Dunn and Thiel presented a sample grading application from a neighboring township and shared with the Board what items would need to be reviewed within the GIS system to properly evaluate the application and confirm what items would need to be completed if a grading permit was issued. Various topics surrounding this specific sample application were discussed along with additional variables that may come into play. It was further discussed that Adobe software would be of great assistance in helping the supervisors in the process of reviewing these applications with Dakota County Soil and Water.
