ACD Elektronik

M2SMART® HMI SYSTEM

MOBILE HMI WITH FUNCTIONAL SAFETY ACCORDING TO DIN EN ISO 13849

Flexible, efficient and safe operation thanks to:

- Wireless design
- Modular construction
- Various display sizes

Components
M2Smart® HMI System

M2SMART® HMI10

- 10.1-inch display with capacitive touchscreen guarantees optimal visualization and user-friendliness
- Modular design
- High usability
- Unlimited operating time thanks to removable battery and active holder

M2SMART® HMI5

- 5-inch display with capacitive touchscreen for optimal user-friendliness
- Compact design for easy handling
- Independent of control unit
- User-friendly operating system

M2SMART® GATEWAY

- Flexible installation inside or outside the control cabinet
- Quick and easy pairing via NFC
- Control-independent thanks to discrete wiring

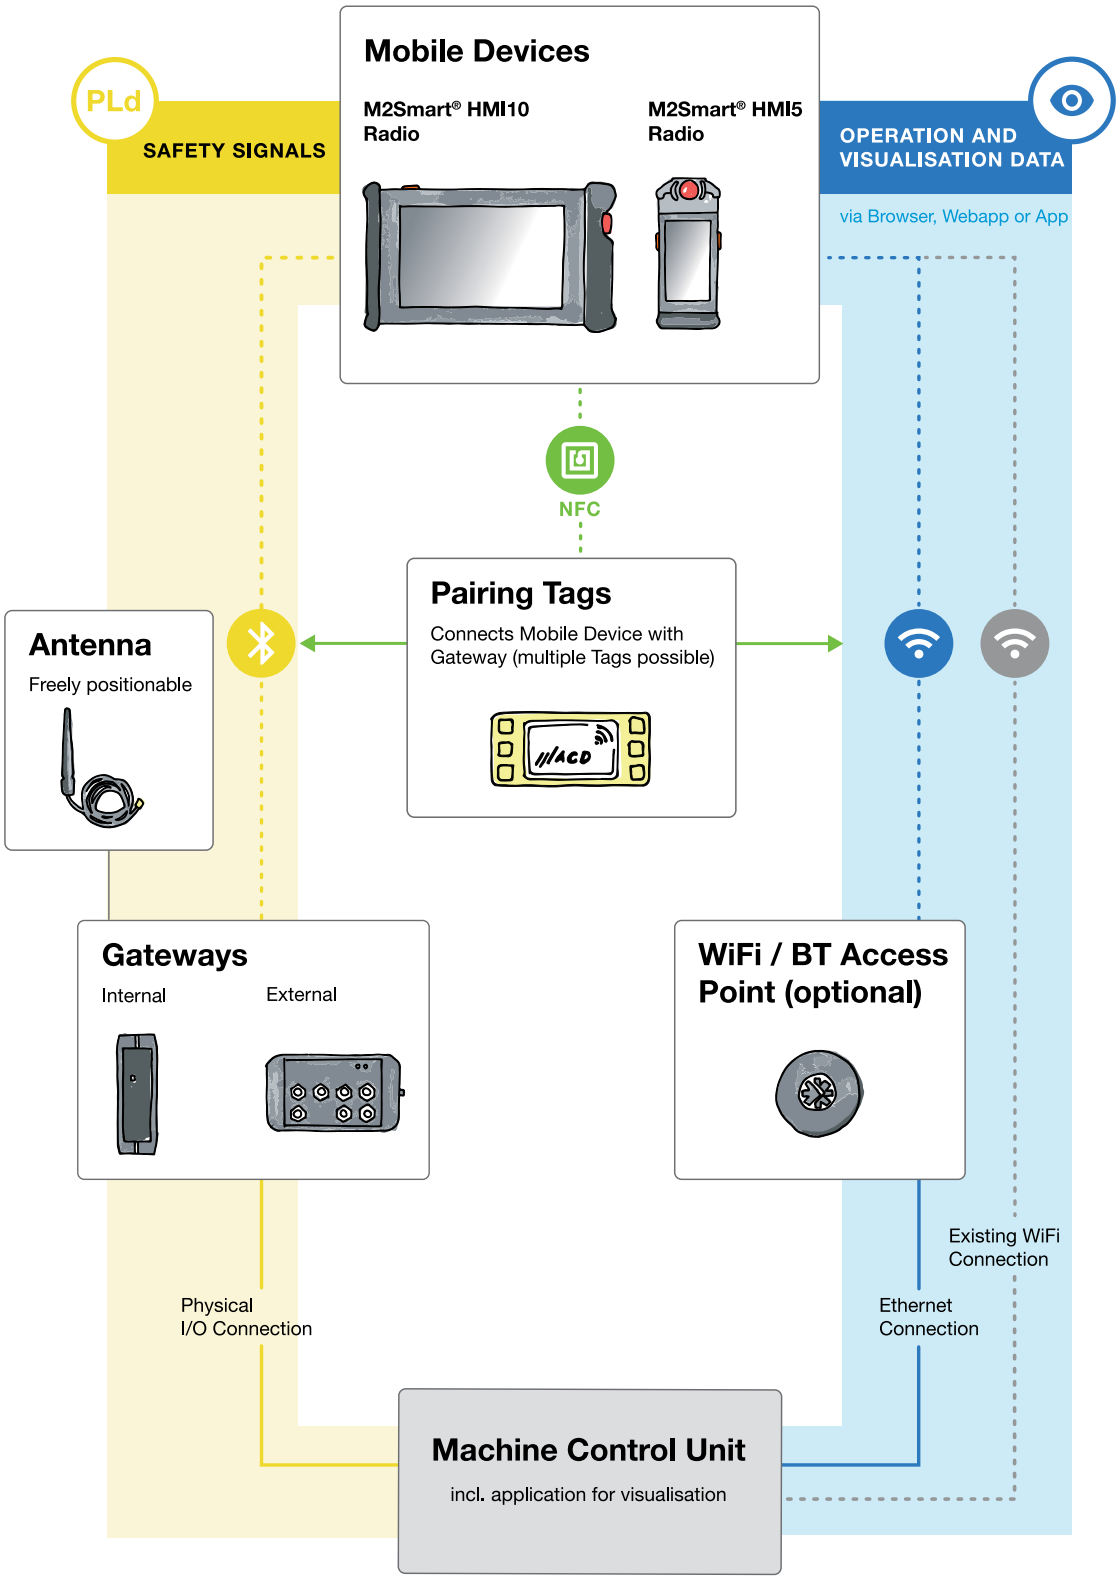

M2SMART® HMI ACCESS POINT

- Variable network configuration
- Robust industrial housing
- Optional for the transmission of non-safety-relevant data
- Simple pairing and disconnection in a single process thanks to automatic integration into the pairing process

Functionality
Wireless HMI System

FOR MORE INFORMATION:

Drive and Control Technology

Maschinery and Plant Engineering

Industrial Automation

- Modular design for individual device configurations
- Focus on ergonomics for fatigue-free work
- Secure Android™ Industrial+ operating system independent of third-party services
- Security patches and upgrades over the entire product lifetime, directly from the manufacturer in Germany
- Functional safety according to DIN EN ISO 13849, performance level d
- Illuminated emergency stop button and three-stage enabling switch
- App for easy parametrization
- Quick-change battery and active holders for uninterrupted work
