

# HIVEGUARD™

---

HiveGuard™ is a proven proprietary blend of paraffin wax, microcrystalline wax and a special additive for enhanced performance of the formula. HiveGuard™ is currently used by many beekeepers in North America. It's optimal formula has many excellent benefits:

- Optimal wax formulation
  - maximum preservation & disease prevention
  - maximum penetration/impregnation
  - excellent adhesion
  - maintains flexibility to prevent cracking
  - up to 25 years durability
- Single component, simple to apply
- High temperature sterilization & stability
- Can re-dip/rejuvenate woodenware years later
- Complies with FDA regulations
- Long-term cost effective vs. the elements & diseases

HiveGuard™ replaces “unfriendly” chemicals such as rosin, solvents and paints to provide superior performance.
