

How Can Anyone Say There Is No God?

How can anyone ever say that there is no God? This would mean that all the wonders around you are purely accidental. No almighty hand made over a thousand billion stars.

No power keeps them on their steady course. The earth magnetized itself to keep the oceans from falling off toward the sun. Infants teach themselves to cry when they are hungry or hurt. A small flower invented itself so that we could extract digitalis for sick hearts.

The top few inches of our land just happen to have topsoil without which we would have no vegetables to eat, no grass for the animals whose meat is our food.

No one put oil deep enough in the earth to keep until we need it. The wind which carried the delicate seedling to a fertile place was devised by us? The inexhaustible envelope of air, only 50 miles deep, and of exactly the right density to support human life, is just another law of “physics”.

The question remains: just who invented physics? Who made the bank deposits of coal, zinc, iron, and uranium inside the earth? Nobody; it was all just another priceless accident.

Water expands when it freezes while other substances contract. This makes ice lighter than water and keeps it floating on the surface. Otherwise, lakes would be solid ice down to the bottom all year and no fish could survive. Just who made this arrangement?

Why does the earth spin at a given speed without ever slowing up so that we have day and night? Who tilts it so that we get our seasons? No one really knows the why and how of the magnetic poles, but there they are.

Who put them there? How about the sugar thermostat below the human pancreas? It maintains a level of sugar in the human blood sufficient for energy.

Without it, all of us would fall into a coma and die. No one created it? The sun stokes a fire just warm enough to sustain us on earth, but not hot enough to fry us or cold enough to kill us. Who keeps the fire constant on the sun's surface?

What makes a light bulb light? Electricity? What is electricity? Who showed it how to travel at lightning speed, making right angle turns and twists on a piece of wire without flying off?

By the way, what is light and who invented eyes to see light? A young bird will migrate from Canada to Argentina; who showed it what course to take, how fast to fly, and why it must do this? Swallows return on a given day. What calendar do they use? Man has a conscience; but no animal has one. Who engineered this?

Where did the seeds come from for the first tree so that we would have shelter? Did someone devise fire to keep us warm? For countless centuries in countless places, the forests and the vegetation perpetuated themselves. Why did they not die of blight and flame and neglect?

Clouds bring rain and shade. Who taught them how to vaporize and to pick up fresh water and carry it to places which need it? Is snow just a winter decoration or does it sit on mountaintops waiting for the warm spring sun to melt it into rains needed for the streams and farms below? Why does it melt at just the right time for the young crops to drink?

A salmon will swim upstream to have its babies and die and will climb up fish ladders to do it. How does a salmon know that we need more salmon?

Why do eels swim all the way from European rivers to Bermuda to breed? And how do the little eels find their way back to Europe all by themselves? Who teaches a house dog to tear up strips of paper in a fluffy pile for puppies to be born?

The human heart will beat for 70 or 80 years without faltering. How does it get sufficient rest between beats? A kidney will filter poison from the blood and leave good things alone.

How does it know one from the other? Who gave the human tongue flexibility to form words and a brain to understand them, but denied it to all the animals?

Who showed a womb how to keep splitting a tiny ovum until, in time, a baby will have the proper number of fingers, eyes, and hair in all the right places, and come into the world when it is strong enough to sustain life? Who? These are just a mere fraction of all of the wonders of God's beautiful creation.

Is this all accidental? There are actually some people that say there is no God. How can anyone ever say this? Even though nature itself screams of the existence of a creator and sustainer, many choose to ignore these obvious proofs of the existence of God. **(Romans 1:20, Psalms 19:1, Acts 14:17)**

Inside every human heart, there is an empty spot that only God can fill. His creation is a way that the Lord begins to speak to us if we choose to listen and respond.

In **Hebrews 11:6**, the Bible tells us that we first must believe that God does exist and as we seek Him, He will reveal Himself to us. God's own arm brought salvation unto Him. **(Isaiah 63:5)**

Because the same Word that spoke this world into existence became flesh, we can now get to know our Creator who now has become our Savior. **(John 1:1,14)**

We read in the Word of God that God became flesh and dwelt among us. (I Tim. 3:16) Through His Name, Jesus Christ, we now can have redemption through His blood that He shed for us at Calvary. **(Colossians 1:14-15)** God so loved the world, that He got involved. **(John 3:16)**

We no longer have to live with that empty spot in our hearts. Only God can bring us true satisfaction. **(Psalms 145:16)**

God is ready to remove that stony heart and replace it with a heart that is responsive, tender, and open to God's love and influence. **(Ezekiel 36:26-27)**

Now we can actually have the Spirit of God Himself living inside of us when we are born again. **(John 3:3,5,7)** When we repent of our sins, that is, when we make a decision to turn our back on sin and commit our life to the Lord, and are baptized in the Name of Jesus Christ for the remission of all of our sins, we will receive the Holy Ghost. For the promise is unto all those who are afar off, even as many as the Lord our God shall call. **(Acts 2:37-41)**

The Lord is seeking worship and fellowship with His creation. God has always been in search of a people that would choose Him. Now we can know our Creator and receive the greatest gift of all, Eternal Life in the presence of the Lord. **(1 John 2:25)**
