

INDIANA UNIVERSITY
LIMNOLOGY LAB

Welcome to the Indiana University Limnology Lab!

Our lab, located in the O'Neill School of Public and Environmental Affairs, focuses on the study of applied science with regards to fresh water, primarily in the state of Indiana.

The programs that we conduct throughout the year include:

- ◆ Lake Diagnostic Studies ◆
- ◆ Limnology 101 Workshops ◆
- ◆ Watershed Diagnostic Studies ◆
- ◆ Aquatic Invasive Species Workshops ◆
- ◆ Watershed Management Plans ◆
- ◆ Lake Monitoring Programs ◆
- ◆ Cyanotoxin Analysis ◆
- ◆ Bathymetry ◆
- ◆ Aquatic Macrophyte Surveys ◆
- ◆ Plankton Identification & Enumeration ◆
- ◆ Benthic Invertebrate Identification & Enumeration ◆

We also run specific programs such as the Indiana Clean Lakes Program, where we sample water quality for 80 different lakes across Indiana each summer with a team of IU students. Overall, our goal is to provide education, data, and continued research on freshwater bodies of water to be able to measure trends, areas of concern, and management interventions to help prevent further degradation of our lakes.
