

# Q4 2023 Market Review

## SUMMARY

- Equity and Fixed Income markets experienced very strong positive fourth quarter performance.
- U.S. Equity rose 12.1% (Russell 3000), with large cap tech stocks leading the way. For the year, large cap growth has outperformed large cap value by over 3100 basis points (42.7% vs. 11.5%).
- International equities rose to a lesser extent over the quarter, posting a 9.8% gain (MSCI ACWI ex U.S.).
- The broad U.S. fixed income market was also up, returning 6.8% (Bloomberg Barclays Aggregate) over the quarter.
- While the Fed likely finished raising rates, there was no indication of a rate cut, which is what market participants anticipate in 2024. This is dependent on the inflationary outlook and health of the economy, which the Fed has been closely monitoring.
- The U.S. labor market remained tight during the quarter with unemployment at 3.7% in December.

# Q4 2023 Market Review – Chart of the Quarter

## The Magnificent Seven

The Magnificent Seven (Apple, Amazon, Alphabet, Microsoft, Meta, NVIDIA, and Tesla) were responsible for the lion's share of the U.S. equity market's performance in 2023. This group of stocks now represents approximately 1/3 of the S&P 500 Index. With the market narrowing around these names, they will exert much greater influence on the market's performance in 2024, as market-cap weighted indices like the S&P 500 are starting the year much less diversified than they have in the past.
