Dr. Aliyar Fouladkhah
Department of Agricultural and Environmental Sciences
College of Agriculture
Tennessee State University
Nashville, TN.

Re: Annual Performance Evaluation.

Dear Dr. Fouladkhah:

This letter is in reference to your 2020-2021 annual performance evaluation. Your level of performance in extension and outreach activities based on your well-established program, your research and scholarly publications, and your strong national/international reputation have been excellent during this evaluation period. Your state and national leadership in the area of food safety regulations, external collaborations, and attracting grants is superior. Your scholarly publications, lab research, and student mentorship is well recognized.

Thank you for your extraordinary accomplishments. Your performance is especially commendable considering the impacts of COVID-19 and tornado damage to your research facilities. We appreciate your dedication to your extension, research, and scholarly work, and we trust that you will continue your excellence as an Extension specialist, scientist, and academic advisor.

If you need our assistance with any of your extension, research, and academic efforts, please feel free to contact us.

Sincerely,

Latif Lighari
Latif Lighari, Ph.D.
Associate Dean for Extension
College of Agriculture
