Intermittent Pick 'N' Place Denester PPD-1000

JB Automation and Engineering

The PPD-1000 denester is designed to denest a variety of trays directly onto your packing line conveyor or flow wrapper infeed.

Features

- Designed to make installation simple and fast.
- Quick and easy product changeover
- Festo air Cylinder drive is virtually maintenance free which equals less downtime
- High Efficiency PIAB vacuum generators with automatic blow off reduce compressed air consumption
- Choice of Metal Detectable or Standard Vacuum Cups, both of which are Mark Free
- Push button controls make operation and training easy
- Mobile design with lockable casters and optional machine feet allow the denester to be easily moved for cleaning or maintenance
- Polycarbonate safety guards to allow clear vision of the denesters operation
- Stack light shows the run state of the Denester
- Height adjustable stand to match your conveyor height
- Low magazine detection and visual warning light

Custom Options Available

- Servo driven pick assembly with HMI
- Full stainless steel washdown construction
- additional tray magazines to increase the output speed
- autoloader
- packing conveyor with clamshell pack auto lid closer
- we can fully customise the tray denester to suit your specific requirements

Typical Utility Requirements

- Electrical: 230 VAC 10A Max
- Pneumatic: 6 bar clean dry compressed air
- Vacuum: Pneumatic energy efficient vacuum generator included

Maximum Speeds

- 60 Cycles Per Minute (max speed is dependant on tray shape and size. Some trays types will reduce the max speed)

Product Size Range

- Minimum: 80mm (w) x 50mm (h) x 10mm (d)
- Maximum: 250mm (w) x 330mm (h) x 100mm (d)
