Question	Response
1. What is the best thing the instructor did to help you learn, and what should the instructor improve in this course?	Clearly outlined objectives and syllabus along with the overall course design and grading criteria. Material was relevant and engaging for me to understand. Regarding improvements the 3 hour lecture is difficult to sit through maybe offer some type of engaging activity or breaks.
2. With reference to technology, tutorial support, and the prerequisite for this course, if applicable, what changes would you suggest to the University to make this a better course?	This course was clear and thorough you could have little to no pre-requisite or be very knowledgeable in subject matter and still benefit from this course.
3. What is the best thing the instructor did to help you learn, and what should the instructor improve in this course?	Dr. Aliyar is very helpful and very insightful with this subject matter. This is a class that is very worthwhile and eye opening. Especially since food and technology really do go hand in hand in today's society. I appreciated the in class exercises and willingness to answer questions as they came up. It was even more exciting to earn a professional certification that can be bonus on job applications.
4. With reference to technology, tutorial support, and the prerequisite for this course, if applicable, what changes would you suggest to the University to make this a better course?	I wouldn't suggest any changes to this course.
5. What is the best thing the instructor did to help you learn, and what should the instructor improve in this course?	The instructor gave us a lot of guidance on how to improve our knowledge and career development.
6. What is the best thing the instructor did to help you learn, and what should the instructor improve in this course?	Dr. Aliyar was very knowledgeable on all of the topics related to public health and food policies. The best he did to help me learn was providing the informational presentations. I think the only improvements for this course should be the classroom location and timing. It was pretty loud in the beginning of the semester with the band playing, and it was really cold towards the end of the semester. As for timing, I think it would be beneficial to Dr. Aliyar and his audience that there is a 5 or 6 minute break implemented every so minutes.
7. With reference to technology, tutorial support, and the prerequisite for this course, if applicable, what changes would you suggest to the University to make this a better course?	Maybe making the class 3 1/2 hours instead a full 4. 4 was not terrible but maybe next time implement breaks so your voice can rest and students can have a little break as well.
