

Interested in Playing Collegiate Soccer?

Here at Coast to Coast Futbol Academy we believe that if an athlete aspires to play soccer at the collegiate level, they should be given the resources to try. We offer our guidance and help throughout your child's playing career to develop a profile for submission to college coaches. Erica, with a master's degree in teaching, has a decade of teaching and providing guidance for students who desire higher education. Chris has played and coached at the collegiate level and knows what it takes to be considered as a candidate for college programs. Together we have a passion for helping our kids grow.

In joining CCFA, we can provide a customized road map that fits the needs of each individual player. Families should start this process during the athlete's freshman year of high school. However, now is better than never! More details to come soon, but as always, feel free to reach out for more information.
