

Product Selection Guide

EcoStruxure™ Building
Integrated building management system

Unlock building value, unleash productivity

Next generation EcoStruxure™ Building from Schneider Electric is The Open Innovation Platform of Buildings – a collaborative Internet of Things (IoT) solution that features a scalable, secure and global architecture to create future-ready smart buildings.

EcoStruxure Building securely connects hardware, software, and services over an Ethernet IP backbone to:

- Maximize building efficiency
- Optimize comfort and productivity
- Increase building value

EcoXperts™ and other system integrator partners also benefit from many new deployment tools to achieve:

- Up to 30% increase in engineering efficiency
- Up to 20% faster commissioning and installation
- 10x more scalability for large and multisite building needs

The Connected Room Solution delivers buildings of the future

Our latest IP-enabled hardware and software helps create engaging environments with personalized comfort and increased operational and energy efficiency. Harness the power of today's smart buildings and the IoT to:

- enable Building Owners to **future-ready** their building's infrastructure for easier expansions & retrofits
- offer a **personalized experience** to Tenants and Occupants
- enable System Integrators to **increase project capacity** and cost-competitiveness

EcoStruxure Building delivers Innovation At Every Level

EcoXpert™ Partner Program

One Program. One Network. Endless Opportunities.

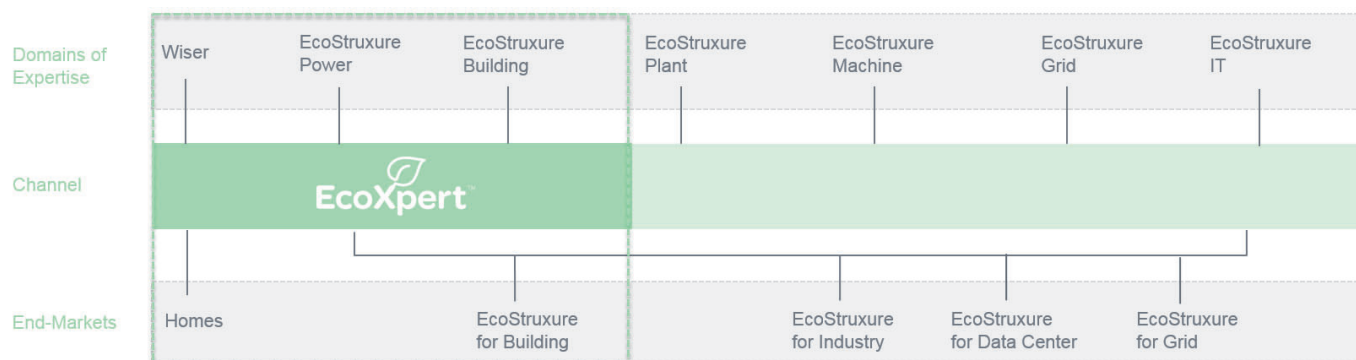

Innovating smarter buildings, more reliable infrastructures, and optimized efficiency.

At Schneider Electric, we constantly look beyond the norm to provide innovative solutions, both in technology and in the way we do business. That's the idea behind the EcoXpert™ Partner Program – an esteemed partnership between Schneider Electric and more than 3,000 of the world's leading technology providers with best-in-class systems integration competencies. Working with partners we trust is as important to us as it is to our customers. Spanning more than 50 countries, EcoXpert companies are certified on our IoT-enabled EcoStruxure™ architecture and platform, enabling them to deliver innovative and sustainable solutions, through integrated technology and digitization, to our shared customers.

Our mission is to connect expertise, ignite growth and enable success for our EcoXpert partner companies, because together we deliver best-in-class services and solutions to our valued customers.

The EcoXpert Program enables our certified partners and valued customers to share in the experience of ensuring that **Life Is On** everywhere, for everyone, and at every moment.

Our EcoXpert partners are the implementation arms of EcoStruxure in Homes and Buildings

Flexible, personalized user workspace

EcoStruxure solution provides an attractive, modern interface that can be organised by individual users to suit their needs. These preferences follow users regardless of where they log on. The information each user can access, such as graphics and alarms, can be managed at the job function, or individual level for added security and accountability.

EcoStruxure™ Building Operation

EcoStruxure™ Building Operation software is the edge control heart of the EcoStruxure Building system to monitor, manage and control building systems. With an open integration platform, it securely facilitates the exchange of data from both Schneider Electric and third-party energy, lighting, HVAC, fire safety, security and workplace management systems to create future-ready smart buildings.

Enterprise Central dedicated supervisory server at the top of the EcoStruxure Building system architecture can integrate up to 10 Enterprise Servers, hosting as many as 2,500 SmartX Edge Servers (AS-P and AS-B) to easily scale operations management across the largest buildings, campuses, and multisite real estate portfolios from a single location.

Enterprise Server, the Windows® applications version of the Building Operation Server, is the single point of administration through WorkStation, WebStation, and mobile applications. Enterprise Server collects site-wide data and configures, controls and monitors the entire system. It generates aggregated reports, standardizes critical security policies, normalizes alarm presentation and prioritization, and audits activity across the entire organization.

SmartX Edge Servers at the edge control level of the architecture are automation servers for use in any application. Including the AS-P and AS-B versions, SmartX Edge Servers feature dual Ethernet ports to elevate BACnet field bus communication to the IP level to modernize existing building management systems while keeping in place existing field buses and devices.

WorkStation interface provides users and engineers with access to SmartX Edge Servers and Enterprise Servers to view and manage graphics, alarms, scheduling, trend logs and reports. WorkStation now offers a new array of engineering efficiency tools and features to speed administrative functions, including standard applications, mass change/mass update; custom types and libraries, and more.

WebStation user interface provides a truly mobile experience for anytime, anywhere access to commonly used functions of EcoStruxure Building Operation on any platform without the installation of additional software. Developers can now engineer once and the workspace automatically adapts the same high-quality user experience for desktop, tablet and mobile devices, saving valuable engineering time and resources.

Smart Connector is an open, extensible and configurable application framework that allows developers to create innovative new capabilities, applications and solutions that extend and enhance EcoStruxure™ Building. Smart Connector infuses a new level of flexibility and openness by enabling rapid, repeatable, and flexible integration with third-party systems or other data sources systems.

SmartDriver is a custom driver for connection with other intelligent building devices that use non-native protocols (available with Building Operation v1.8.1 and later versions).

EcoStruxure Energy Expert is an embedded software module that enables energy usage to be monitored, and managed in the same system as HVAC, lighting and fire safety. Designed specifically for non-electrical experts in buildings with non-critical power needs.

Part Number	Product Name	Description
Enterprise Central		
SXSWECXX00005	Enterprise Central - 5	The Enterprise Central is the Windows® application that aggregates and archives data from up to 5 EcoStruxure Enterprise Servers
SXSWECXX00010	Enterprise Central - 10	The Enterprise Central is the Windows® application that aggregates and archives data from up to 10 EcoStruxure Enterprise Servers
Enterprise Server		
SXSWESXX00010	Enterprise Server - 10	The Enterprise Server is the Windows® application that aggregates and archives data from up to 10 EcoStruxure SmartX Edge Servers
SXSWESXX00050	Enterprise Server - 50	The Enterprise Server is the Windows® application that aggregates and archives data from up to 50 EcoStruxure SmartX Edge Servers
SXSWESXX00100	Enterprise Server - 100	The Enterprise Server is the Windows® application that aggregates and archives data from up to 100 EcoStruxure SmartX Edge Servers
SXSWESXX00250	Enterprise Server - 250	The Enterprise Server is the Windows® application that aggregates and archives data from up to 250 EcoStruxure SmartX Edge Servers
SXSWASES00001	ES Hosting AS Pack -1	Allows the addition of one more SmartX Edge Servers than were supported by the original Enterprise Server purchased
SXSWNDES00010	ES Hosting AS Pack - 10	Allows the addition of 10 more SmartX Edge Servers than were supported by the original Enterprise Server purchased
SXSWNDES00005	ES Hosted Node Pack - 5	Allow the addition of 5 servers or controllers to any of the interfaces supported by the Enterprise Server
SXSWNDES00010	ES Hosted Node Pack - 10	Allow the addition of 10 servers or controllers to any of the interfaces supported by the Enterprise Server
SXSWNDES00025	ES Hosted Node Pack - 25	Allow the addition of 25 servers or controllers to any of the interfaces supported by the Enterprise Server
SXSWNDES00050	ES Hosted Node Pack - 50	Allow the addition of 50 servers or controllers to any of the interfaces supported by the Enterprise Server
SXSWNDES00100	ES Hosted Node Pack - 100	Allow the addition of 100 servers or controllers to any of the interfaces supported by the Enterprise Server
SXSWNDES00300	ES Hosted Node Pack - 300	Allow the addition of 300 servers or controllers to any of the interfaces supported by the Enterprise Server
SXSWNDES00600	ES Hosted Node Pack - 600	Allow the addition of 600 servers or controllers to any of the interfaces supported by the Enterprise Server

EcoStruxure™ Building Operation (continued)

Part Number	Product Name	Description
Clients		
SXWSWCLIENT0001	Building Operation Client - 1	Fully featured environment for operating and administering all aspects of the system – 1 seat
SXWSWCLIENT0005	Building Operation Client - 5	Fully featured environment for operating and administering all aspects of the system – 5 seats
SXWSWCLIENT0010	Building Operation Client - 10	Fully featured environment for operating and administering all aspects of the system – 10 seats
SXWSWCLIENT0025	Building Operation Client - 25	Fully featured environment for operating and administering all aspects of the system – 25 seats
SXWSWCLIENT0999	Building Operation Client - unl	Fully featured environment for operating and administering all aspects of the system – Unlimited seats
Driver		
SXWSWSDRV00001	Smart Driver License	Allow "drivers" to be deployed, loaded and run on the Enterprise Server and the SmartX Controller - AS-P
Engineering Tools		
SXWSWORK00002	WorkStation Professional	A full environment for operating and engineering all aspects of EcoStruxure Building Operation
SXWSWEDIT00001	Editors	An environment that provides the ability to edit graphics, script programs and function block programs.
Add-On Features		
SXWSWSNMP00001	SNMP Alarming	This option provides support for SNMP alarm traps v3.0 notifications on any EcoStruxure Building server.
SXWSWEWSX00001	EWS 1	A common integration method to other Schneider Electric systems and services. Consume
SXWSWEWSX00002	EWS 2	A common integration method to other Schneider Electric systems and services. Consume and serve
SXWSWEWSX00003	EWS 3	A common integration method to other Schneider Electric systems and services. Consume, serve and gather history
SXWSWGWSX00001	GWS	An integration method to other systems and services
SXWSWDASH00001	Personal Dashboards license	Enables Personal Dashboard feature on one Enterprise Server or Enterprise Central
SXWSWECDBTS001	TimescaleDB connection license	Enables high capacity historical storage in TimescaleDB on one Enterprise Central
SXWSWESDBTS001	TimescaleDB connection license	Enables high capacity historical storage in TimescaleDB on one Enterprise Server
EcoStruxure Energy Expert		
PSWPMNCZZSPEZZ	Energy Expert Base	Energy Expert software module license for a PC server (no maintenance subscription included)

(*) Only supported by Managed Device / BYOD Customized deployment method.

(**) Supported by Managed Device / BYOD Customized and Generic: this requires an unlimited devices deployment license.

Automation Server Family of Modules

SmartX Edge Server – AS-P

The SmartX Edge Server – AS-P is a EcoStruxure server device at the Edge Level of the architecture. With superior performance, the AS-P simplifies system integration and transition, and is the preferred choice for large, complex enterprise applications.

SmartX Edge Server – AS-P

The SmartX Edge Server – AS-P and AS-B feature dual Ethernet ports to elevate BACnet field bus communication to the IP level. Modernize the BMS while keeping in place legacy field buses and devices to future-ready current systems and move buildings into the 21st century!

*Notes: EcoStruxure solution installations or BMS transitions requiring UL-864 certifications must use the SmartX Controller AS-P-SMK (listed above).

SmartX Controller - AS-P and AS-B conform to the BACnet® Building Controller (B-BC) profile at protocol revision 12 by the BACnet Testing Laboratories (BTI®). StruxureWare™ Building Operation v1.9 is the certified firmware revision.

Automation Server Family of Modules

Power Supply and Module Terminal Bases

The PS-24V is a power supply module that accommodates 24 VAC or 24 VDC input power. Each power supply module delivers reliable and consistent output power of 24 VDC to the backplane. It can deliver power to the AS-P and a number of I/O modules calculated from the Power Budget Table (located below). If more I/O modules are needed, another power supply can be added to the bus. The power supplies are isolated from each other while also providing communication pass-through.

PS-24V
Automation Server Power Supply

Part Number	Product Name	Description
SXWPS24VX10001	PS-24V	Power Supply 24 VAC or 21-30 VDC
SXWTBPSW110001	TB-PS-W1	Terminal Base Power Supply (Terminal Base required for each power supply)
SXWTBASW110002	TB-ASP-W1	Terminal Base AS-P (Terminal base required for each AS-P)
SXWTBIOW110001	TB-IO-W1	Terminal Base I/O (Terminal Base required for each I/O module)

I/O Module
Terminal Base and Module Detail

NOTE: An appropriate terminal base is required for each module, including the AS-P, Power Supply and I/O Modules. See the above table for the correct part numbers.

Please refer to the appropriate Data Sheets for more information.

Automation Server Family of Modules

I/O Modules

The Automation Server includes support for a broad spectrum of I/O modules. The variety of modules available ensures the right combination of points for any project, which keeps costs down for our customers. Some modules are available with Hand/Off/Auto (HOA) switches to provide override control of the outputs.

Automation Server Family of Modules

SmartX Edge Server – AS-B

The SmartX Edge Server – AS-B is the most compact, all-in-one BMS. It features flexible on-board universal I/O configurations and built-in power supply. An EcoStruxure server device, its powerful, compact design is ideal for small-to-medium main plant control applications. It offers lower total installation costs.

SmartX Edge Server – AS-B

Note: Screw terminal blocks for the AS-B and AS-BL must be ordered separately. Please find the AS-B Connector Kit part number in the Accessories section on page E16.

*Notes: EcoStruxure Building installations or BMS transitions requiring UL-864 certifications must use the SmartX Edge Server AS-P-SMK (see page E6).

SmartX Edge Server - AS-P and AS-B conform to the BACnet® Building Controller (B-BC) profile at protocol revision 12 by the BACnet Testing Laboratories (BTL®). EcoStruxure™ Building Operation v1.9 is the certified firmware revision.

Automation Server Family of Modules

Accessories

The following accessories are available for the Automation Server Family of modules.

Part Number	Product Name	Description
SXWDINEND10001	DIN-RAIL-CLIP-25	DIN-Rail End Clip, package of 25 pieces
SXWTERLBL10011	PRINTOUT-A4-W1	A4-Size blank printable adhesive label sheets for terminals (100 Sheets, 18 labels per Sheet)
SXWTERLBL10012	PRINTOUT-LTR-W1	Letter-size blank printable adhesive label sheets for terminals (100 Sheets, 16 labels per Sheet)
SXWSCABLE10002	S-CABLE-L-1.5M	S-Cable extension cord for Automation Server I/O bus, L shaped connectors, 1.5 m
SXWSCABLE10003	S-CABLE-L-0.75M	S-Cable extension cable for Automation Server I/O bus, L-shaped connectors, 0.75 m
SXWASBCON10001	AS-B connector kit	Screw terminals for all AS-B models. Note: Ordered separately, not delivered with the controller
SXWASBINS10001	AS-B installer kit	Dummy unit, no electronics, just terminals. Supports easy wiring in the panel shop
SXWUSBADP10001	USB-485-INET Interface Adapter	I/NET Adapter: Separate hardware component, added to a SmartX Controller - AS-P or Automation Server

SmartX Edge Server add-on options

Add-on option part numbers are required to activate certain features. SmartX Servers require an embedded license to activate features. An embedded license is not interchangeable with a Windows license.

Part Number	Product Name	Description
SXWSWSNMPX0001	EBO SNMP Alarming - SmartX	Alarm notifications via SNMP – SmartX Server
SXWSWEWSXX0001	EBO WS EWS Consume - SmartX	EcoStruxure Web Services (run-time) option – Consume only – SmartX Server
SXWSWEWSXX0002	EBO WS EWS C+Serve - SmartX	EcoStruxure Web Services (run-time) option – Serve & Consume – SmartX Server
SXWSWEWSXX0003	EBO WS EWS C+S+Hist - SmartX	EcoStruxure Web Services (run-time) option – Serve & Consume, plus Historical trend log data – SmartX Server
SXWSWGWSXX0001	EBO WS Gen Consume - SmartX	Web Services (Generic Consume) option – SmartX Server
SXWSWDASHX0001	Personal Dashboards - SmartX	Built-in dashboard functionality which enables users to create their own pages to get an overview of how buildings perform – SmartX Server
SXWSWASDBX0001	Timescale DB Option - SmartX	Integration of an open, external SQL database for long term data and audit trail storage – SmartX Server
SXWSWCLIEX00001*	EBO Client - 1 - SmartX	WebStation, 1 concurrent user license for use at the SmartX Server only
SXWSWCLIEX00005*	EBO Client - 5 - SmartX	WebStation, 5 concurrent user license for use at the SmartX Server only

* An embedded client license that will be activated on a SmartX Server will always allow for the operation of a WebStation only. In order for WorkStation to operate it must have access to a Windows license on a PC that is running a Windows OS. Since WorkStation software requires a Windows operating system, then the license might be installed on the same PC or it might make use of a demo license.

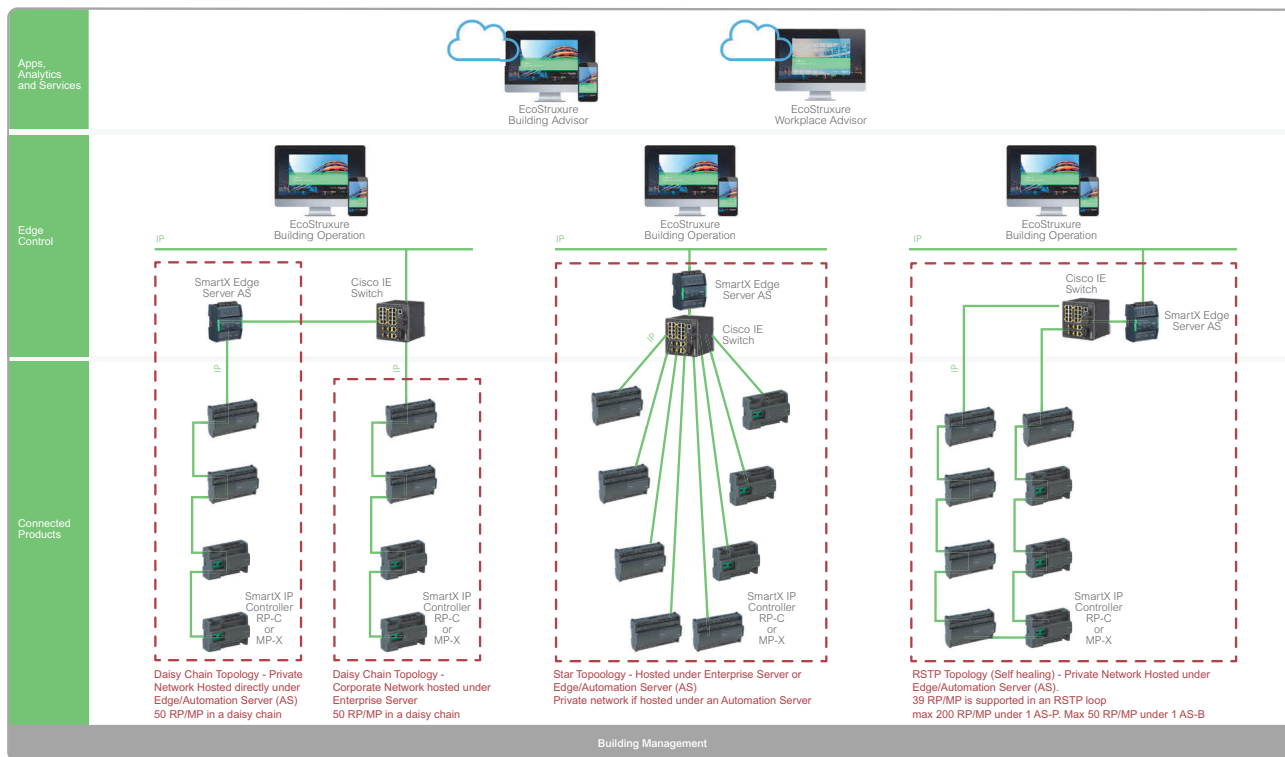

SmartX Advanced Display

Portable or permanent-mount tablet HMI specifically configured to interact with EcoStruxure Building user interfaces.

Part Number	Product Name	Description
SXWADBUND10002	Advanced Display 10-inch Bundle	Includes tablet, mounting frame, and bezel
SXWADUSBA10001	USB cable, 1.5 m (5 ft)	For connection to AS-P or USB power adapter
SXWADUSBA10002	USB cable, 3.0 m (10 ft)	For connection to AS-P or USB power adapter
SXWADUSBB10001	USB cable, Y-shaped, 1.5 m (5 ft)	For connection to automation server and USB power adapter
SXWADUSBB10002	USB cable, Y-shaped, 3.0 m (10 ft)	For connection to automation server and USB power adapter

Reference Architecture

SmartX IP Controllers

SmartX IP Controller

RP-C HVAC

Room Purpose Controller for HVAC (RP-C HVAC) gives occupants the ability to control the room environment and personalize comfort while serving as a data hub for IoT devices. It leverages the latest wireless technologies for easy integration of IoT devices and fast installation. It is built on a flexible architecture that enables deployment with EcoStruxure Building Operation or any BMS.

SmartX IP Controller RP-C HVAC

SmartX IP Controllers – RP-C HVAC

The RP-C for HVAC controllers are designed for fan coil, chilled beam and ceiling based systems. These scalable and secure BACnet IP-based room controllers enable connected room solutions. With an open IoT hub, it meets customers' future needs, including light and blind control and easy re-zoning. Also save time by managing commissioning conveniently with the SmartX eCommission Mobile App.

SmartX IP Controller, continued

SmartX IP Controllers – IP-IO Series

As a network level IO resource the IP-IO Series is capable of sharing its local IO resources across one or multiple SmartX IP Controllers or EcoStruxure Building Edge Servers over BACnet network.

SXWMPVCON10001

SmartX Living Space Sensor

SmartX sensors use an RJ-45 sensor bus that provides communication and power from the SmartX IP Controller. For quick installation, up to four SmartX sensors may be connected to each SmartX IP Controller through the RJ-45 sensor bus using Cat 5/6 cable (22 to 26 AWG).

With the exception of two sensor bases which include covers, sensors are ordered in two parts: the sensor base and the cover. Four sensor base models can be paired with any one of six covers.

SXWSCDXSELXX

SXWSC3PSELXX

SXWSATXXXSLX

SXWSCDPSELXX

SmartX Living Space Sensor – Bases

Part number	Description	Temp	Humidity	CO2	LCD Display	Cover	Communication

*Touch Display supports user access to the following settings: HVAC mode (Cooling/Heating/Auto), Setpoint adjust, Override and Fan (On/Off/Auto)

SmartX IP Controllers – Accessories (continued)

Actassi Structured Cabling Solution

Actassi connectivity work seamlessly with SmartX IP Controllers. Get simple installation and ease of engineering deployment with a single source for BMS and network cabling needs. These physical network infrastructure solutions offer reliable and scalable SmartX IP backbone that enable a responsive BMS network.
