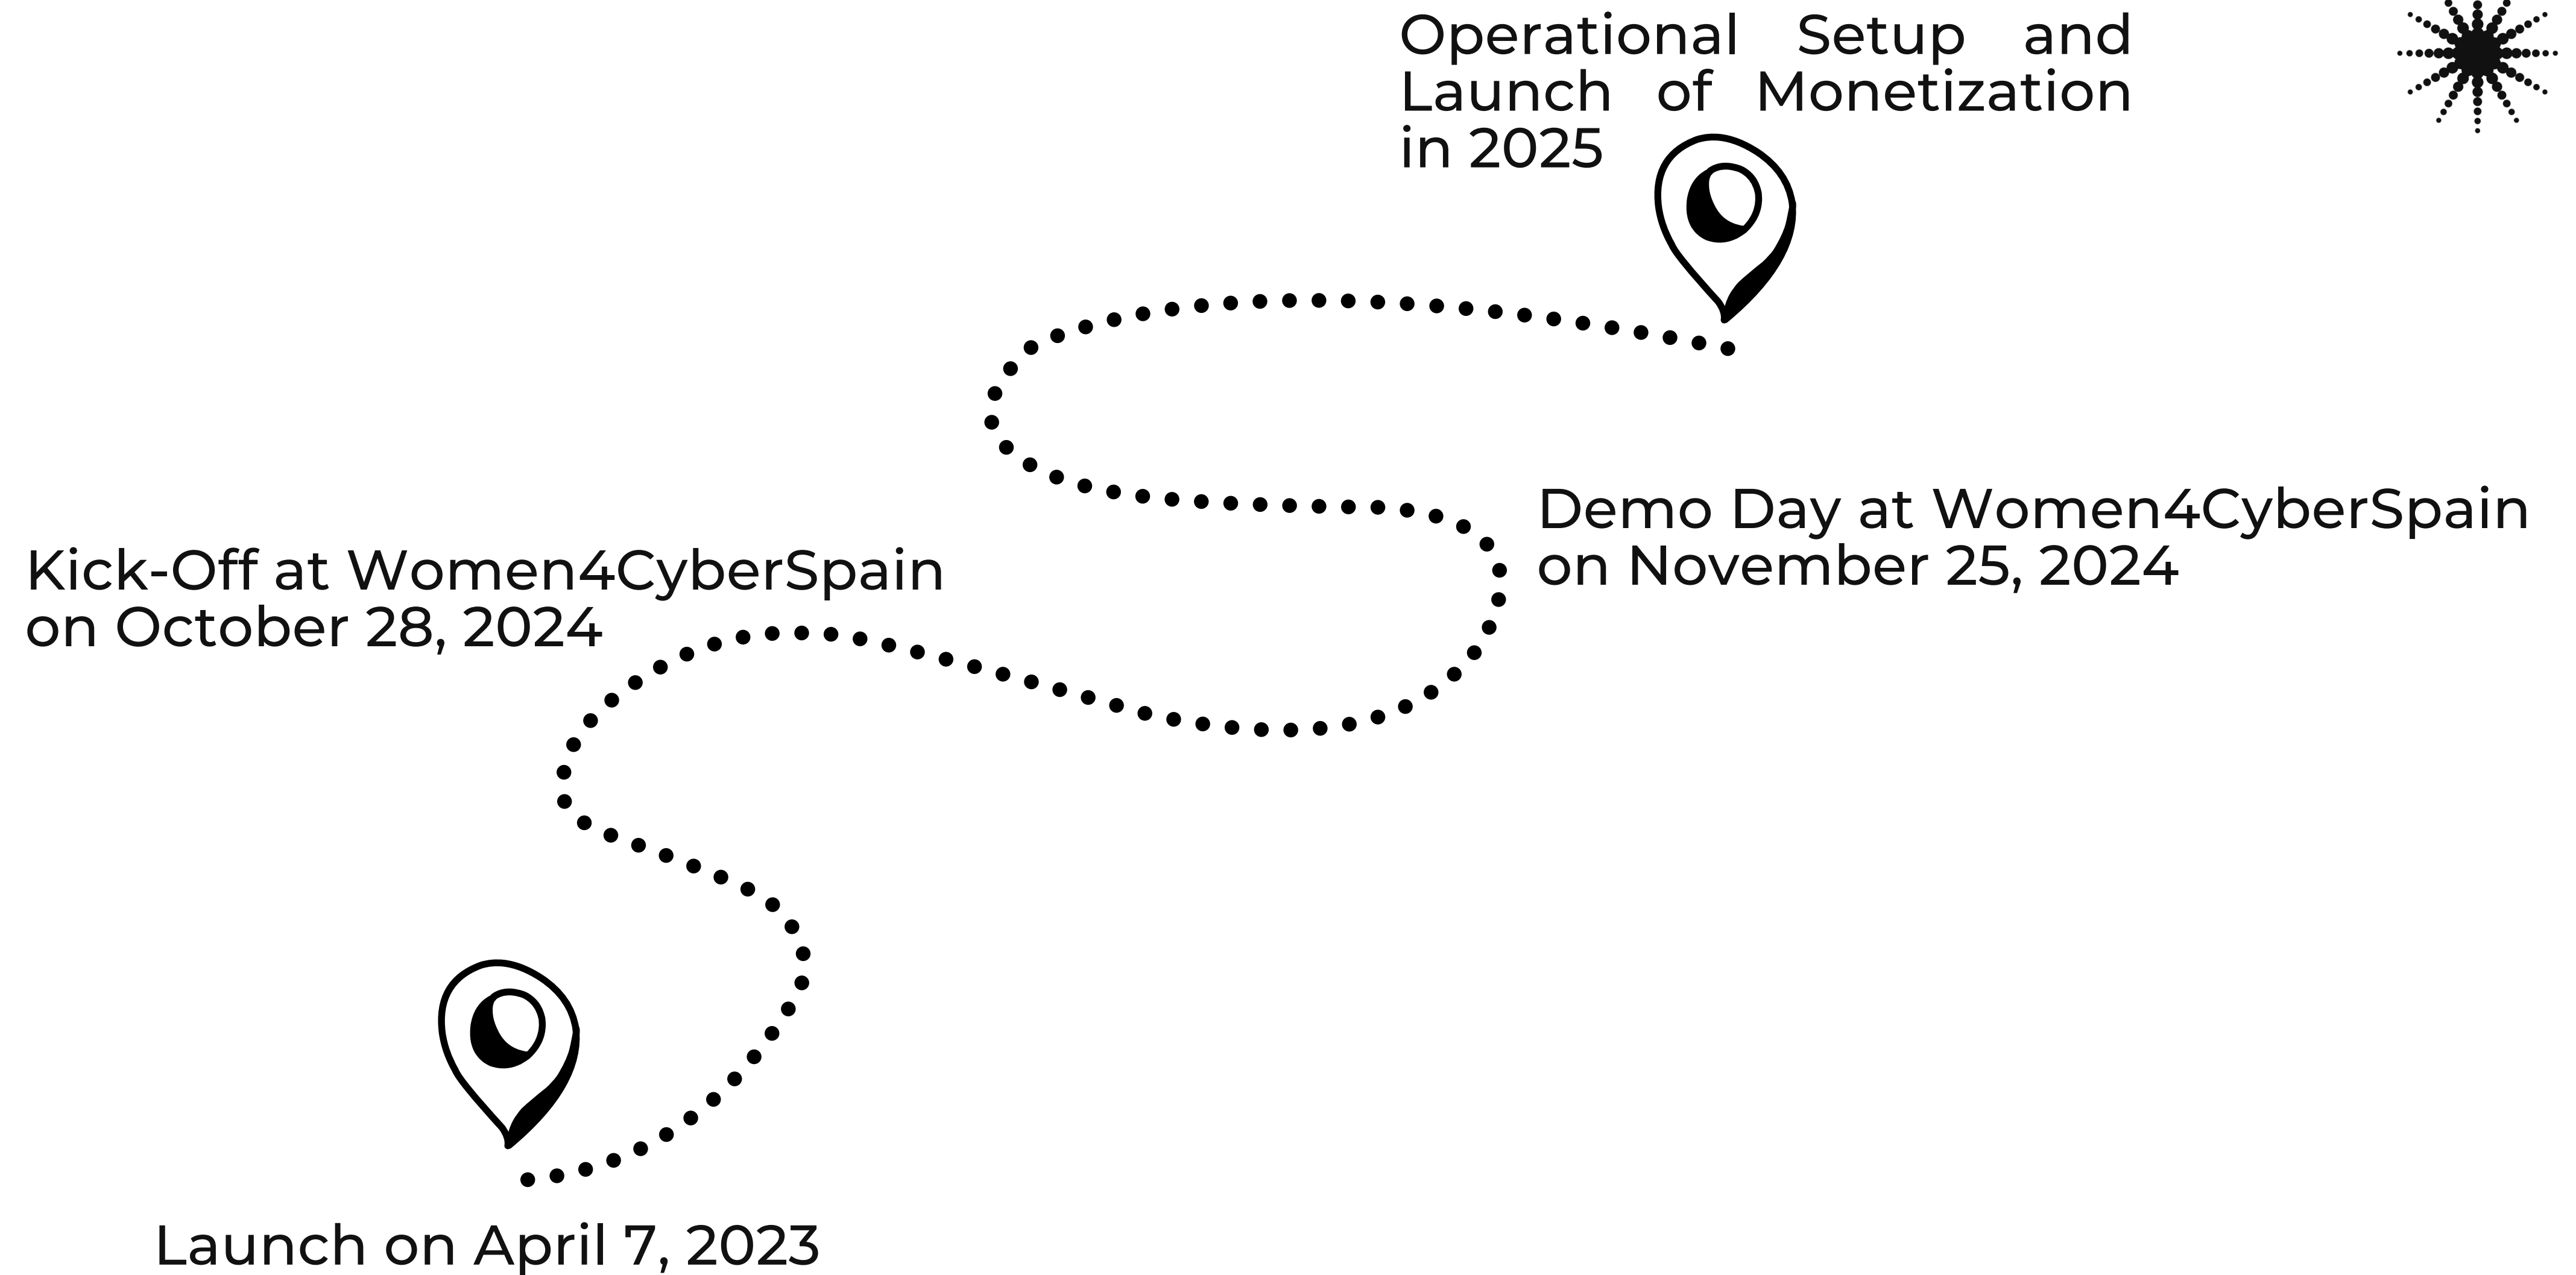

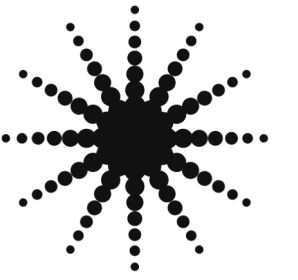

Watch interviews & Listen to podcasts.

Learn & track global trends in space cybersecurity, cryptography, and development of biotechnologies in soil-water and solar systems.

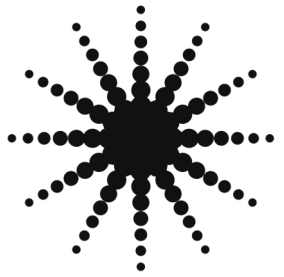

The SIGN MEDIA covers news and events from the USA, Canada, LATAM, South Korea & Japan, Africa, UAE, Middle East, Asia-Pacific region, Europe, and Ukraine, nowadays the world's cyber tech testbed #1.

# MONETIZATION OF THE SIGN.MEDIA:

## ADVERTISING

Sponsorship packages

## SUBSCRIPTION TO EXCLUSIVE CONTENT

Reports / Full versions of researches

## PARTNERSHIP WITH TECH COMPANIES

Paid access to patented technologies

## COMMUNITY EVENTS

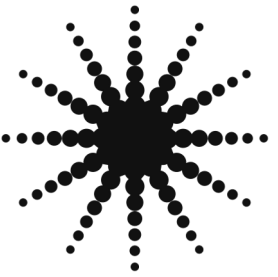

Experts meetings for limited number of attendees for:

- high-quality networking
- brainstorming/hackathons
- public announcements
- brokerage of the early-stage startups and technologies for investment funds

## MARKETPLACE

Online store with home goods and security gadgets
