System Design

Frames that create space

Innovative ideas, inspiration, interiors and living space – for the individual.

"Life is On" – this is the philosophy that Schneider Electric lives by.
It applies to both the Schneider Electric brand and the requirements of
the modern homeowner.

System Design

Maximum space – minimum frame. The new
System Design switch range from Schneider
Electric offers the ultimate in switching
functionality without compromising on design.
D-Life – with frames ranging from one to five
inserts – is the frame design in the System
Design range.

D-Life

The new D-Life frame design uses high-quality
materials to promote maximum creativity.
A discreet design, with no central bridge
piece, helps you implement your vision and
create living spaces that are full of character.
Persuasive elegance with practical inserts that
sit perfectly flush in the frame.

Schneider Electric embodies pure design.
High-quality materials, and no dividers.

D-Life

A complete range of stylish finishes: The new D-Life frame colors perfectly match the range's discreet look.

Brilliant lotus white. Warm sahara. Mellow anthracite, or the elegance of stainless steel.
D-Life – inspiration from the very first moment.

Perfectly defined:
Low-profile inserts, minimal gaps, for a frame that looks great on any wall.

"The freedom to express my individuality …"

"Relaxation begins with a sense of well-being …"

D-Life Glass, crystal white

D-Life Glass, onyx black

D-Life Stone, slate polished

D-Life Glass and Stone

Natural charm: Featuring authentic materials like glass and stone, D-Life frames are perfect for rooms that demand a new level of character.

D-Life Glass and D-Life Stone bring interiors to life – unmistakable vitality, indisputable charm.

The support emphasizes the light properties of natural materials like glass and stone.

D-Life Metal

Metal is robust. It conveys stability. D-Life Metal – a distinguished design that combines strength and beauty.

Cool nickel. Sensual champagne. Earthy mocca. Classic monochrome or in contrasting combinations. D-Life Metal is more than just a design detail, it's a bold statement.

The D-Life range features both metal frames and inserts - for a difference you can really see and feel.

"Life can be hectic and unpredictable. D-Life gives my living space stability, calm, and equilibrium...."
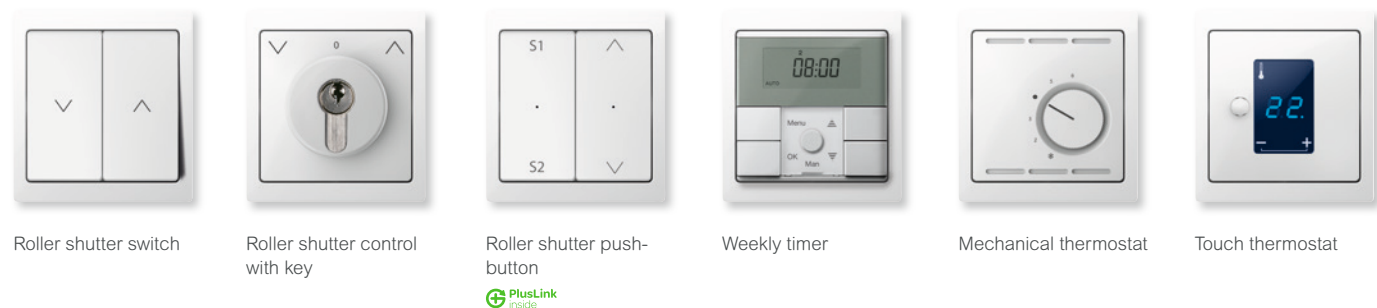

System Design

The new System Design range introduces a new, contemporary design, which opens up a world of possibilities with special emphasis on simplicity and purity. Its functions make your space more comfortable, safe and energy efficient.

More freedom with System Design

System Design is compatible with all technologies – whether you want to control your lights and shutters individually with a conventional installation, connect to a system with PlusLink electronic inserts or control the building with KNX.

Control single functions like lights and shutters with conventional installations

Do you, like many others, prefer a traditional installation? System Design meets your requirements reliably and offers a wealth of innovative functions.

PlusLink inside

Control light and shutters in the whole room at once

The electronic inserts are equipped with PlusLink inside, a technology that simply makes more of your conventional installation. They offer powerful individual functions, which can be controlled remotely from a smartphone or easily and cost-effectively connected to create convenient room control systems.

KNX

Control your building with KNX

KNX combines building functions in one intelligent system. That means improved comfort, security and efficiency. System Design offers all functions and provides you with an intelligent framework.

Comfortable living with smart devices

The new System Design range from Schneider Electric offers more than switches and socket-outlets. Its numerous intelligent products are easy to implement and provide solutions that increase comfort, safety and connectivity in your home.

USB charger, Schneider Electric connector RJ45 and socket-outlet with labeling field

(6) Well organized

Multi-insert frames offer every function you could need in your home office. The USB charger simultaneously loads your smartphone and tablet PC, so there is no need for a separate charger. Data and communication outlets mean you are always connected and online.

(1) Convenient light control

The switch with indicator light is very useful for all rooms where the switch is installed outside the door, such as bathrooms, storerooms or utility rooms. Thanks to the indicator light you won't forget to switch off the light when leaving the room.

Switch with indicator light

(2) Safe and useful

This socket-outlet comes with an increased protection against accidental contact. The hinged lid also provides protection from dust and hides the socket-outlet.

Socket outlet with hinged lid

(3) Comfortable shutter control

Open and close your roller shutters easily at the push of a button.

Roller shutter switch

(4) Pleasant temperature

Simple and intuitive room temperature control.

Room temperature control unit

(5) Waterproof

Perfect protection against water and dust when the socket-outlet is installed in bathrooms or outdoors.

Socket outlet with hinged lid IP 44

HDMI outlet

(9) Smart connection

Connecting your TV directly to a wall-mounted HDMI outlet makes annoying tangled cables a thing of the past and lets you enjoy a true home cinema experience.

Socket outlet with orientation light

(7) Night light

The socket-outlet orientation light gives you double safety. The socket-outlet is protected against accidental contact and the orientation light lights up your way in the dark.

(8) Innovative and elegant LED dimming

Modern LED lighting calls for reliable and elegant dimmers. The illumination behind the dimmer knob not only looks good, it also acts as orientation light.

Rotary dimmer illuminated

DimmerTool

The Schneider Electric app lets you conveniently match dimmers and lamps.
Available for smartphones and tablets.

Comfort control with PlusLink inside

The PlusLink electronic inserts offer powerful individual light and shutter control functions. Thanks to PlusLink technology they can also be connected to a simple and efficient room control system.

PlusLink inside

The PlusLink inside logo clearly identifies the components of the System Design electronic insert range that can be used to realize smart room solutions.

The modular structure of the electronic inserts and application module facilitate more than 100 single functions. The PlusLink input allows you to connect the single functions to a system. Connect all the dimmers in a room with a side controller and adjust your lights from a central point. Connected shutters can be lowered comfortably in the evening at the touch of a button. Thanks to the scene function all 2-gang push-buttons provide, you can easily call up a stored scene.

Single functions for local control (selection)

Light control	Shutter control	Time-dependent control	Movement-dependent control
Touch dimmer 2-gang with scene control	Roller shutter push-button with scene control	Timer	Movement detector

Room control system (using the example of shutter control)

Local shutter control	Local shutter control	Line control for all connected shutters
Roller shutter push-button	Roller shutter push-button with scene control	Timer
connected via PlusLink	connected via PlusLink	

Remote control convenience

The new Wiser application module and Wiser Room app transform your smartphone or tablet into a handy remote control, to ensure easy management of lighting and shutters in the home.

Customer advantages at a glance:

• Easy to operate lights and shutters using a smartphone or tablet via Wiser Room app
• Function modifications, e.g. time settings for shutter control activation via clear and intuitive app user interface
• Simple activation of random function (e.g. presence simulation) via user interface
• Clock time synchronization
• Use of scenarios with push-button module (even without scenario function button)

App available for IOS and Android

Single function or connected – PlusLink electronic devices for comfortable homes

Electronic inserts with PlusLink inside allow you to control lights and shutters separately or connect them to a system. Whether a single application or a complete room control system, PlusLink provides optimum comfort and safety.

① Simple light control

Switch or dim your lights locally with one device.

Push-button

PlusLink inside

② Set your light scene

The scene function offers exceptional comfort. It lets you call up two stored light scenes at the touch of a button.

Push-button with two scenes

PlusLink inside

③ Clever shutter control

Shutter control made easy. Open and close your shutters or store two shutter position scenes.

Roller shutter push-button with two scenes

PlusLink inside

Store scenes

Choose setting and push the S1 or S2 button for 3 seconds.

3 seconds

⑤ Remote control with smartphones and tablets

Wiser Application modules allow you to easily control lights and shutters using a smartphone or tablet.

Wiser Application module

PlusLink inside

Wiser Room app

Movement detector

PlusLink inside

⑥ Automatic light control

The movement detector switches on lights as soon as a movement is detected, and off again when nobody is in the room.
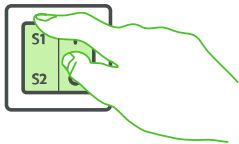

④ Automatic shutter and light control

The Timer lowers or raises your shutters automatically at the programmed time. This provides comfort as well as safety when you are not at home.

You can also switch your lights on or off at pre-programmed times, e.g. in your entrance or garden.

In touch with comfort

Intuitive controls, functional flexibility and a stylish design:
this is the new generation of KNX user interfaces.

KNX Multitouch Pro and KNX Push-button Pro

The new KNX Multitouch Pro and Push-button Pro user interfaces are the perfect addition to a modern KNX installation. They have a high-quality design that sits perfectly flush in a D-Life frame and feature an operating interface that

is similar in look and feel to that found on a smartphone or tablet. Incorporating innovative technology, this range delivers the ultimate in convenient operation and flexible control of lighting, shutters and temperature.

Find out more about KNX Multitouch Pro and KNX Push-button Pro, and discover all the available functions and applications in the brochure:
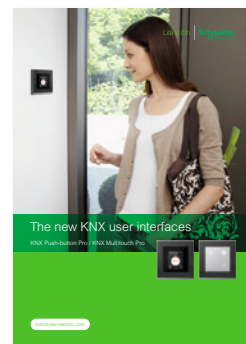

KNX Multitouch Pro and KNX Push-button Pro, D-Life Metal

The new KNX user interfaces
KNX Push-button Pro | KNX Multitouch Pro

KNX Multitouch Pro

The new KNX Multitouch Pro stands out thanks to its exceptional design. Its function control is similar to that of a smartphone or tablet. Swiping is used to achieve simple and intuitive switching between eight possible main functions. The unit offers a choice of two interface designs, vertical or rotary, which can also be used in combination.
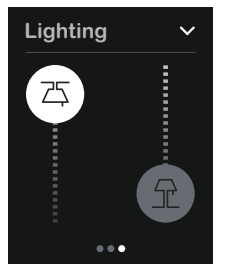

Special product features:

- Proximity sensor: Display illumination is activated automatically upon approach
- Gesture function: controls one previously defined function using a particular gesture
- Customizable screen saver
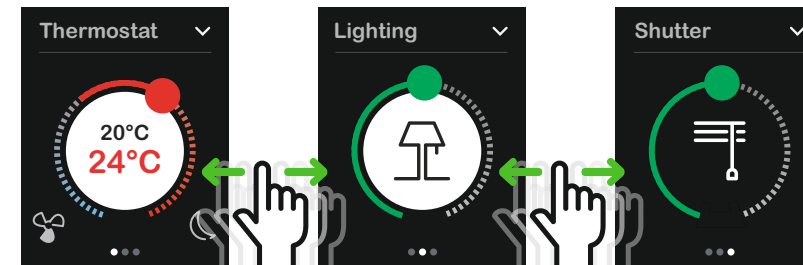

Swipe to switch between main functions
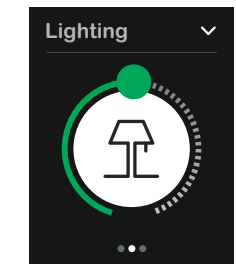

Lighting control – in rotary display mode
Uses a control-dial look and feel

Lighting control – in vertical display mode
Enables control of two functions per display

KNX Push-button Pro

High-quality design and intuitive operability – the new KNX Push-button Pro concentrates on what is essential.

The individual touch-sensitive zones of the sensor cover are shown using illuminated function icons that shine through the translucent surface and emphasize the high-quality look of the new push-button.

The sensor cover is available in in all the System Design colors.

Up to four light, shutter and scenario functions can be controlled using the KNX Push-button Pro. This means that, in combination with the KNX Multitouch Pro, it offers the perfect solution for intuitive and flexible room control at home or in commercial spaces.

Customizable

The foil set included with the KNX Push-button Pro interface allows you to clearly and professionally label basic functions. A blank carrier foil can also be used to add individual symbols as required.
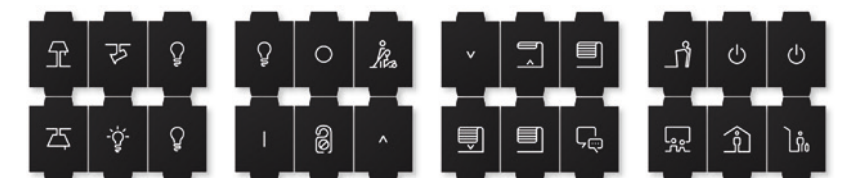

Individual symbols for use with carrier foil

KNX solutions for hotels

Hotels must meet varied demands. Simple and intuitive operation in the hotel rooms, automatic light and temperature control in public areas, as well as maintenance and control of the building functions. KNX and System Design fulfill these requirements and offer high-quality, sophisticated design.

KNX Push-button Pro, socket-outlet, USB charger

① All in one

Thanks to the KNX Multitouch Pro you can control lighting, shutters and temperature via one device.

KNX Multitouch Pro

② Intuitive control

Plain, backlit icons make the lighting and shutter controls very intuitive.

KNX Push-button Pro

③ Automatic light and temperature control

More comfort and efficiency: Light and temperature are controlled automatically depending whether people are present.

KNX movement detector

④ Keycard reader
LED signal push-button

"Do not disturb", "Make up room": the status display is convenient for guests and staff alike.

Keycard holder,
KNX Push-button Pro

⑤ Well connected

Multi-gang frames offer guests every function they might need. KNX functions are cleverly combined with smart conventional functions. The USB charger can be used to simultaneously load a smartphone and tablet PC, so there is no need for a separate charger.

KNX Multitouch Pro

⑥ Lighting using scenes

Intuitive lighting control thanks to the rotary design. Scenes provide additional comfort in the bathroom.

⑦ Remote control via mobile device

spaceLYnk connects building control functions achieving complete building management. The intuitive spaceLYnk interface can be accessed locally or remotely at any time, making it easy to monitor and control building functions.
