

Dr. Persall recommends the iWellness Exam for every patient. This gives her a more in depth look at the layers of the retina and can help detect most eye diseases years before any signs or symptoms begin showing.

The iWellness exam can take the place of dilation if the retina looks healthy and the doctor sees no signs of diseases. If the doctor sees something that concerns her, she may still dilate, however, the iWellness Exam gives you the added advantage of avoiding dilation.

The \$39.00 fee is an up-front, out-of-pocket cost that is not covered by most insurance companies at this time. Please indicate below if you would like to have the iWellness Exam today.

Thank you.

I accept the iWellness Exam

I decline the iWellness Exam
