Q4 2024 Market Review – Chart of the Quarter

U.S. VS. INTERNATIONAL EQUITY MARKET VALUATIONS

The fourth quarter of 2024 continued the recent trend of U.S. equity markets outperforming international equity markets. While in recent years international equity markets have experienced a few periods of outperformance, U.S. markets have largely maintained their dominance. As shown in the chart below, the differential between U.S. and ex-U.S. equity market valuations on a forward P/E (price-to-earnings) basis highlights this trend. The valuation discount for international equities is now more than two standard deviations below its average over the past 20 years- the widest margin during this period. This indicates that international equities have not been this relatively cheap in a long time.
