

YATAŞ

1976 Süntaş A.Ş., which would later become Yataş, was established as Anatolia's first foam factory in 1976.

1979 The facility increased its investments to start manufacturing foam mattresses as well as foam...

1981 Spring mattress production began...

1987 Home textiles production began...

1988 A domestic retail operations system was launched...

1993 Yataş increased its product range by manufacturing sofa bed and couch sets, and gained the trust for Yataş brand with its enriched approach to service and its high quality..

1996 Yataş became the first company in its industry to be offered to the public...

2001 Yataş increased the investments in its facilities and began modular production at its Ankara Hasanođlan plant...

2015 Today, Yataş serves its customers with five factories, 1,450 employees and 900 sales points...

COMPLETE FURNISHING PROJECTS

Today, Yataş Project is able to manufacture any furniture or wood-related product ranging from standard common use furniture to modular furniture, seating sets in lobbies and conference rooms, and to wooden wall boards in its own factories, primarily for hotels and resorts, as well as hospitals and dormitories. With room furniture, as well as mattresses, storage beds and textile products, Yataş is proud to offer complete furnishing services with the professionalism investors such as you deserve.

YATAŞ'S GENERAL PRODUCT RANGE

Our difference is our wide range of products, the design and manufacturing of which we carry out in our own facilities.

YATAŞ PROJECTS SLEEP TECHNOLOGY FOR A FINE LIFE

We care about creating value for our society and our country.

As Yataş, the oldest, respectable, honest and reliable leading brand that always achieves "firsts" in its field, we continue to grow confidently and consistently with our innovative identity and quality-centered approach to service. We play an active role in the economic development of our nation with over forty years of experience, and the size of our export and employment, as well as our strength.

We are pleased to serve you at our fully integrated facilities with production equipment such as foam and springs, as well as full products such as mattresses, home textiles, storage beds, couches and modular furniture models manufactured at our ISO quality standard-certified factories. We operate with a corporate responsibility towards our nation in all the fields we operate in, and strive to support projects that contribute to social development, and are sustainable, long term, and beneficial for the country's economy.

In order to serve you, our valued investors, much better, we recently redeveloped our IT structure and factory production lines within the Yataş Project Department with the latest innovations in our field in mind. With our knowledge and experience in the field, we continue our efforts towards developing innovative and high-quality products in order to offer you better services.

With the responsibility of being the foremost brand associated with a "good and health sleep" in mind, we are pleased to offer high-quality products to our customers, and bring you the best and the newest using the latest technologies in our field. This outlook has led us to develop the "Monarch" series in our new product range for 2015, featuring the world-famous American Leggett & Platt spring technologies exclusive to Yataş in Turkey. We are excited to offer you this technology, which is used by the world's leading prestigious hotel groups. We developed our new collection and our Yataş Project range of products of 2015 to meet all your needs and offer you comfort and elegance.

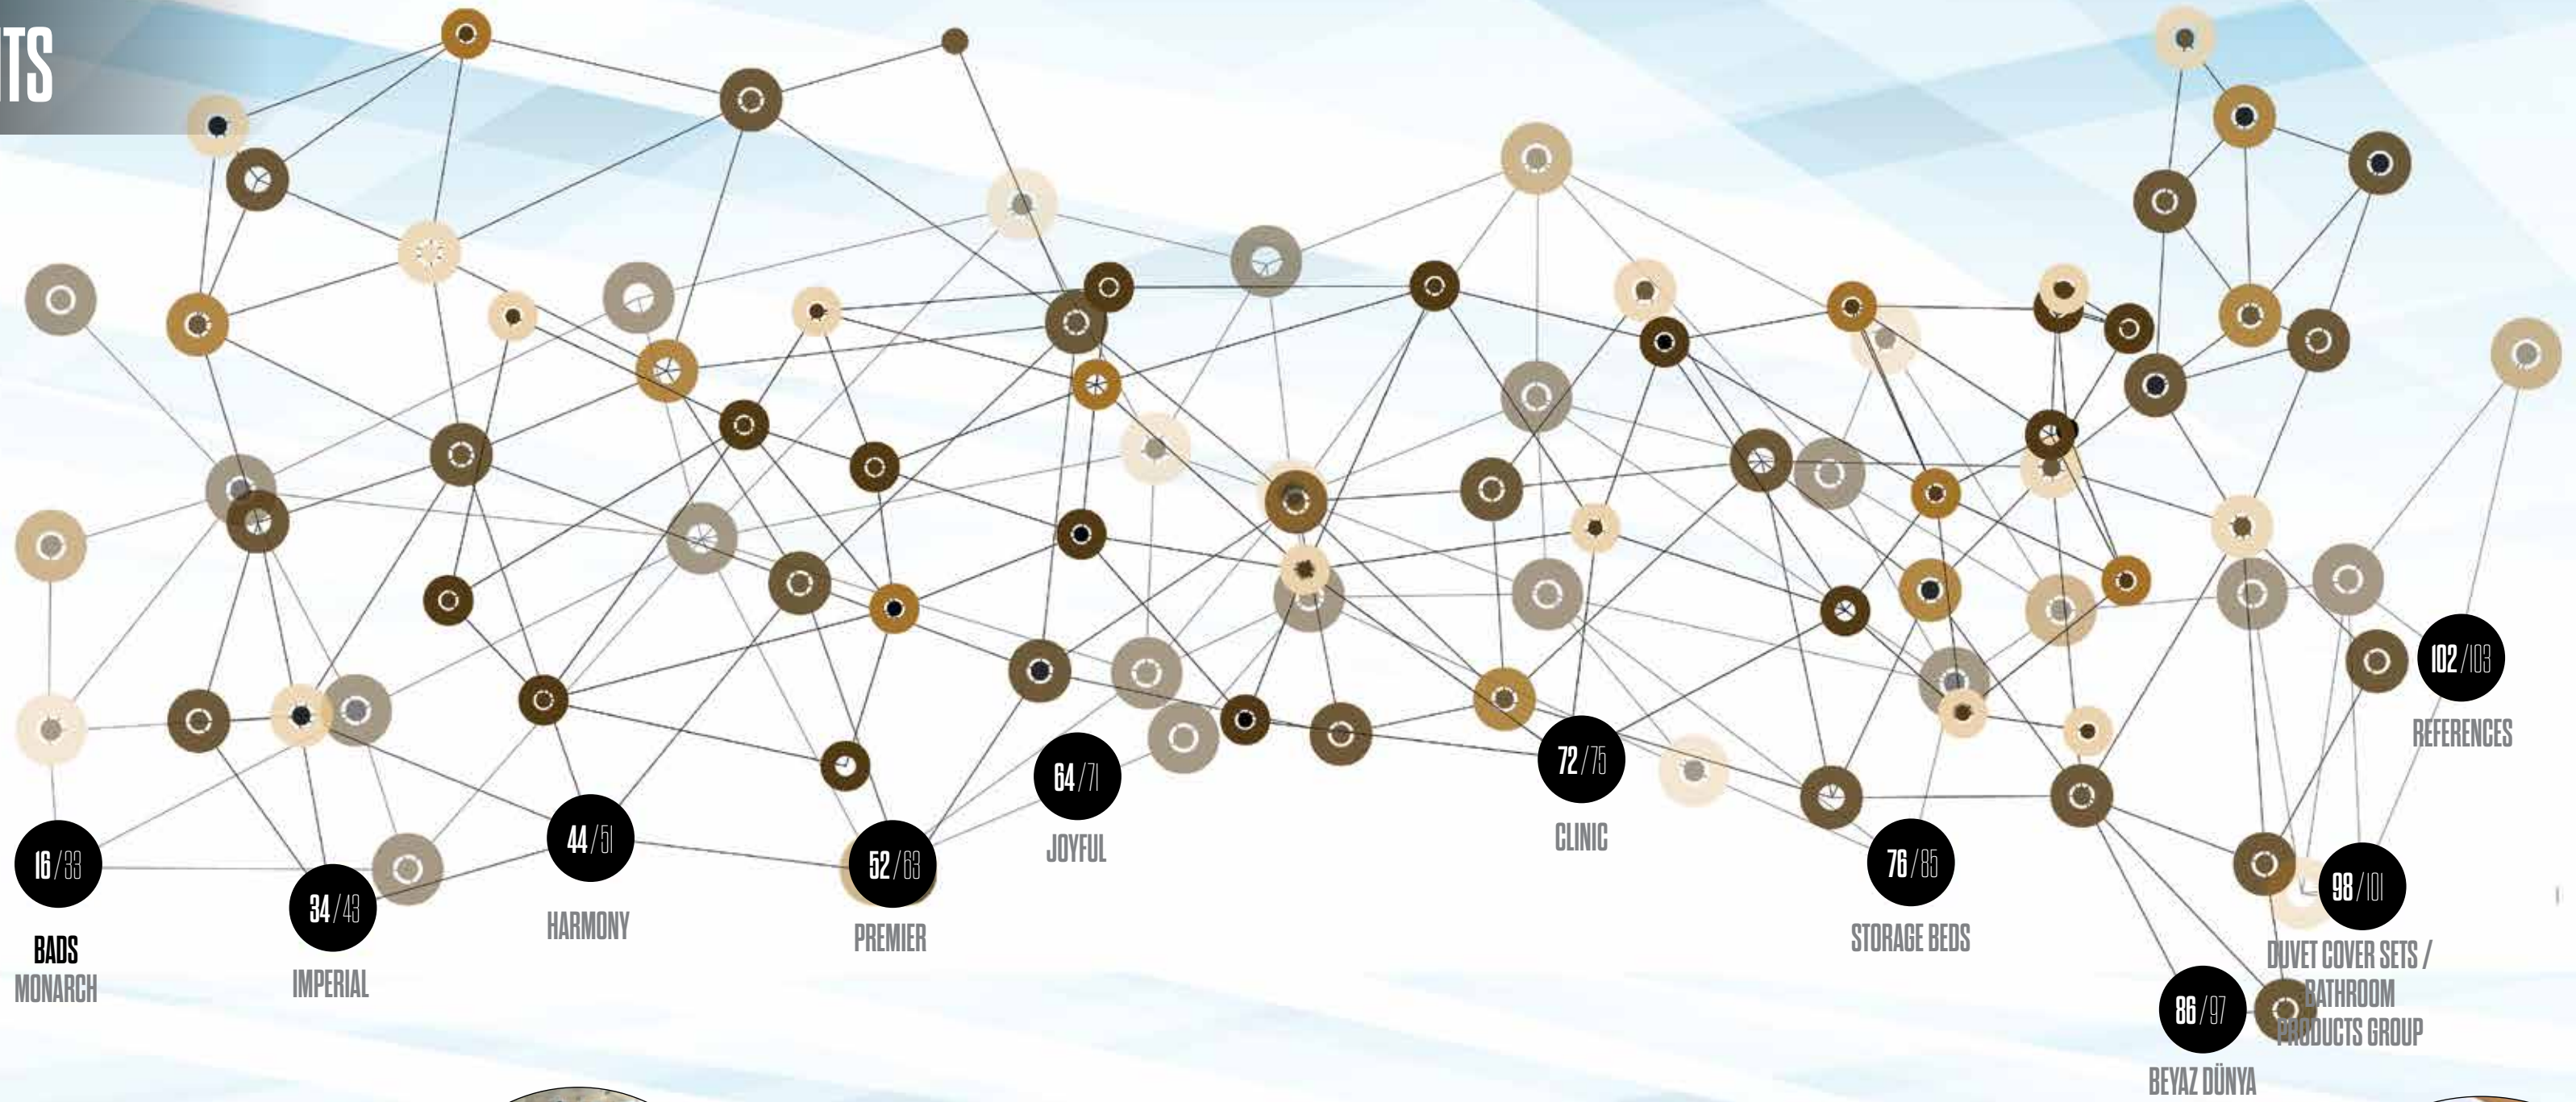

As the Yataş Project, we also offer "complete furnishing" solution partnerships with our custom design furniture works. We open the doors of a comfortable life for your guests by custom-designing, manufacturing and assembling all the products you need, from mattresses and home textiles to all kinds of furniture in Yataş quality standards, in a way that will meet your needs and fit your budget.

We will continue to work and produce for Turkey's future, and grow by adding value to our country and our people with you, our valuable investors.

Please feel free to contact our team members, who are always eager to help you with their "360-degree service" approach, to get detailed answers to any questions you may have.

Serhan Sinan Altop
Director of Yataş Projects

CONTENTS

YATAŞ MATTRESS TECHNOLOGIES

WOOLMARK® WOOLEN PADDING
Made of 100% pure new wool. It is anti-allergic. It is flame-retardant. It is recyclable. Its protein-based structure is breathable and it absorbs and destroys unpleasant odors. It relaxes the heart rate and has anti-stress qualities.

CAST FOAM SPRING TECHNOLOGY
Makes the mattress extra durable. It creates a firm sleeping surface and offers the ideal support for the lower back and back.

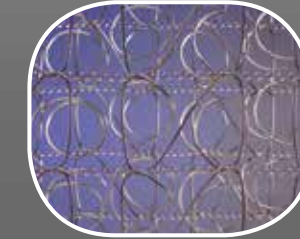

CELLIANT® FEATURE
Increases the level of oxygen in the body. Soothes aches and pains, balances body temperature, improves blood flow. Contains minerals with anti-stress properties. The minerals it contains helps natural healing after surgical operations and injury. Makes it easier to fall asleep. Reduces the effects of Jet lag (discomfort caused by time difference) after long flights.

HOURLASS TECHNOLOGY
This 3-tier spring shape resembles an hourglass, where the wider springs at the tips take the weight of the body gently. The narrow spring form in the middle provides adequately firm support when needed. Hourglass can correctly support even the most unusual body types.

POCKET SPRING SYSTEM
Individually packaged, specially produced springs move independently and support the body according to its weight points through areas with different degrees of firmness.

Ergocoil™ Technology
The Ergocoil Infinity Mattress, co-developed by Legett & Platt and Yataş, provides double the springs and comfort of other spring mattresses.

VISCO ELASTIC MEMORY FOAM TECHNOLOGY
Visco Elastic memory foam technology takes the shape of the body according to body temperature and weight, and matches the natural curve of the spine.

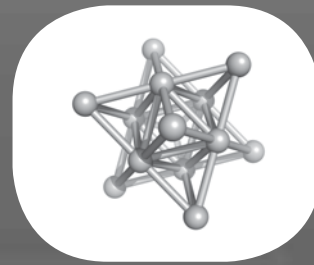

CORNER SPRING TECHNOLOGY
Supports the body on all points of the mattress surface. Prevents the corners of the bed from caving in.

SEASON LABELS
All Yataş Otel mattresses feature season labels in the corners, which indicates the season to make seasonal mattress turnovers easier.

FLAME-RETARDANT MATTRESS FABRIC
Mattress fabrics used in all Yataş Hotel mattresses are supported with flame-retardant materials.

Silverline Technology
The Silver Therapy Mattress, featuring the Silverline technology, prevents unpleasant odors with the silver ions in its fabric, and offers you a clean night's sleep.

Verticoil® Edge Technology
Verticoil® Edge is a new generation open spring system that offers 28% cooler sleep. It contains 25% more springs compared to standard mattresses, and thus provides more support for the spine.

PURETAX® ANTIBACTERIAL FABRIC TECHNOLOGY
Uses natural methods and very exclusive technology to keep disease-causing bacteria, mite and allergens away and protects your mattress long-term. Probiotics within the Purotex® fabric covers the fabric surface and prevents harmful bacteria from multiplying.

WINTER - SUMMER USE
Yataş uses silk or cotton on the summer side and pure Alpaka® or Woolmark® wool on the winter side to increase the quality of sleep by preserving body heat in hotel mattresses.

MATTRESSES

An experience they will not be able to forget...

We understand the meaning of an ideal sleep due to our years of experience and research. We strive to help your guests experience the best sleeping experience, and guarantee an unforgettable sleep with our combination of careful craftsmanship and our systems that feature cutting-edge technology.

MONARCH

Monarch mattresses feature springs of the latest technology, and offer a better and higher-quality sleep comfort by providing the support different body types need. Active Support Technology, featured in all Monarch series, helps your muscles relax during sleep and increases the quality of your sleep.

HOURGLASS TECHNOLOGY

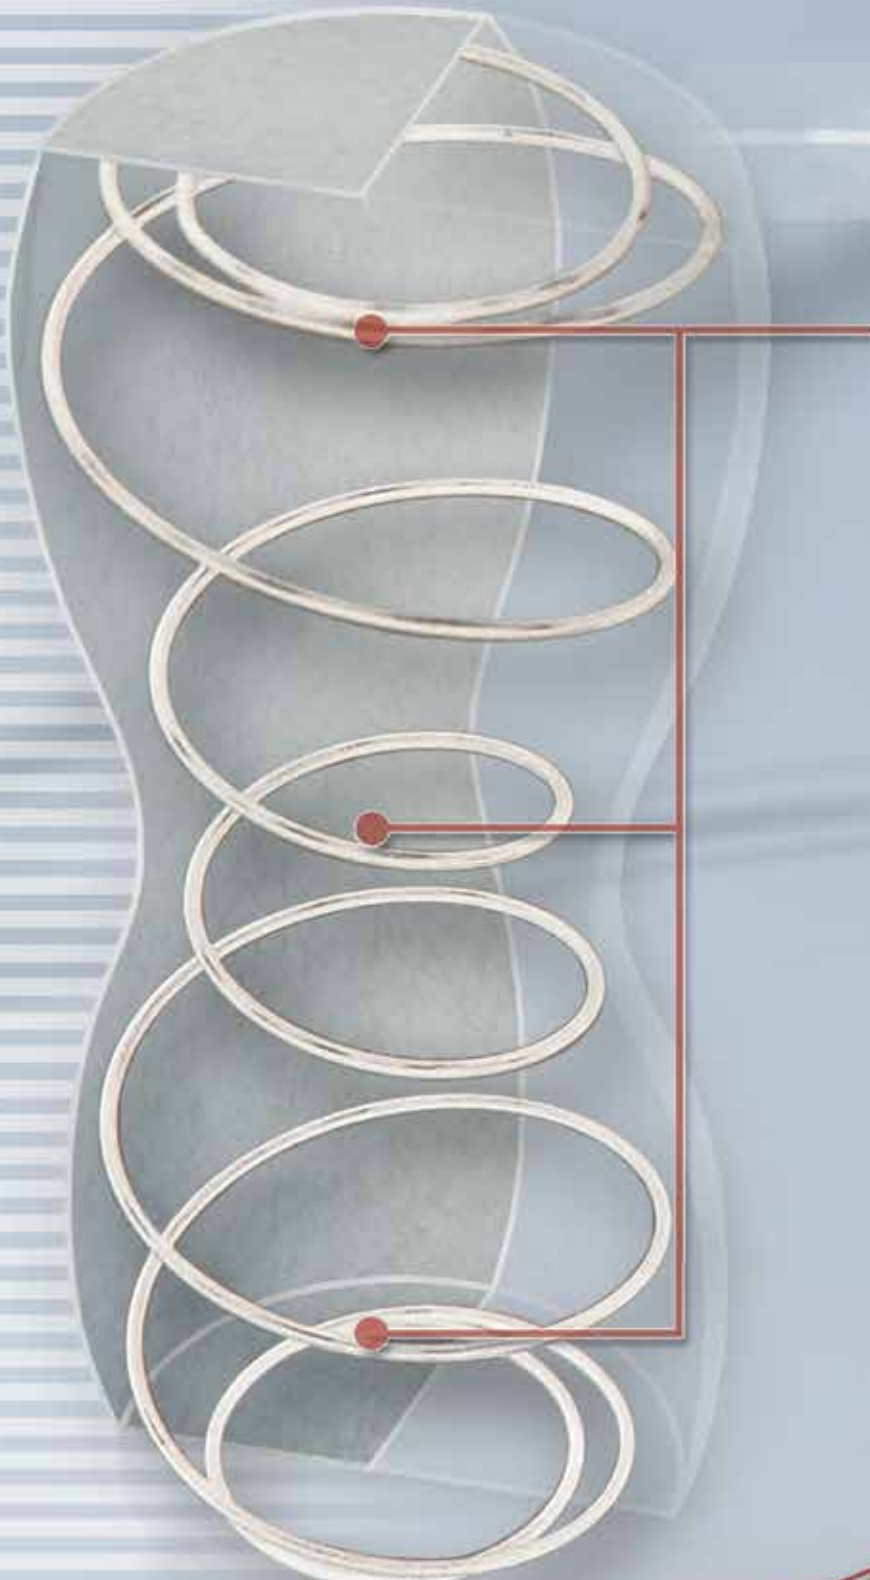

3 springs in one...

Hourglass is a technology featuring an exclusive spring design, where three different springs combine into one.

Hourglass is designed using the Zero Gravity concept; it provides variable support for different body weights and sleep habits, and offers personalized comfort. It is neither firm nor soft, and delivers ideal body support for everyone.

During the first sleep, the comfort zones on the top and on the bottom are wider in order to provide a softer and more comfortable feel. The goal is to provide a soft welcome to the user, and deliver the weight-dependent support the body needs through the middle section.

Following the feeling of softness and comfort in the beginning, the mattress provides complete support in areas where the body needs it as the pressure increases.

Hourglass Spring Technology is neither too firm nor too soft, and delivers support in areas where it is needed the most and responds to different body types.

A mattress that is ideal for everyone has come to life...

Hourglass is designed using the Zero Gravity concept and provides personalized comfort. It provides variable support depending on different body weight and sleeping habits. Thus it creates a surface that is neither too firm nor too soft, and is ideal for everyone.

Active Support Technology

This technology helps your muscles relax much more in your natural sleeping posture. The springs immediately adapt to your movements during sleep, and supports and relaxes your body, which is active even during sleep.

MONARCH 500

MONARCH 500

The Monarch 500 mattress is designed using the Zero Gravity concept and features the Hourglass® spring technology, and it offers personalized comfort by providing variable support for different body weights and sleep habits.

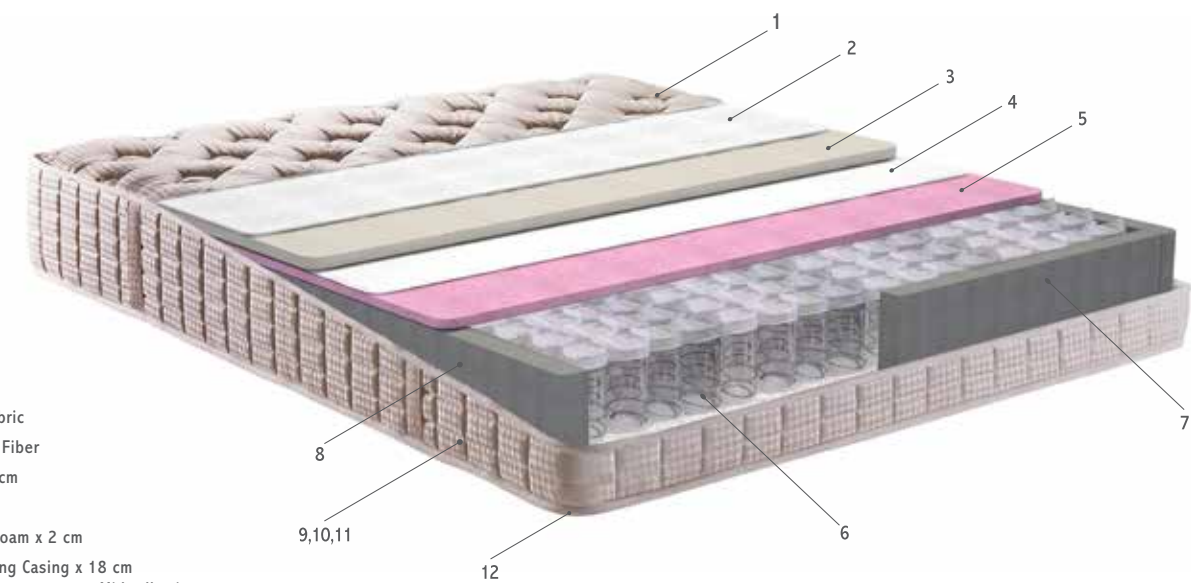

- The comfort of three springs in one with the patented hourglass® spring technology
- Top and bottom spring zones provide a soft welcome during first use, middle spring zone offers variable support with time depending on weight
- Woven fabric made up of natural Viscon fibers
- A feeling of sleeping on clouds with its perfect comfort layers and patented hourglass® technology
- Soft touch foam layers that increase sleeping comfort
- Reinforced corner support system
- Double-sided use
- 30 cm mattress height

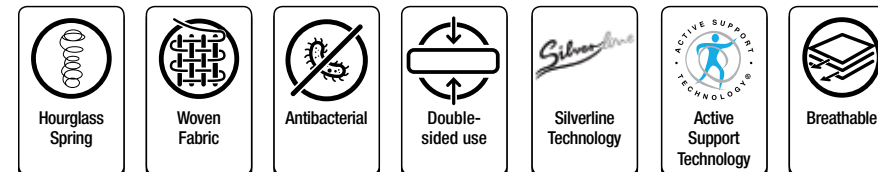

Three Types of Comfort in One Hourglass

This 3-tier spring shape resembles an hourglass, where the wider springs at the tips take the weight of the body gently. The narrow spring form in the middle provides adequately firm support when needed. Hourglass can correctly support even the most unusual body types.

VERTICOIL EDGE TECHNOLOGY

Active Support Technology

This technology helps your muscles relax much more in your natural sleeping posture. The springs immediately adapt to your movements during sleep, and supports and relaxes your body, which is active even during sleep.

100% functional Springs and Unbeatable Comfort

The Verticoil Spring System is a Flexible and Body-adaptable Open Spring System.

This system contains 25% more springs compared to Bonel springs, adapts to the body better and helps you sleep better.

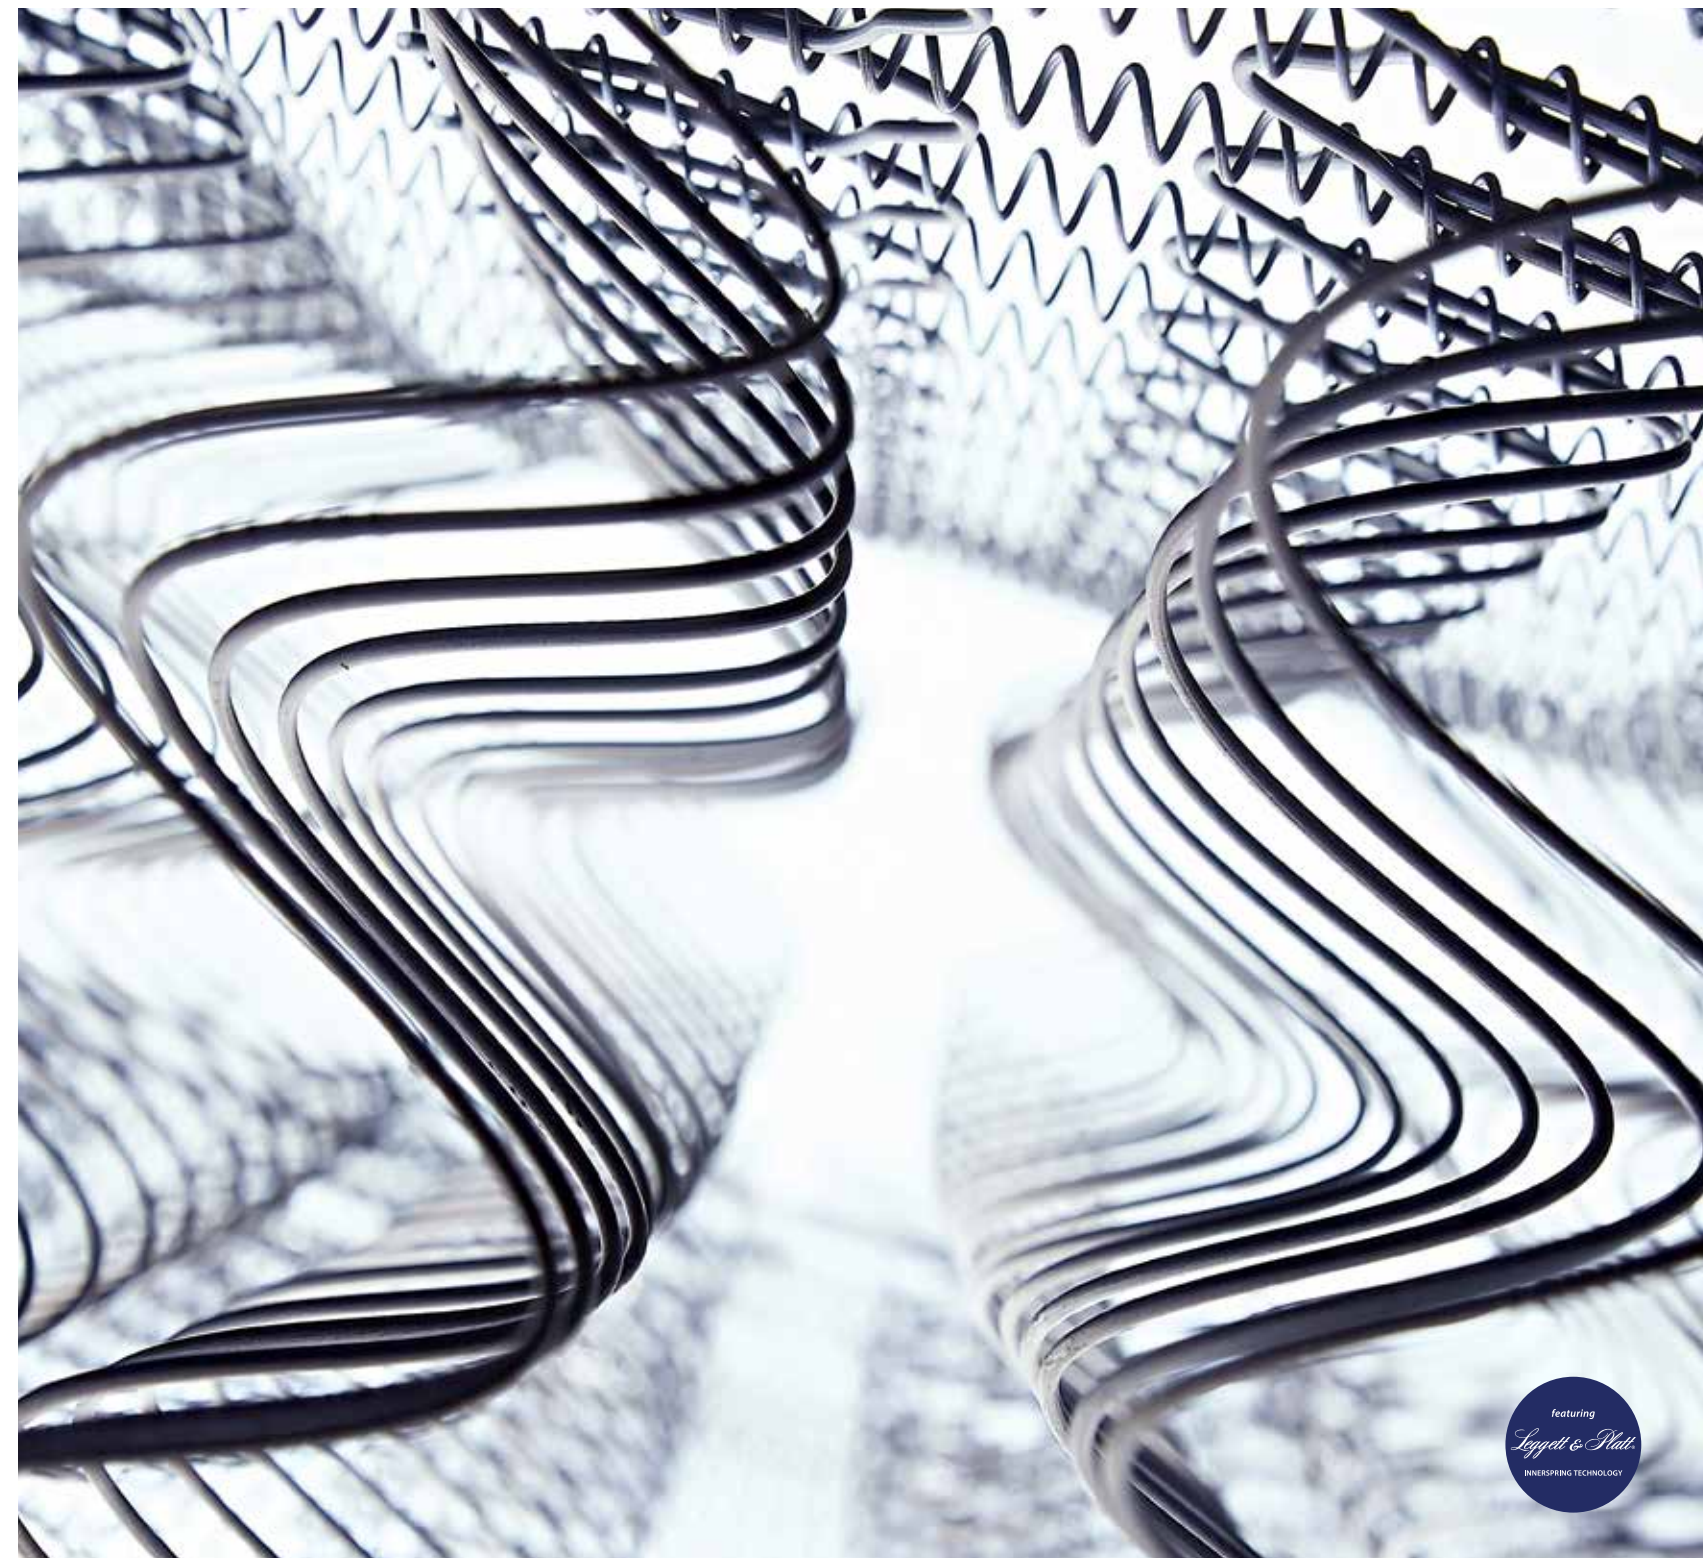

The structure of the special springs design supports the spine, and offers a more peaceful and restful sleep.

Parallel springs fitted specially in each corner eliminate the issue of corners caving in.

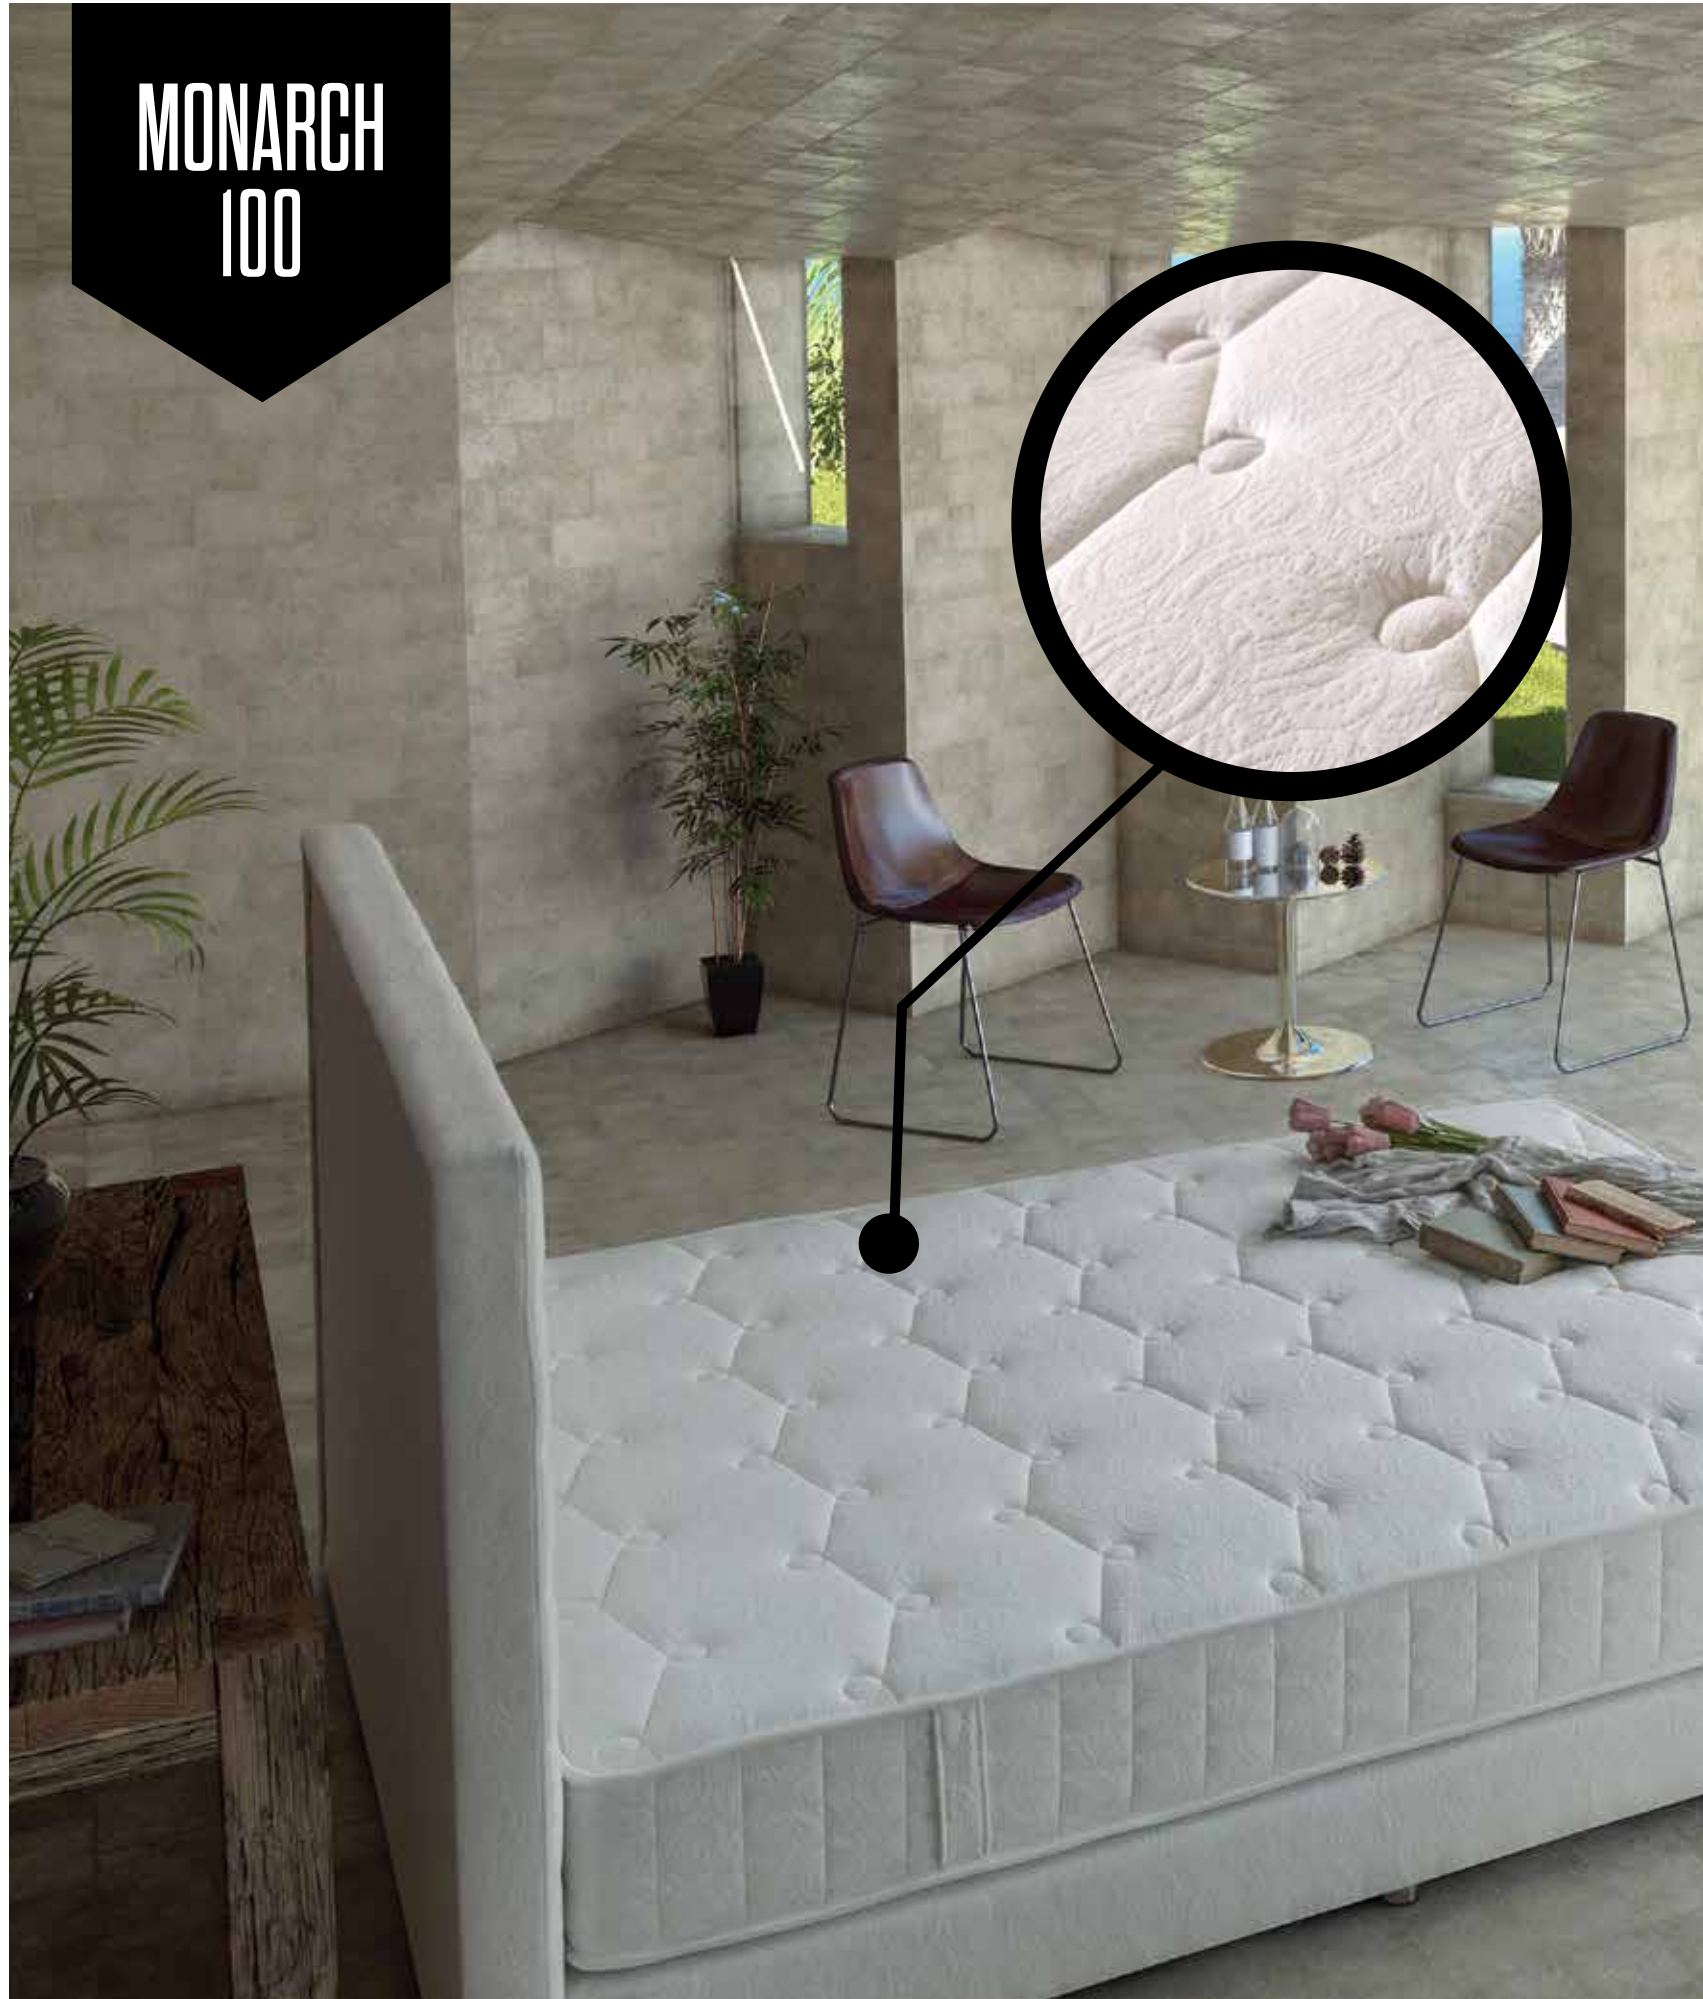

25% More Springs, More Comfort...

Verticoil® Edge is a new generation open spring system that offers 28% cooler sleep. It contains 25% more springs compared to standard mattresses, and thus provides more support for the spine.

MONARCH 100

MONARCH 100

Monarch 100 Mattresses feature Verticoil Spring Technology that contains 25% more springs compared to generic spring casings, and helps reduce the pressure the mattress applies on the body and facilitates a balanced distribution of body weight.

- 25% more spring count with Verticoil spring technology, exclusive to Yataş in Turkey
- Anti-bacterial, soft touché woven fabric that provides natural and effective protection against bacteria
- The same comfort and support throughout the mattress and in any sleeping position due to the increased number of springs
- Firmer, lighter and more durable spring technology compared to generic springs
- 28% cooler sleeping environment compared to foam mattresses due to superior breathability
- Double-sided use
- 27 cm mattress height

25% More Springs, More Comfort
Verticoil® Edge

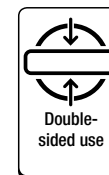

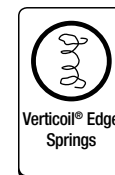

The Verticoil® Edge Spring System with reinforced edges provides a comfortable sleep on the entire surface of the mattress, including the edges. It contains 21% more springs compared to conventional spring systems and offers sleep support.

ERGOCOIL BY MIRRACOIL

“American mattress-type springing, quiet and endless comfort...”

The Ergocoil Infinity Mattress, co-developed by Legett & Platt and Yataş, provides double the springs and comfort of other spring mattresses.

The difference is clear...

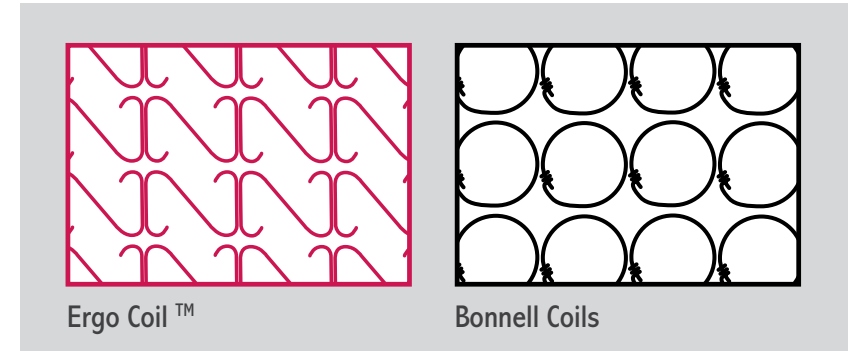

The patented **Ergocoil Spring Technology**, manufactured using the **Mirracoil Spring Technology**, covers a larger area due to its seamless spring weaving technology and provides 50% more support.

Helps your body take the correct sleeping position when you lie down.

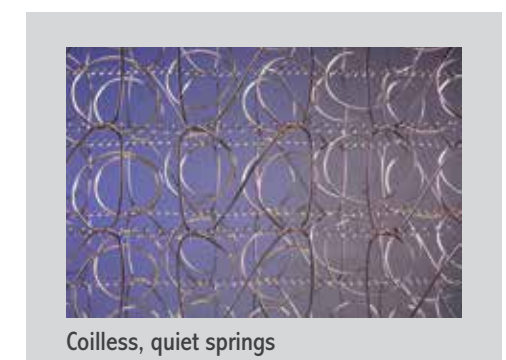

Long-lasting technology: No damage after 240,000 impacts in durability tests.

Fewer coils, a quieter spring technology.

Environment-conscious production.

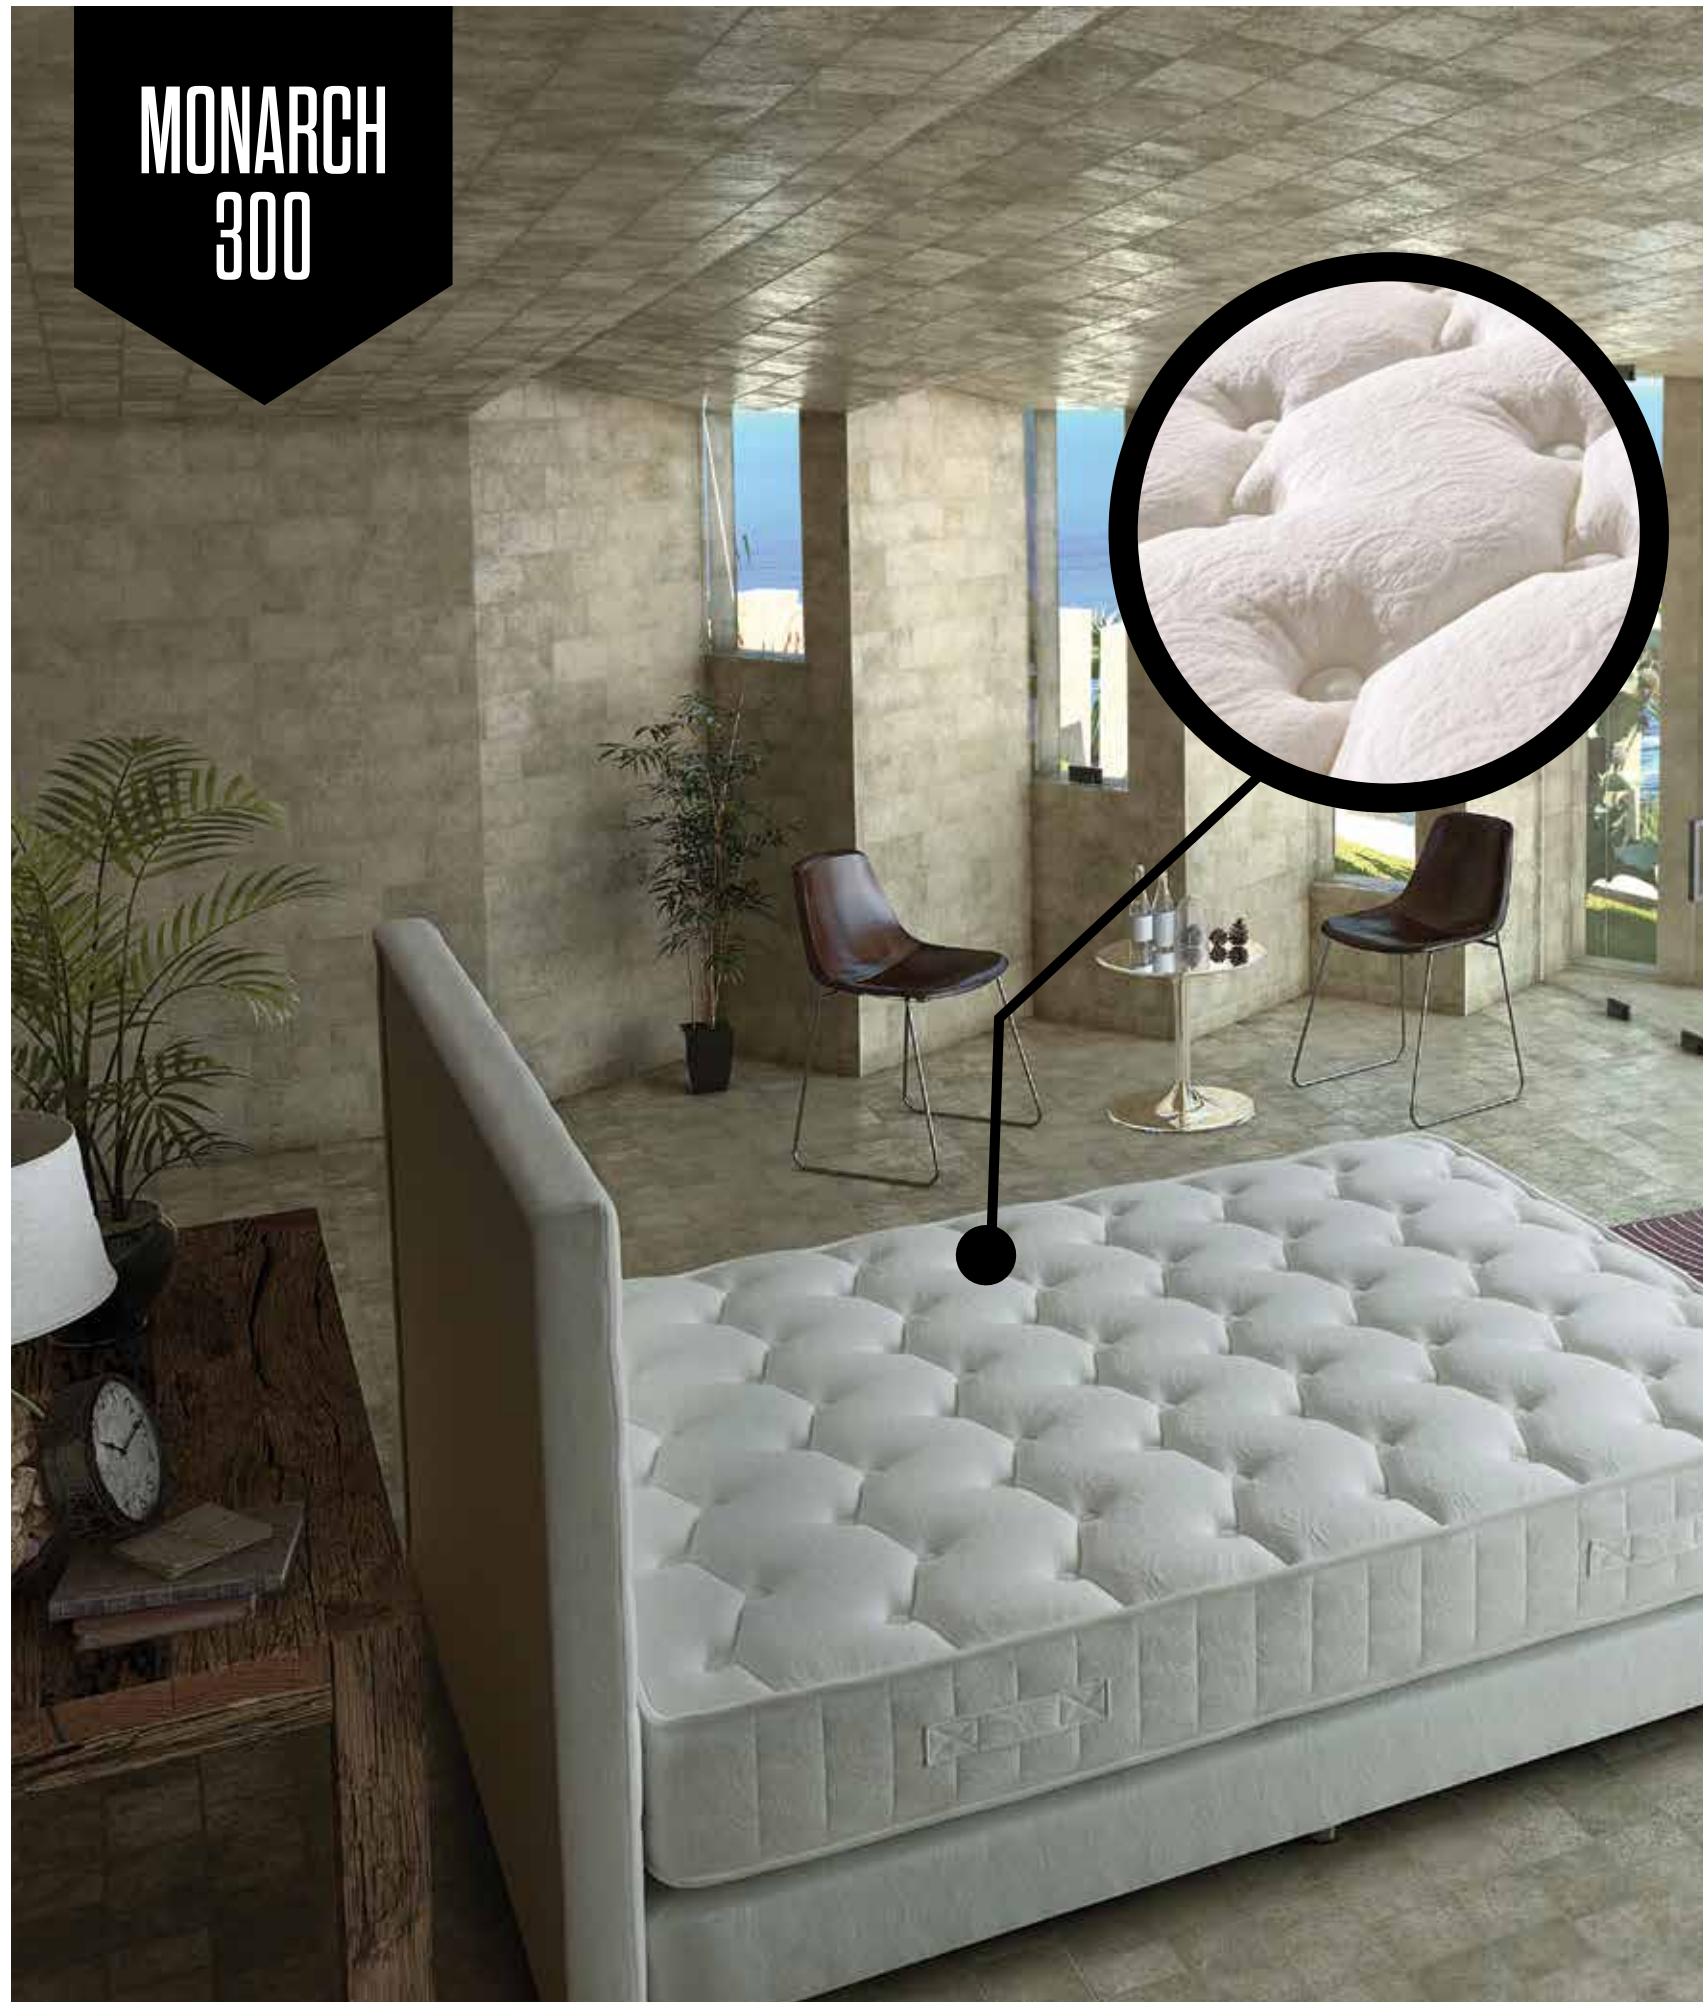

50% more support

Active Support Technology

This technology helps your muscles relax much more in your natural sleeping posture. The springs immediately adapt to your movements during sleep, and supports and relaxes your body, which is active even during sleep.

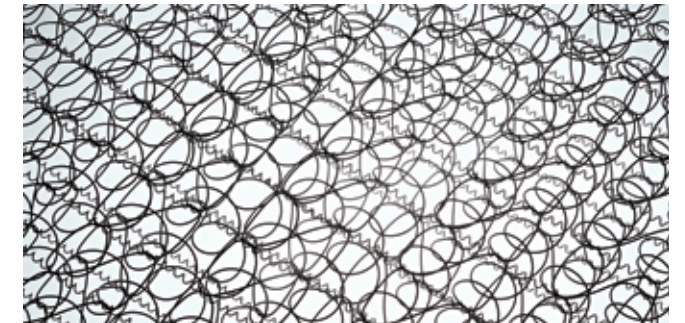

MONARCH 300

MONARCH 300

The Monarch 300 Mattress, featuring the Ergocoil® Spring Technology that contains 50% more springs compared to standard spring technologies, was designed to offer extraordinary comfort for years with its one-of-a-kind comfort layers.

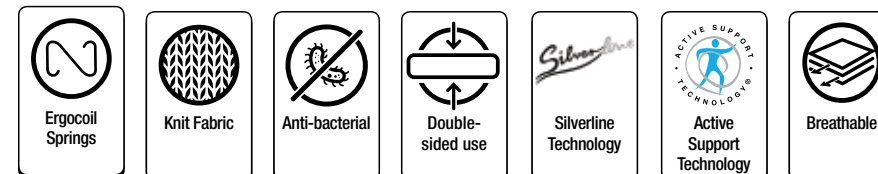

- Patented Ergocoil® Spring Technology, developed from Miracoil spring technology, is the most advanced version of seamless spring technologies.
- Its durable structure and American-type springing comfort sets it apart from all other spring systems.
- Side to side spring distribution within the Ergocoil® spring technology minimizes the discomfort from the effect of the movements of spouses.
- Ergocoil® spring technology helps relax muscles in the natural sleeping position.
- Seamless spring system and high comfort layers support perfect ergonomic structure.
- Soft touch foam layers that increase sleeping comfort
- Double-sided use
- 28 cm mattress height

50% More Springs, More Comfort
Ergocoil

The Monarch 300 mattress increases your sleeping comfort much more due to the doubled number of springs it contains. It offers twice the number of springs, and as a result, double the comfort.

HARMONY 300

HARMONY 300

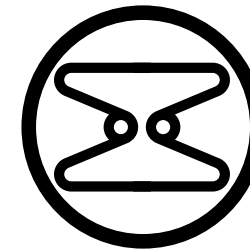

The Harmony 300 mattress provides the best support for the back and the lower back with its latex-like cast foam technology and fully orthopedic structure. With the corner support springs that are exclusive to Yataş in Turkey, Harmony 300 mattress provides equal comfort on all points and preserves its form for years.

- Perfect heat insulation and a warm sleeping environment with 100% natural Alpaka® wool on the winter side.
- A shiny look and a cooling effect with the partially silk knit fabric on the summer side
- Kelebek Edge Spring Technology that supports the mattress on all four sides, exclusive to Yataş
- Anti-bacterial, anti-mold, anti-mite, anti-fungal Sanitized® Fabric Technology
- Flame retardant properties in the mattress fabric
- The first and only cast foam spring technology in Turkey
- Double-sided use
- 31 cm mattress height

Cool in the Winter, Warm in the Summer
Alpaca Wool - Silk Fabric

The Alpaca wool fabric on the winter surface of the Harmony 300 mattress creates a warm sleeping environment with a soft touch and a silky appearance. The partially silk knit fabric on the summer surface adds a shiny look to a cooling effect.

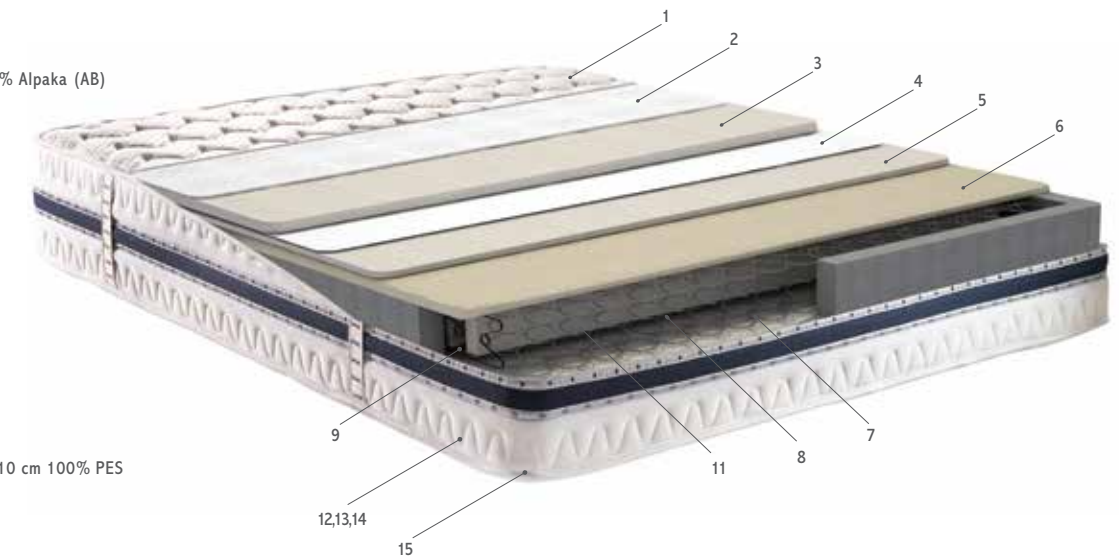

Wider Sleeping Surface

Patented Edge Support Spring Technology

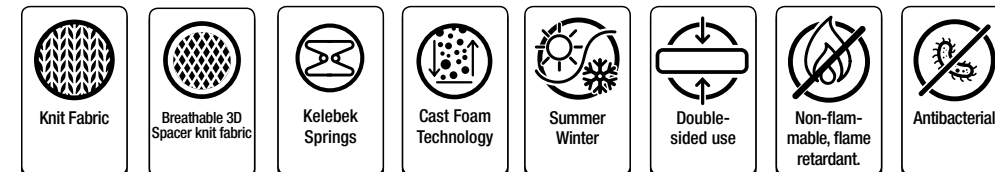

Provides Full HD mattress comfort with its Edge Spring Technology that supports the mattress on all four sides. Only at Yataş. Offers a wide sleeping surface with edge support springs.

The leather fabrics we use in our storage beds do not contain phthalates (poisonous chemicals that cause kidney failure and cancer).

**POP UP
PULL OUT
STORAGE BED**

Pop up pull out storage bed was designed to offer a solution to space issues in narrow rooms. The pull out mattress it contains becomes an elegant storage bed for hotels and a comfortable extra mattress for boutique hotels.

- High storage bed with durable metal body and decorative fabric
- Full orthopedic spring mattress that may be used as the pull out mattress; 90x190 cm and 22 cm high Pull out mattress that may be used separately and can function as an extra mattress
- Creates a full bed for two, 190x200 cm, when used with the extra mattress option
- Design that allows the storage of suitcases etc. when the extra mattress is outside the storage compartment.

**RIVOLI
FOLDING BOX
SPRING**

Offers ease of use with 28 dns foam, easy opening and closing functionality and wheels, and becomes the solution to additional mattress shortage.

The leather fabrics we use in our storage beds do not contain phthalates (poisonous chemicals that cause kidney failure and cancer).

BEYAZ DÜNYA

While Yataş leads its White Home Textile products with its innovations, it also opens the doors to a healthy, comfortable and reliable sleep with its standard products, Dacron products® as well as body-smart Medical products.

Sleep soundly and peacefully with Dacron® products that are made up of 100% cotton, are washable, and are enemies of harmful bacteria.

Why Dacron® Products?

- Anti-bacterial • Anti-allergic • Anti-stress • Perfect Hygiene
- Washable • Dryable • Anti-humidity • Preserves its form
- Balanced sleep with heat transfer capability • Ecological
- Variable weight • 79 woven fabric density • Perfect neck support
- Cooling effect • Offers high comfort

DACRON® 95° QUILT

Dacron® 95 is the only quilt that is washable at 95°C, thanks to its special fiber. Since bacteria die at 60°C, it provides impeccable hygiene at each wash. This feature makes it ideal for use at places such as dormitories, hotels or hospitals, in addition to personal use at home.

- Made from 100% cotton fabric.
- Grade 60 woven wire fabric quality.
- Filled with 200 gr/m² of special Dacron® 95°C fiber.
- Ensures impeccable hygiene.
- Washable and dryable at 95°C in the washing machine.
- Size (cm): Single; 155x215 / Double; 195x215

DACRON® HOLLOFIL® ALLERBAN® QUILT

Dacron® Hollofil® is a four-hole fiber, containing 20% of air. Therefore, it is a very light and warm product. It eliminates factors that cause allergic reactions and respiratory tract problems due to the Allerban® technology used on its Hollofil® fiber.

- Made from 100% cotton fabric.
- Grade 79 woven wire fabric quality.
- Filled with 200 gr/m² of special Dacron® Hollofil® fiber.
- Anti-bacterial, anti-dust mite and anti-allergenic.
- Four-hole fiber, containing 20% of air.
- Washable at 60°C.
- Size (cm): Single; 155x215 / Double; 195x215

DACRON® CLIMARELLE® QUILT

Micro capsules embedded in the soft buckram are activated when the temperature changes during sleep, balancing body temperature and facilitating the ideal environment of sleep temperature. Its special filling material assures maximum comfort with minimum weight.

- Made from 100% cotton fabric.
- Grade 79 woven wire fabric quality.
- Filled with 150 gr/m² of special Dacron® Climarelle® fiber.
- Interlining is developed with microcapsule technology to create a cooling effect.
- White interlining.
- Thermal stabilizer effect and heat transfer provide a balanced sleep.
- Machine-washable and may be tumble-dried.
- Size (cm): Single; 155x215 / Double; 195x215 / Double-XL; 240x220

DACRON® CLIMARELLE® COOL QUILT

Postpones heat-related interruptions to sleep caused by turns especially in the summer months with its cooling effect. That is why it has been manufactured as a summer quilt. Its special filling material assures maximum comfort with minimum weight.

- Made from 100% cotton fabric.
- Grade 79 woven wire fabric quality.
- Filled with 150 gr/m² of special Dacron® Climarelle® Cool fiber.
- Interlining is developed with microcapsule technology to create a cooling effect.
- Blue interlining.
- Cooling effect and heat transfer provide a balanced sleep.
- Machine-washable and may be tumble-dried.
- Size (cm): Single; 155x215 / Double; 195x215 / Double-XL; 240x220

DACRON® MICROFIBER QUALLOFIL® AIR QUILT

Dacron® Quallofil® is an air-fiber, containing 33% of air. Air is the best insulation material. Despite its density of 300 gr/m², it is a very light and warm product. Furthermore, spiral texture of the fiber allows it to remain more fluffy in a cloudy shape, compared to its peers.

- Made from 100% microfiber fabric.
- Grade 80 woven wire fabric quality, specially made for the product.
- Filled with 300 gr/m² of special Dacron® Quallofil® fiber.
- AN EXTREMELY LIGHT AND SOFT QUILT
- Keeps warm due to the special structure of fiber.
- Machine-washable and may be tumble-dried.
- Size (cm): Single; 155x215 / Double; 195x215 / Double-XL; 240x220

DACRON® MICROFIBER QUALLOFIL® AIR 4 SEASONS QUILT

Dacron® Quallofil® is an extremely light and warm product. The 200 gr/m² pack keeps cooler. Thus, it can be used in all four seasons.

- Made from 100% microfiber fabric.
- Grade 80 woven wire fabric quality, specially made for the product.
- Filled with 200 gr/m² of special Dacron® Quallofil® fiber.
- AN EXTREMELY LIGHT AND SOFT QUILT
- It can be used in all four seasons due to fiber's special structure.
- Machine-washable and may be tumble-dried.
- Size (cm): Single; 155x215 / Double; 195x215 / Double-XL; 240x220

GOOSE DOWN QUILT

Goose down is natural and healthy. While dewlap feathers provide softness, back feathers ensure spring action. Either way. Hygienic. Regular airing and shaking is recommended. Dry cleaning is recommended.

- Contains 30% dewlap and 70% back feathers.
- Made from 100% cotton fabric.
- Two-layer cover. External and internal covers are grade 92 and 57 woven wire fabric qualities respectively.
- Single quilt weighs 1260 grams.
- Double quilt weighs 1600 grams.
- Size (cm): Single; 155x215 / Double; 195x215

DOLY WOOLEN QUILT

As a natural product, wool distributes the heat evenly by providing thermal insulation. Its natural form also makes it anti-allergenic. It has been treated to attain flame retardant and anti-bacterial properties. Manufactured in Yataş factories to meet Woolmark standards. Wool prevents sweating and soothes body pain.

- 100% cotton fabric.
- 400 gr/m² 100% woolen filling.
- The product is woolmark-certified.
- Dry cleaning only.
- Size (cm): Single; 155x215 / Double; 195x215

ANTI-STRESS QUILT

anti-stress

Carbon fibers within the fabric collect the static electricity stored in the body all day. Helps start the day more relaxed and rested. Covers put on the anti-stress quilts and pillows do not block the effect of the carbon fibers.

- Poly cotton fabric contains 59.6% Cotton, 40% Polyester and 0.4% Carbon.
- Grade 70 woven wire fabric quality.
- Filled with 380 gr/m² of special polyester fiber.
- Size (cm): Single; 155x215 / Double; 195x215

CORBELL QUILT

Soft texture provides a comfortable and warm sleep. An affordable product.

- 100% cotton fabric.
- Filled with 300 gr/m² of siliconized fiber.
- Grade 57 woven wire fabric quality.
- Size (cm): Single; 155x215 / Double; 195x215

DACRON® 95 PILLOW

95°
by DACRON®

Dacron® 95 is the only pillow that is washable at 95°C, thanks to its special fiber. Since bacteria die at 60°C, it provides impeccable hygiene at each wash. This feature makes it ideal for use at places such as dormitories, hotels or hospitals, in addition to personal use at home.

- Made from 100% cotton fabric.
- Grade 60 woven wire fabric quality.
- Filled with 750 gr/m² of special Dacron® 95°C bead fiber.
- Ensures impeccable hygiene.
- Washable and dryable at 95°C in the washing machine.
- Size (cm): 50x70

DACRON® HOLLOFIL® ALLERBAN® PILLOW

Hollofil®
by DACRON®
ALLERBAN®

Dacron® Hollofil® is a four-hole fiber, containing 20% of air. It eliminates factors that cause allergic reactions and respiratory tract problems due to the Allerban® technology used on its Hollofil® fibers. It supports the head and neck areas and preserves its form.

- Made from 100% cotton fabric.
- Grade 79 woven wire fabric quality.
- Filled with 200 gr/m² of special Dacron® Hollofil® fiber.
- Anti-bacterial, anti-dust mite and anti-allergenic.
- Four-hole fiber, containing 20% of air.
- Washable at 60°C.
- Size (cm): 50x70

HANDY QUILT

Sleeping environment made comfortable and warm with soft texture, and light and soft with fiber filling.

- Filled with 150 gr/m² of siliconized fiber.
- Made from microfiber to be light, fluffy and soft.
- Size (cm): Single; 155x215 / Double; 195x215

POLYAT QUILT

Soft texture and high-quality fabric provide a comfortable and warm sleep.

- 100% cotton fabric.
- Filled with 380 gr/m² of siliconized fiber.
- Grade 79 woven wire fabric quality.
- Washable and easily dried.
- Size (cm): Single; 155x215 / Double; 195x215 / Double-XL; 240x220

DACRON® CLIMARELLE® PILLOW

limarelle
by DACRON®

Micro capsules embedded in the soft buckram are activated when the temperature changes during sleep, balancing body temperature. Two different height option available for the user. Interlining is on one side only, and this side must be used to sleep. Provides perfect support for the head and neck areas.

- Made from 100% cotton fabric.
- Grade 79 woven wire fabric quality.
- Two different heights with 580 gr and 750 gr.
- Filled with special Dacron® Climarelle® bead fiber.
- Interlining is developed with microcapsule technology to create a cooling effect.
- White interlining.
- Machine-washable and may be tumble-dried.
- Size (cm): 50x70

DACRON® CLIMARELLE® COOL PILLOW

limarelle
by DACRON®
COOL

Postpones heat-related sleep interruptions caused by turns especially in the summer, due to its cooling effect. Special filling material assures optimum comfort with minimum weight. Interlining is on one side only, and this side must be used to sleep. Provides excellent head and neck support.

- Made from 100% cotton fabric.
- Grade 79 woven wire fabric quality.
- Filled with special 750 gr Dacron® Climarelle® Cool bead fiber.
- Interlining is developed with microcapsule technology to create a cooling effect.
- Blue interlining.
- Cooling effect and heat transfer provide a balanced sleep.
- Machine-washable and may be tumble-dried.
- Size (cm): 50x70

COMFOREL® ECO PILLOW

Comforel® Eco pillow makes a difference as an ecological product. It is healthy and environmentally friendly.

- Made from 100% cotton fabric.
- Grade 79 woven wire fabric quality.
- Filled with 650 gr of special Dacron® 95°C bead fiber.
- It is breathable and humidity-proof.
- Carries the ECO label due to its environmentally friendly production method.
- Preserves its form and offers perfect support for the head and neck areas.
- Size (cm): 50x70

ANTI-BACTERIAL PILLOW

Soft and long-lasting with 100% cotton fabric and grade 57 woven fabric quality. Additionally, it offers a health sleep with its anti-bacterial fiber filling and 60°C machine-washable properties.

- Made from 100% cotton fabric.
- Grade 57 woven wire fabric quality.
- Filled with 550 gr special Dacron® Anti-bacterial SHD fiber.
- Anti-bacterial.
- Washable at 60°C.
- Size (cm): 50x70

ANTI-STRESS PILLOW

Carbon fibers within the fabric collect the static electricity stored in the body all day. Helps start the day more relaxed and rested. Covers put on the anti-stress quilts and pillows do not block the effect of the carbon fibers.

- Poly cotton fabric contains 59.6% Cotton, 40% Polyester and 0.4% Carbon.
- Grade 70 woven wire fabric quality.
- Filled with 750 grams of special polyester fiber.
- Size (cm): 50x70

SUPRELLE® MEMORY PILLOW

Made from a very special microfiber that creates a feathery effect. Tests have shown heat to dissipate completely within two minutes. Suprelle® Memory pillows allow for the maximum relaxation in neck muscles due to the balanced distribution of pressure and promise a restful sleep. The breathability of the fabric used has been reduced by 20%, and the pillow gently re-assumes its original form when pressure is applied. This creates the visco elastic effect. The pillow offers perfect humidity absorption.

- Made from microfiber fabric.
- 1050 gr special micro particle fiber filling.
- Offers perfect volume and softness.
- Contains Visco elastic effect.
- Transfers heat and humidity.
- Size (cm): 50x70

HANDY PILLOW

Soft texture and high-quality fabric provide a comfortable and warm sleep.

- Filled with 550 grams of silicon fiber.
- Size (cm): 50x70

GOOSE DOWN PILLOW

Goose down is natural and healthy. While dewlap feathers provide softness, back feathers ensure spring action. Hygienic. Regular airing and shaking is recommended. Dry cleaning is recommended.

- Contains 15% dewlap and 85% back feathers.
- Made from 100% cotton fabric.
- Two-layer cover. External and internal covers are grade 92 and 57 woven wire fabric qualities respectively.
- Hungarian goose down.
- Size (cm): 50x70

POLYAT PILLOW

Soft, comfortable, light and hygienic.

- Made from 100% cotton fabric.
- Grade 57 woven wire fabric quality.
- Filled with 750 gr of siliconized fiber.
- Size (cm): 50x70

REFLÜ PILLOW

Prevents stomach acids from entering the esophagus by adjusting position of sleep. It has a cover that is washable at 60°C. Hygienic as bacteria cannot exist at 60°C.

- Made with poly-cotton knit fabric.
- Fully orthopedic.
- Made of foam blocks.
- Size (cm): 60x60x24

SELF PILLOW PILLOW

Zipper allows adjustment of the fiber inside. Highly comfortable.

- Made from 100% cotton fabric.
- Filled with 900 grams of siliconized bead fiber.
- Washable.
- Long lasting.
- Size (cm): 40x60x12

VISCO THERAPY FREE PILLOW

Offers the support of visco pillows due to its full form, but creates a soft effect with its bead fiber mixture.

- Made with poly-cotton knit fabric.
- Filling material is made up of silicon, bead fiber and visco particles.
- Size (cm): 50x70

VISCO THERAPY BALANCE PILLOW

Heat sensitive form takes the shape of the head and neck area, adjusting to the body. Reduces pressure points and relaxes the body. Reduces snoring by facilitating easy breathing. Features a machine-washable cover at 60°C. Hygienic as bacteria cannot live at 60°C.

- Made with poly-cotton knit fabric.
- Manufactured with open-cell technology.
- Preserves the natural "s" curve of the spine.
- Made with 49 DNS visco.
- Does not contain harmful chlorofluorocarbon (CFC) materials.
- Size (cm): 34x55

DR. NIGHT VISCO PILLOW

Provides a comfortable sleep by taking the shape of your neck. Grade 79 woven wire fabric quality, soft and durable with 100% cotton fabric. Does not contain harmful CFC material. Hygienic and anti-bacterial.

- Made from 100% cotton fabric.
- Grade 79 woven wire fabric quality.
- Manufactured with open-cell technology.
- Made with 48 DNS visco on the neck area and with bead fabric on the head area.
- Does not contain harmful chlorofluorocarbon (CFC) materials.
- Size (cm): 42x62

VISCO THERAPY STANDART PILLOW

Heat sensitive form takes the shape of the head and neck area, adjusting to the body. Relaxes the body through the night and allows an energetic wake-up. Features a machine-washable cover at 60°C. Hygienic as bacteria cannot live at 60°C.

- Made with poly-cotton knit fabric.
- Manufactured with open-cell technology.
- Made with 48 DNS visco.
- Does not contain harmful chlorofluorocarbon (CFC) materials.
- Size (cm): 38x70

VISCO THERAPY NECK PILLOW

Heat sensitive form takes the shape of the head and neck area, and adapts to the body. Helps neck muscles relax with its spine-adaptive shape. Features a machine-washable cover at 60°C. Hygienic as bacteria cannot exist at 60°C.

- Made with poly-cotton knit fabric.
- Manufactured with open-cell technology.
- Keeps neck vertebra straight and aligned.
- Made with 53 DNS visco.
- Does not contain harmful chlorofluorocarbon (CFC) materials.
- Size (cm): 50x30

VISCO THERAPY SPA PILLOW

Heat sensitive form takes the shape of the head and neck area, and adapts to the body. Channeled tissue on the top surface massages the head and neck area all night and increases sleeping comfort. Features machine washable cover at 60°C. Hygienic as bacteria cannot exist at 60°C.

- Made with poly-cotton knit fabric.
- Manufactured with open-cell technology.
- Does not cause sweating as air circulates between the slots throughout the night.
- Made with 52 DNS visco.
- Does not contain harmful chlorofluorocarbon (CFC) materials.
- Size (cm): 50x70

STANDARD MATTRESS PAD

Protects the mattress and increases comfort due to its fiber make-up.

- Made from 100% cotton fabric.
- Grade 57 woven wire fabric quality.
- Filled with polyester fiber.
- Size (cm): 90x190 - 90x200 - 100x200 - 120x200 - 130x190 - 140x190 - 140x200 - 150x190 - 150x200 - 160x190 - 160x200 - 180x200 - 200x200

MOSQUITO REPELLENT MATTRESS PAD

Repels mosquitoes with lemon eucalyptus microcapsules. Carbon fibers removes static electricity. Bamboo mixture provides extra softness.

- Polycotton and bamboo mixture is made of knit fabric.
- Contains carbon fibers which relieve stress.
- Texture contains lemon and eucalyptus fibers.
- Fiber filling relieves stress and protects the mattress.
- Size (cm): 90x190 - 90x200 - 100x200 - 120x200 - 130x190 - 140x190 - 160x200 - 180x200

ANTI-STRESS MATTRESS PAD

Carbon fibers within the fabric collect the static electricity stored in the body all day. Helps start the day more relaxed and rested. Sheets placed on anti-stress mattress pads do not block the effect of the carbon fibers.

- Poly cotton fabric contains 59.6% cotton, 40% polyester and
- Grade 70 woven wire fabric quality.
- Fiber filling relieves stress and protects the mattress.
- Size (cm): 90x190 - 90x200 - 100x200 - 140x190 - 150x200 - 160x200 - 180x200 - 200x200

MICROFIT FITTED WATERPROOF MATTRESS PAD

Micro yumuŝak yzzeyi ve su geermez membranı sayesinde yataklarınn mrzunu uzatır.

- st yzzeyi polyester ve ok yumuŝaktır.
- Arka yzzy membranlı olup su geermez.
- Kenar lastikli olup yataęa sabitlenir.
- Ebat (cm): 65x140 - 90x190 - 90x200 - 100x200 - 120x200 - 140x190 - 140x200 - 150x200 - 160x200 - 180x200

MICROFIT WATERPROOF MATTRESS PAD

Micro prolongs the life of the mattress with a soft surface and waterproof membrane. Also suitable for patient and baby mattresses.

- Upper surface is polyester and extremely soft.
- Backside is waterproof with membrane.
