

Stop ransomware in its tracks

As a technology provider that focuses on security, we understand that cyberthreats are more targeted than ever, and are increasing in velocity. And we know that protecting against ransomware is a top priority for businesses like yours—and that old cybersecurity solutions no longer work in today's hyperconnected, work-anywhere world. The good news? **We can help.**

We recommend Microsoft Security solutions to all our customers

No matter how big or small your company—or what industry you work in—we recommend Microsoft Security solutions. And when it comes to ransomware, we know that these solutions can protect your entire business, in real-time.

Email	Endpoints	Identities	Cloud Workloads	Cloud Apps
Phishing	Unmanaged devices	Account credentials	Services stopped	App access
URL links	File encryption	Infrastructure	Backups deleted	Data exfiltration
Attachments	Compromised data	Workload identities	File encryption	

Choose Microsoft SIEM and XDR

The key to effective protection against ransomware is opting for the right security information and event management (SIEM) and extended detection response (XDR) systems. And that's exactly what Microsoft does.

Microsoft Sentinel

Gain visibility and manage threats across your entire digital estate with a modern SIEM

Microsoft XDR

Stop attacks and coordinate response across assets with XDR built into Microsoft 365 and Azure

Microsoft Defender Threat Intelligence

Expose and eliminate modern threats using dynamic cyberthreat intelligence

Block ransomware before it harms your business

1. Prevent

- Industry-leading ransomware prevention¹
- Threat-based configuration recommendations
- AI and machine learning automatically stop threats

2. Detect

- AI-driven detection stops progression immediately
- Works across devices, identities, apps, email, data and cloud workloads

3. Respond

- A unified investigation and remediation experience
- A centralized command and control center with Microsoft Sentinel
- Get back to work fast with automated data backup

Put Microsoft Security to work for your business

60%

lower risk of a material breach¹

88%

reduction in time to mitigate threats²

75%

security analyst time freed for more important projects³

Let us help you get started

As a Microsoft partner with years of experience providing security solutions, we want you to get the very best ransomware protection for your business. We've helped hundreds of customers protect their businesses against ransomware attacks. Let's have a discussion about how we can provide you with actionable next steps to protect your company—efficiently and cost-effectively.
