

Acknowledgments

Part of this research was conducted by the Australian Research Council Centre of Excellence for Ultrahigh Bandwidth Devices for Optical Systems (project# CE110001018) and supported by Linkage Infrastructure, Equipment and Facilities programs. T. Monro acknowledges the support of an ARC Laureate Fellowship. Technical drawing and drafting support was provided by Alastair Dowler. Derek Abbot and Benjamin Ung loaned us the Ti:sapphire laser. This work was performed in part at the OptoFab node of the Australian National Fabrication Facility utilizing Commonwealth and SA State Government funding.
