

SHEPHERDS

Popping champagne bottles

On my Montecarlo

Vo soy infiltrado

I'mma bring it all home

I don't give a fuck about your

Little bitch ass condo

I got vicious cargo

Tu los ves brincando

University blue swoosh

On my AFIs

It's presidential when I'm out here dropping bombs

Calling shots. I'm number one after Kendrick's done

Bambino trust. Go adjust all your stuff is gone

When I first started I thought I wanted to take it easy

But these days my energy's all this early Veezy

I wanna fight the world. I wanna steal your girl

I wanna take all these fake ass prophets out so thorough

Precise like Joe Burrow. Chase me on broken roads

Tee off on all you hoes. Katt Williams so important

Energy's all distorted. This fire's holy ghosted

Delete my progress. Start from scratch and leave my scars open

Ronald Reagan poisoned waters that we drink to this day

Down here. It's a slaughter. We're fucked either way

Obama took our democracy and threw it away

Jill Stein is a grifter trying to get her bills paid

Like fuck your politics. I'm fucking sick

Don't ask me how to solve this shit

Give it to Jon Stewart but he's Jewish

Nazis run the clink

We'll take it from the sewers. Like Egyptians

Make it out as kings

I swear I see the future. Y'all are clueless

To the warnings

They'll take it from the ground

Those butterflies are forming

So go take your ears west

Listen to all the unrest

And if your spirit is blessed

Maybe my visions are tests

Maybe you listen to Jesus

Dare devils stop the deceiving

Read 19, 21. Bob Marley showed you the sun

Don't be afraid to look.

Mirrors will make you shook.

There's still time. Drop the act

And let your people shine

There's still time. Drop the act

And let your people shine

Dear Lord

If we are to meet our end

Let it not be

From false
