

A One Planet Community

This is how we behave in Canada

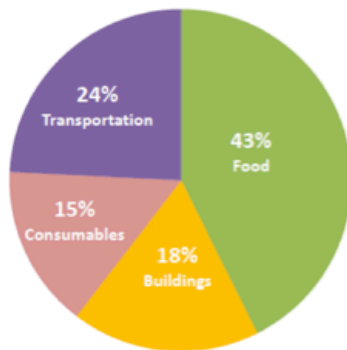

This is what we have

So our fair share is One Planet

We need to reduce our footprint by **80%**
Victoria's Footprint is less, about 3 Planets
- but that still means a **67% reduction**

Victoria Ecological Footprint 

3 Planets = 5.1 gha/person.
The following changes will reduce
Victoria's footprint about 20%

Suggested change	EF reduction, gha/person
Eliminate fossil fuel emissions in buildings	0.41
Convert half of gasoline private vehicles to electric	0.18
Reduce purchase of non-food consumables by 30%	0.15
Reduce meat and dairy by 25%	0.12
Purchase 25% less food	0.11
TOTAL	0.97

At the same time we want a high quality of life and good health – for everyone.

But we are not taking this seriously yet.

Imagine what this would mean for your community
