

Senior Software Engineer. Cambridge, UK. UI

As a key member of the engineering team this Senior Software Engineer will make a significant contribution to setting the technical direction of the company's products and bringing high quality solutions to market.

This position focuses on the web UI for the JitsuIn IoT lifecycle assurance cloud services.

Key responsibilities

- Design, implementation and deployment of the JitsuIn cloud SaaS web UI
- Contributing to the software architecture
- Producing elegantly structured, secure, efficient, scalable, reliable code

Skills

The Senior Software Engineer will possess two or more essential, and a desire to learn others, from

- Design and maintenance of consistent and intuitive user experience
- Data visualization techniques
- Web UI development
 - GUI Frameworks (e.g. Angular, React, etc)
 - REST / gRPC APIs
 - Distributed microservices architectures
- Authentication & authorization
 - Azure PaaS
 - Cloud: SAML / OAuth / OIDC providers
 - On Prem: LDAP / AD
- DevOps, test automation and deployment

Nice to have

- IoT visualization experience

Required experience

- 3 years + in design and development of web UIs
- Track record of delivering high quality, user centric interfaces in an Agile development process
- Demonstrable experience of web UI development from conception to successful deployment

Qualifications

Bachelor's degree in related discipline

Desired attributes

- Proactive - Develops practical solutions, takes ownership, and has a 'can do' approach
- Technically Curious – Regards technology problems as challenges
- Teamwork – Engaged with the business, communicates openly, shares information and knowledge, networks internally and externally, persuades rather than pushes, involves and respects colleagues
- Creative – Connects the technical dots with a goal of building customer value
- Responsive - Always reacts quickly and with a sense of urgency in a timely and flexible fashion

Company Summary

Internet connected Things need maintenance to produce clean and reliable data for enterprise. Our vision is to align everyone in the value chain for safe, efficient and sustainable Internet of Things that create truthful data for man or machine to act with assured intelligence.

Jitsuin was founded by industry veterans with expertise in silicon chip security architecture, secure software development, cryptography and device manufacturing. The team applies blockchain technology to shared device lifecycle management as a foundation for truthful data, which enables autonomous smart contracts and open data markets to realize the true value of IoT.

Jitsuin means Truth in Things.

The problems we're solving

The Internet of Things has a problem with data silos – it's difficult for data to move across domains. The new data economy can only exist when all the devices producing the data are trusted to be safe and secure throughout their entire lifetime.

Jitsuin shared device lifecycle assurance is the crucial ingredient for sustainable industrial automation and connected living at scale.
