[The Epoch Times](#)

Texas Gov. Greg Abbott signed four “back the blue” bills into law on Tuesday, increasing criminal penalties for activities that interfere with law enforcement and imposing penalties on cities that defund the police.

“Efforts to defund the police are downright dangerous, and these laws will prevent cities from making this reckless decision,” Abbott said in a statement. “I applaud the Texas Legislature for joining me in passing these priority items and for making sure Texas remains a law-and-order state.”

Among the bills Abbott signed, House Bill 1900 states that for any city with a population over 250,000 that defunds the police, the state can withhold sales tax collected by the city and give it to the department of public safety. Cities that defund the police will lose their annexation powers for 10 years, and any area annexed in the past 30 years can vote to dis-annex from the defunding city.

BIDEN SAID HE'S BEEN PRESIDENT OF THE US FOR '15 MONTHS'

[America's Citizen Press](#)

President Joe Biden said that he'd been President of the United States for “15 months” in a COVID-19 policy announcement on Wednesday.

“Since January 20, we're talking now about 15 months ago, the average daily cases are down from 184,000 to 19,000,” said Biden.

This is one more instance of Biden appearing to struggle cognitively that the mainstream media will inevitably ignore. CNN and the MSM counterparts wouldn't dare question their beloved leader's cognitive health, even though it is obviously in decline.

Harri Hursti, Ph.D., computer scientist, and Elizabeth Howard, Cybersecurity and Elections Counsel of the radical, Soros-funded nonprofit, the Brennan Center for Justice in Manhattan, are both experts in election cybersecurity. In 2018 they were part of a UN initiative surrounding election cybersecurity and now they are part of efforts to derail or sabotage audits of the 2020 election, Howard in Maricopa County, Arizona, and Hursti in Windham, New Hampshire.

Yesterday we reported that Howard and Hursti briefed a roomful of U.N. election observers on November 3, 2018. That briefing took place in Washington, D.C. and it concerned election cybersecurity. Three days later, on Election Day, a team of 186 U.N. election observers was deployed all over America – we don't know where – to observe our mid-term elections and to gather data for the U.N.

KAMALA HARRIS JUST LAUGHED ABOUT THE BORDER CRISIS

[The Gateway Pundit](#)

Vice President Kamala Harris just laughed about the border crisis and her failure to visit the border.

Lester Holt asked Harris in an interview on NBC why she had not yet visited the border.

Harris, who is immediately frustrated by the question, throws her hands up in the air and says, "at some point." She then launches into an exasperated defense, repeatedly stating, "we've been to the border."
