

Automation

Fast. Smart. Reliable

Capability Statement

FastLogix Automation is an industrial automation contractor specializing in the material handling industry. Our engineering and commissioning team brings over 30 years of combined experience delivering automation solutions across North America.

Our mission is to deliver engineered automation solutions that improve reliability, performance, and scalability for modern material handling operations through disciplined engineering, structured execution, and longterm partnerships.

We have successfully delivered complex automation projects for leading organizations including UPS, FedEx, Walmart, Bath & Body Works, Harbor Freight, Aegis Sortation, Saint-Gobain, Acerinox, and Danieli Group, with deployments across the United States, Canada, and Mexico.

Core Capabilities

1. Industrial Automation Design & Engineering

- » PLC-based control system design and programming.
- » SCADA and HMI development

2. Material Handling Systems

- » Conveyor control systems
- » High-speed sortation systems
- » Print & Apply labeling systems

3. Platforms & Technologies

- » Rockwell Automation
- » Schneider Electric
- » Visualization Platforms: AVEVA, FactoryTalk View, InduSoft, Pro-Face, PanelView, Vijeo Designer, Ignition

4. And so much more to include:

- » Motor control panel design & fabrication
- » Electrical Field installation
- » Network Architecture design
- » System Commissioning / Startup / Standby

FASTLOGIX

Automation

Fast. Smart. Reliable

Past Performance

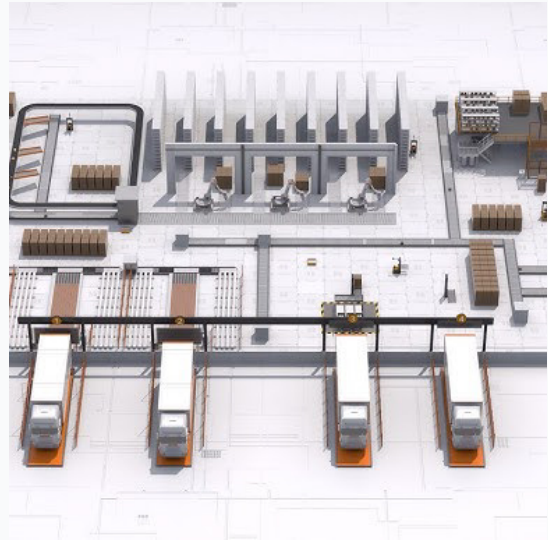

Retail Distribution

(Walmart & Bath and Body Works)

Designed and programmed Print and Apply Systems, Camera Scanner Interfaces, gappers, and conveyor systems.

Specialized in Schneider Electric and Rockwell Automation platforms in collaboration with partners.

Successfully deployed to 30+ sites throughout North America.

Parcel & Logistics

(UPS & FedEx)

Programming and Commissioning of small and large automation projects and conveyor sortation systems using Rockwell Automation.

Airport Baggage

Outbound and Inbound Systems improvements including makeup units, mergers, and motor upgrades in partnership with other companies.

Automation

Fast. Smart. Reliable

Why Choose Us?

Deep Material Handling Expertise

Specialized focus on conveyor and high-speed sortation systems, with hands-on experience across parcel, retail distribution, and airport baggage handling industries.

End-to-End Delivery

From system design and programming to installation, commissioning, and long-term support—providing a single point of accountability throughout the project lifecycle.

Platform Versatility

Proven expertise across both Rockwell Automation and Schneider Electric ecosystems, allowing seamless integration into existing client standards.

Scalable, Multi-Site Deployments

Demonstrated success delivering standardized automation solutions across 20+ sites in North America, ensuring consistency and repeatability.

Engineering-Driven Execution

Strong emphasis on structured engineering practices, documentation, and testing—reducing risk and improving system reliability.

Rapid Commissioning & Startup Support

Field-proven commissioning approach that minimizes downtime and accelerates go-live timelines.

Custom Tools & Simulation Capabilities

In-house development of 3D simulations and software tools (C#, C++, Python) to validate designs, optimize performance, and reduce commissioning issues.

Client-Centric Approach

Collaborative partnerships with integrators, OEMs, and end-users to deliver tailored solutions aligned with operational goals.

Fast. Smart. Reliable
