

Spellbound Tans

Complete Guide To Your Vacation Spray Tan

DON'T FORGET TO SEND ME A VACATION PIC OF
YOU LOOKING *amazing* IN YOUR SPELLBOUND TAN!

Why spray tan before vacation?

- You're bronzed and beach ready on **DAY ONE** when you arrive
- It will **define your features** and you will have **whiter looking teeth**
- Provides **increased confidence** even if your diet wasn't dialed in before you left
- Everyone feels better with a healthy glow – **if you can't tone it, tan it!**
- Spend more time seeing the sights and less time in the sun because **you're already tan**
- A sunless tan is **healthier for your skin** and helps prevent premature aging
- **Great for vacation pictures** – you are photo ready before you even leave

**BE SURE TO BOOK YOUR SPRAY TAN APPOINTMENT
1-2 DAYS BEFORE YOU LEAVE FOR VACATION**

VACATION SPRAY TAN PREP

Start with a fresh canvas – completely remove any residual spray tan and exfoliate your skin

Manicures, pedicures and waxing **should be done prior** to your appointment – a spray tan should be the **LAST** thing you do before you leave

Moisturize during the week before you leave using a high quality chemical free lotion, staying away from perfumed products and remember to hydrate, hydrate, hydrate!

Don't forget to pack :

- Sulfate-free soap or shower gel
- A good moisturizer to keep your skin soft
- Travel size tanning water or mousse for touchups
- Sunscreen

Be extra careful **NOT to get a sunburn** as this will cause patchiness in your existing spray tan and will be problematic for the next 6 months as your skin heals

Can I Go Swimming?

Absolutely! - if you follow a few rules:

- You are water ready after your tan has **fully developed (24 hrs)** and you have rinsed off all the cosmetic bronzer
- Short dips in the water to cool off work great – hanging out in the water **all day** will fade your tan
- A liberal layer of **waterproof sunscreen** will help keep the water off your skin and will help protect your color

WHILE ON VACATION

Swimming in a pool for extended periods of time will fade your spray tan. **Keep it short and rinse off**

Saltwater is better than chlorine but plan to **snorkel or dive later in your vacation** rather than during the first few days

A hot tub is a **big NO-NO** for your spray tan as it will remove it in one soak

A spray tan is NOT a base tan and will not protect you from the sun

Don't skimp on SPF as **you will tan or BURN** right through a spray tan

Choose a **lotion formula sunscreen** that is unscented and avoid aerosol sunscreens as they can be drying to the skin
