

## Our History

Melvin Cook started his experience in the job market during his high school years at Cone's Meat Market, located on the south end of Miami. It wasn't long before he started working for Foodtown, which was later Farrier's, and then Consumer's, as a full-time meat cutter. During his 30 years of employment as a meat cutter, he envisioned building a processing plant of his own. Thus, in 1985, Cook's Processing was born.

Cook's Processing is the only processing plant in Northeast Oklahoma that has successfully passed the new USDA regulations regarding a HACCP Plan, Sanitation Standard Operating Procedures Plan, Mandatory E. Coli Testing, Pathogen Reduction Performance Standards for Salmonella, and Salmonella Testing. By passing all the requirements and regulations required by the state, Cook's is legally able to sell meat to individuals, schools, grocery stores, and restaurants.

Cook's Processing has added several additions over the years to our processing plant making it totals over 4,700 sq. ft. that enables us to handle a higher volume and keep our processing prices the lowest in the country. Handling a higher volume has also made it possible to process the Delaware County and the Nowata County Spring Livestock Shows at the same time. Our three separate coolers, give us adequate refrigeration to keep deer in a separate cooler during deer season, thus allowing your deer to be properly processed within seven days.

Melvin and his son Kojak are proud of their clean facility, low prices, and having grown into what Cook's Processing is today.
