STANDARD AND LARGE ENCLOSURES

Features/Applications

The following enclosures are made from 14 GA. sheet steel painted with a dry powder paint. The first group will accept all standard size REES push button switches. The second group (the 04938-'s) are designed to fit the larger style switches from page 18. The 02765-100 one opening, painted yellow, is suitable for holding an "Emergency Stop" switch. These enclosures can be used to house any switch that has the same mounting pattern.

These enclosures are rated Nema 12/13,
