

1979 MGB

Bought new and owned by person in Anniston, Al. It is showing a few miles over 13000 and was bought believing that this was correct mileage...The car is in very good shape with what I believe is original paint. It does have slight damage on right front fender. A lot of parts have been replaced by the person I bought it from and also myself mainly because of being stored for so long. The car is ready for the road having new tires, brakes, fuel pump, fuel sending unit, clutch slave and master cylinder, new battery and more. The top has 1 small patch behind driver. Top was put down when I bought it and has been down ever since. Car is located in Gadsden, Al 35901

Asking \$7000.00
