Dog Information

Call Name: 4 *Breed:* English Springer Spaniel

Registered Name:

Reg Number:

Sex F *Birthdate:*3/1/2015

AMGL Case #: 106666 *DNA Source:* FTA-swab

Testing Date: 4/15/2015

Test Run: PRA – Progressive Retinal Atrophy *Result:* CARRIER

Explanation of results:

NORMAL: This dog has tested normal (or clear) for the mutation causing the cone-rod form of PRA prevalent in this breed. It can only transmit a normal gene to offspring, and can be bred to a dog with any test result without producing affected offspring.

CARRIER: This dog has tested as a carrier for the mutation causing the cone-rod form of PRA prevalent in this breed. It is very unlikely to develop this form of PRA, but it may transmit either a normal gene or an affected gene to offspring.

AFFECTED: This dog has tested as an affected for the mutation causing the cone-rod form of PRA prevalent in this breed. It is at risk for developing clinical symptoms of PRA at some point in its lifetime. We do not presently have a way to predict when symptoms may appear.

Additional details available online at www.CanineGeneticDiseases.net, in PRA section.
