## Safety

WyoDak Energy Services has an extensive safety program and a full time safety department on staff. We take pride in keeping our employees safe, keeping our A rating in ISNetworld and our Total Recordable Injury Rate (TRIR) of 0. WyoDak's drug & alcohol program along with testing services provided through DISA ensure we have a drug-free workplace. Each job we complete requires a daily Job Safety Analysis (JSA) Report and a Plan of the Day (POD). Our employees have received PEC and/or OSHA safety training along with basic First Aid/CPR certification. Annual refresher courses are required for all employees who have received training. In addition, we have employees who have completed Competent Person certification. WyoDak Energy Services commitment to safety is reinforced by our Stop Work Authority and Field Observation Reporting Card (FORC) programs.

## Technology

WyoDak Energy Services goal is to meet the demands of our customers and the industry. Working faster and smarter is critical. Grade control is a must have tool for maximizing productivity and with the John Deere Topcon system, WyoDak is equipped to take on projects with greater accuracy and productivity. Topcon allows operators to dig exactly to design grade, tackle complex designs with ease, eliminate over digging, reducing rework, eliminate jobsite staking and work 25 to 30% faster than using a conventional machine, all of which means more profit in your pocket. Drone capabilities provide accurate measurement on many projects making sure customer quantities are met and accounted for.

## Road Building and Reconditioning

WyoDak's ability to grind native materials in place utilizing our Terrex 950B helps keep costs down for projects requiring full depth reclamation. It reduces the amount of imported materials by utilizing existing rock in the grinding process. It also has the ability to consistently mix any desired road stabilization polymers requested by the customer.
