

Lenny is trying to create a new password for his online gaming account. He has come up with the ideas below. Can you rank them in order from weakest to strongest and give reasons why?

Remember these password rules...

- Use more than 8 characters!
- Use a mixture of numbers, lower case and upper case letters!
 - Do not use your name or other personal details!
 - Make sure it is not easy to guess!

Password	Rank 1-6	Reason
