Hex Jr. 3-5	2" of Adjustment	5 Tons
Hex Jr. 5-8	3" of Adjustment	5 Tons
Hex Jr. 8-12	4 of" Adjustment	5 Tons

How to Order

Static Load Determination

Determine weight of ram and upper section of press tool and multiply x 2
If you do not have the original machine specifications, just use this hand formula:

$$\frac{\text{Press Bed Area (Square Inches)} \times \text{Shut Height (Inches)}}{1728 \text{ (Cubic Inches in one cubic foot)}} = \text{Static Load in tons}$$

Please note that the above method includes the weight of the upper section of the tool and provides a safety factor of 2x.

Block Height and Length of Screw

It is advisable to size the block to suit the maximum daylight of the press (Stroke up / Adjustment up). The screw can then be turned clock-wise for shorter requirements.

Maximum adjustment of 4" is available on the Hex Jr.

Accessories

Storage Options

Adjustable Hex Jr.
Storage Hanger

Interlock Options

Heavy-Duty
Interlock

Each Interlock kit includes a dual-circuit interlock switch with a chain-affixed, T-handle.

Standard-Duty
Interlock
