Organising a screening event is as simple as getting a group of people together in a location of your choice and you need as little as: a high-quality digital copy of the film(s), a laptop, a projector, and a good sound system.

Extension cords and tape are must-haves for outdoor events; make sure wires are kept as far as possible from seating arrangements and pay attention to keeping power stations dry.

That- plus some obligatory popcorn and snacks is everything you need to set up a great event involving beautiful and important films selected for important conversations!
