THE SINGING BOWL PRESCHOOL

We are living in times of great innovation and technological advancement that have improved our lives. As much as these advancements are better for adults they pose serious problems to child development. Children are growing in an age of excess and are being rushed to grow up too fast, too fragile. In this age of plug and play my advice to parents is - slow down, preserve childhood and enrich their life with real experiences that establish strong connections to world than screens. In this readymade culture, over consumerism, involving children in daily chores and making things ourselves can help them become self-reliant and grow up realizing the greatest power that lies in their hands. Drench them in fantasy and fairy tales to build a sense of wonder which gives them wings to imagine, traverse worlds and situations as a grown up.

Sruthi R. | Director

Unique teaching approaches

- **The Waldorf Approach:** This methodology instills intellectual, artistic and practical skills in children in an incorporated and all-encompassing way.
- **The Reggio Emilia Approach:** This methodology supports self-directed and experiential learning among students in a relationship-driven environment.
- **Montessori Approach:** A child-centric approach based on scientific observations that has been adopted by preschools for over hundred years.

About Us

The Singing Bowl Preschool was founded on the motto of "true love for children". This early-years education centre strives to learn from the world's best preschool practices, debate the current status-quo in child care and contextualise best practices to the needs of the Indian society. The preschool is a space that offers a atmosphere of wonder, beauty, respect and security for children to begin their life-long process of engagement with the world and themselves.

The name Singing Bowl Preschool is inspired by the soothing tones of singing bowls used in Tibetan Buddhism that reflect a perfect state of harmony. The preschool aims to re-discover childhood in the modern world and promote innovative practices that support the healthy development of a child that enriches them with the love and joy of learning and living. The Singing Bowl Preschool strongly believes that children need an environment that respects and meets their needs and gives them time to explore and experience the world at their own pace.

Established: 2011
No of students: 250+ (Hyderabad based chain of preschool)
Teacher-student ratio: 1:10

Greatness Quotient

Innovative educational programme

The Singing Bowl Preschool derives its education programmes from multiple internationally renowned child development theories and also from the latest neuroscience research. These education programmes help bring out the best in students and also give them a chance to explore independent learning.

Calm and soothing school environment

Children enjoy going to The Singing Bowl Preschool because of its soothing environment which is close to a space like home. The campus is designed to create a safe, secured feeling and a sense of belonging. Classrooms are decorated with the artwork created by students rather than cartoons and other displays to create a gentle and calm learning atmosphere where children feel nurtured.

Unique teaching methodologies

The faculty at The Singing Bowl Preschool aims to protect the sense of wonder while nourishing human capacities that form the foundation of higher learning in early childhood years. To fulfil this endeavour, the preschool brings out the generation-old wisdom of oral traditions through carefully chosen unique songs and stories that enrich children's souls and verbal skills. Young minds are introduced to practical life activities that are central to a child's cognitive, physical, emotional, social development.

Strong Passionate Team

The Singing Bowl is supported by a strong team of individuals who work for the wellbeing of the children. There has been a continuous effort to study & research on various teaching philosophy from worldwide - Japan, Italy, Hungary, USA, Australia, etc. The teachers undergo regular training and play the role of an educator, partner and facilitator in a child's journey of growth.

Excellent hygiene standards

The Singing Bowl Preschool lays great emphasis on cleanliness and hygiene. The school's everyday cleaning process includes sanitising, disinfecting and regular cleaning. The staff takes great care to ensure that the cleaning products used are natural and environment friendly considering that children can be negatively affected by chemicals in cleaning agents. Every Saturday, the school premises including classrooms and play areas undergo a deep cleaning routine.

Child safety precautions

Safety of children is of highest priority at The Singing Bowl Preschool. Safety measures like concealing and padding of sharp corners, child-proofing of electrical sockets are a few of the measures undertaken to make the school a safe place for its students. Additionally, the campus is under constant CCTV surveillance and all their centres conduct regular fire drills. The staff is trained on first aid, CPR by doctors and school organises children's health camp and doctor's talk for parents from renowned Hospitals.

Shuchi Pandey
Mother of Yug Bhattacharyya

"Singing Bowl was the first school my child went to and I am glad that we made this choice for him. Their staff is very caring and we as parents feel safe to send our children there. The teachers are the strong pillars of the organization as they really teach the kids with a lot of care, attention and love. The way of teaching and handling the children is a big plus which is enforced by the very capable and approachable management. My child has learnt a lot at the school and had made a lot of friends (including the staff). This sure is a second family for him :)"
