ROBOTIC INTEGRATION INDUSTRY Area & Entry-Exit Safeguarding Solutions

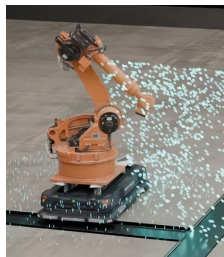

Sensory Robotics – 3D Safety System

>> [MORE INFO](#)

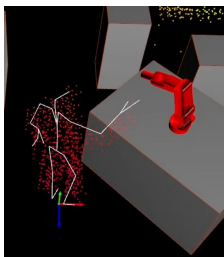

SR-1 Safety System

A 3D safety system that detects people in real time and drives predictable safety behavior for industrial robots and AMRs in shared-space cells.

SR-Mobile

A mobile safety system that applies SR-1 technology to AMRs with mounted arms, allowing safety to travel with the robot and protect the active work envelope as it moves.

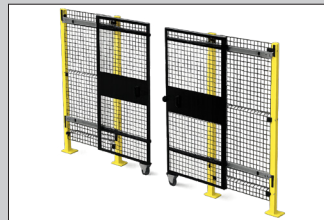

SR-Insight

Software that turns SR-1 safety events into dashboards and alerts, helping teams track stops, identify root causes, and detect drift from the approved risk assessment.

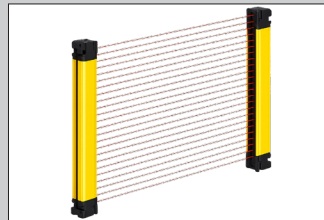

Radar Safety Systems

Physical Guarding

Light Curtains

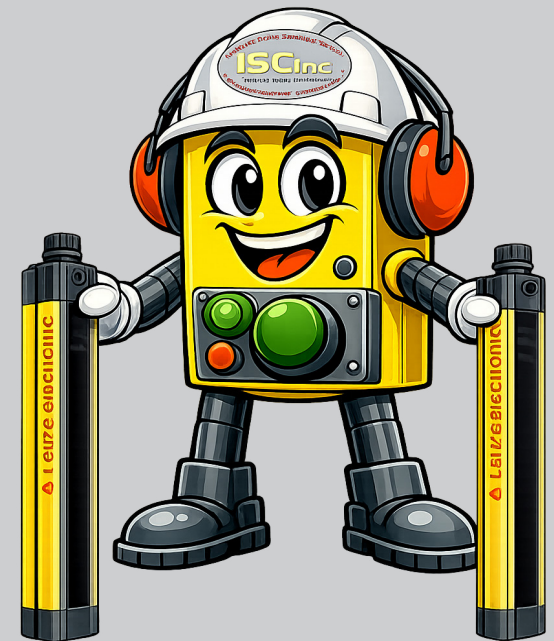

Laser Scanners

Lidar Safety Solutions

Single & Multi Beam Safety Solutions
