

# Coastal Resilience Community Workshop Series

## WORKSHOP #1: UNDERSTANDING DUNE AND BLUFF SYSTEMS

Learn about coastal dune and bluff systems in your community. Gain an understanding of coastal landforms, processes, and human impact. Share and hear experiences of coastal erosion impacting local assets, resources, and landscapes.

Tuesday  
September 22,  
5:00 - 7:00 P.M.  
Location: TBD

Intended Audience: Municipal Officials and staff, committee members and volunteers, and local stakeholders including impacted property owners

HCPC and Acorn Engineering invite you to join a 3-part workshop series focused on coastal resilience planning. The full series will run through November 2026 and will provide a background on dune and bluff systems, stabilization methods, regulatory considerations and will explore practical applications through a site visit.
