

Founded in 2006, Level Design Group is recognized as a multi-faceted Civil Engineering and Survey company. Our vision then and today remains the same: to provide accurate and reliable data on the design documents we prepare.

We are looking for an innovative civil engineer to design, develop and assist with construction of a range of projects from conception through to completion.

Duties & Responsibilities Include:

- Manage, design, develop, create and maintain construction projects;
- Submit permit applications and carry projects through all permitting stages including presentation at town meetings;
- Conduct on-site investigations and analyzing data (maps, reports, tests, drawings and other);
- Assess potential risks, materials and costs;
- Carry out technical and feasibility studies and draw up blueprints that satisfy technical specifications;
- Provide advice and resolve creatively any emerging problems/deficiencies;
- Monitor progress and compile reports in project status;
- Manage budget and purchase equipment/materials;
- Comply with guidelines and regulations including permits, safety etc and deliver technical files and other technical documentation as required.

Required Experience – Education & Skills

- E.I.T certificate required (PE license not required)
- BS/MA in Civil Engineering required
- Knowledge of design and visualizations software such as AutoCAD, HydroCAD
- A minimum of 2 years work experience in civil engineering required as well as experience in site layout, grading, utility design, erosion control, regulatory approvals, permitting, etc
- Strong communication and interpersonal skills
- MA licensed Soil Evaluator a plus
