

## **Tamarind Health - stealth startup looking for a part time web / app / chatbot developer interns**

### **Who are we?**

We are Tamarind Health, a healthcare and wellness startup, looking for exceptionally talented college students who have experience in building websites, developing iOS or Android apps, and creating chatbots.

You bring your aspirations, talent, potential - and excitement for being a part of our journey. At Tamarind, Interns will work on real-world problems in collaboration with the founders across the world, while having fun along the way. You'll be empowered to build high quality code, explore your technical passions and achieve your goals. This is your chance to bring your solutions and ideas to life while working on current technologies. The internship is designed not only for you to do great work with the opportunity to learn and grow, but also to experience a startup culture full of community engagement and purpose driven mission.

And hey, we are a small company, still in our early days of failing-fast, moving-quick, and learning-it-all and our culture is centered around embracing a growth mindset. Does this sound like you? Are you ready to join us and create a wellbeing future? Come as you are, do what you love - start a journey with us today!

### **Responsibilities**

Explore Tamarind - is a 12-week internship program specifically for students in their bachelor's or undergraduate degree program who would like to grow their interest in software development through a project oriented program. Through this internship you will:

- Gain hands-on experience with various open source tools and programming languages in software development
- Work closely with a founding team to evaluate requirements, estimate costs, create and implement features/apps or services

### **Qualifications**

We are looking for anyone deeply engaged in or interested in becoming software developers for internship part-time only positions. You must be:

- Excited about designing, developing web applications or websites and writing apps and building bots
- Keen to work independently, be motivated by the healthcare space and willing to speak your mind and show your creativity with high quality coding skills.
- In a registered bachelor's degree program or undergraduate program
- Show interest, preferably in computer science, electronics or information science/systems
- Able to demonstrate knowledge of computer science
- You must have written apps or participated in hacks and be ready to send us your previous work
- Willing to go through an interview process

Tamarind is an equal opportunity employer. All qualified applicants will receive equal considerations for internship without regard to age, ancestry, social status, color, family or medical aspects, gender identity or expression, genetic information, marital status, medical condition, disability, political affiliation, race, religion, caste, sex, sexual orientation, or any other characteristic. As of now, we do not anticipate providing benefits/salaries/financial incentives for this internship. We will be providing a certificate of internship and associated letters of recommendation based on intern needs.
