## SCHOLARS LINE UP TO JOIN ANTI-‘WOKE’ ONLINE EDUCATION PLATFORM

[The Epoch Times](#)

Hundreds of scholars, including some distinguished figures, have applied for positions at an online education startup that promises explicitly non-“woke” instruction in a number of academic disciplines.

Named “American Scholars,” the project was started several months ago by Matthew Pohl, former University of Pennsylvania admissions officer. As soon as word got out, résumés started to stream in from academics offering their participation, its leaders said.

Pohl described the project as the fruit of his gradual disillusionment with his career in the academic world, where he drove admissions at several prestigious universities. He noticed that with regard to education, most students weren’t getting their money’s worth, attributing that to the “administrative bloat” of establishment colleges, as well as the spread of quasi-Marxist ideologies that have come to be collectively known as “wokeness.”

Several Brazilian states on Tuesday halted the use of AstraZeneca’s COVID-19 vaccine for pregnant women after a woman who had received the vaccine died, according to a report.

ANVISA, the countries’ National Health Surveillance Agency, recommended the “immediate suspension” of the vaccine for pregnant women in a statement issued late on Monday, without providing many details.

# RAND PAUL CALLS OUT FAUCI OVER WUHAN LAB INVOLVEMENT

[America's Citizen Press](#)

Washington, D.C. —

Dr. Anthony Fauci, the nation's top coronavirus "expert," testified in a Senate hearing today on the current state of the COVID-19 pandemic.

Among the committee members is Senator Rand Paul (R-KY), who is starting to gain a reputation for sparring with Fauci, attacking him on his support of post-vaccine mask usage, continued shutdowns, and more.

This time, Senator Paul was dead set on exposing Fauci's history with the Wuhan Coronavirus lab in China.

As Sen. Paul points out, the research is risky for a potential viral leak, as scientists were "juicing-up" coronaviruses to study bat to human infections.

In response to Sen. Paul's line of questioning, Dr. Fauci straight-up lied, saying that the United States has not ever given money to the Wuhan virology institute, which is verifiably false.

# HOUSE REPUBLICANS OUST REP. LIZ CHENEY AS GOP CONFERENCE CHAIRWOMAN

[The Epoch Times](#)

House Republicans voted Wednesday to oust Rep. Liz Cheney (R-Wyo.) from her House leadership position amid a public spat between her and other House GOP leaders following her increasingly critical comments about former President Donald Trump and the party's messaging.

After she was voted out, Cheney, the daughter of former Vice President Dick Cheney, told reporters that she will work to prevent Trump from becoming president again, but stressed she didn't feel betrayed by her fellow House Republicans.

"I will do everything I can to ensure that the former president never again gets anywhere near the Oval Office," Cheney said after the vote on Wednesday, adding that the "nation needs a strong Republican Party ... based on the principles of conservatism."
