Joe Clark
Information Technology Services
Director

Experience

Joe joined Urish Popeck after founding and building a successful network consulting practice in Central Pennsylvania. He manages Catalyst Solutions and Urish Popeck's internal network and is responsible for managing all of the firm's technology needs. Joe provides various IT support services to clients of various industries including retail, construction, professional services, technology, manufacturing and healthcare. Over the past 30 years, his engagements have included services such as:

- Design and implementation of secure wide area networks
- Cyber security incident and response and forensic investigations
- Experience in the medical sector with network design and implementation of practice management software ensuring platform meets or exceeds HIPPA standards;
- Enterprise level Microsoft and Citrix platform design and implementation
- Adjunct Instructor at South Hills Technology School, Ethical Hacking and Cyber Defense including business continuity and disaster recovery strategies, SAN design and implementation
- Advising and consulting for multiple ransomware occurrences

Joe's additional experience encompasses project management, data center infrastructure services, server virtualizations, business continuity and disaster recovery planning, business continuity planning, network security, administrative audits, and, remote monitoring and intrusion detection. He has had engagements involving application service provider hosting email collaboration, practice management software, retail point of sale software.
